Table of Contents

Invited Presentations

Instructional Applications of ACT: Past, Present, and Future’ ....................... 1
J.R. Anderson (Abstract)

Teaching Expertise and Learning Environments’ ............................................ 2
M. Grandbastien (Abstract)

Hanging by Two Threads: The Evolution of Intelligent Tutoring Systems Research ........................................................................................................ 3
J. Self (Abstract)

My Knowledge of Knowledge ................................................................. 4
V.J. Shute (Abstract)

Cognitive Tools to Support Discovery Learning ............................................ 5
W.R. van Joolingen (Abstract)

Architectures for ITS

Using a Learning Agent with a Student Model ............................................. 6
J.E. Beck, B. Park Woolf

Model-Based Explanations in Simulation-Based Training ............................ 16
T.M. Khan, S.J. Paid, K.E. Brown, and R.R. Leitch

Towards an Intelligent Tutoring System for Situation Awareness Training in Complex, Dynamic Environments ...................................................... 26
E.J. Bass

Embedded Training for Complex Information Systems ............................... 36
B.A. Cheikes, M. Geier, R. Hyland, F. Linton, L. Rodi, and H.-P. Schaefer

Macro-Definitions, a Basic Component for Interoperability between ILEs at the Knowledge Level: Application to Geometry ................................... 46
M. Macrelle, C. Desmoulins

Modelling the Knowledge-Based Components of a Learning Environment within the Task/Method Paradigm ................................................. 56
C. Choquet, F. Danna, P. Tchounikine, and F. Trichet
Design and Interface Issues

Deconstructing a Computer-Based Tutor: Striving for Better Learning Efficiency in Stat Lady ................................................................. 66
K.A. Gluck, V.J. Shute, J.R. Anderson, and M.C. Lovett

Habitable 3D Learning Environments for Situated Learning .................. 76
W.H. Bares, L.S. Zettlemoyer, and J.C. Lester

Motivation Diagnosis in Intelligent Tutoring Systems ............................ 86
A. de Vicente, H. Pain

Some Reasons Why Learning Science Is Hard: Can Computer Based Law
Encoding Diagrams Make it Easier? .......................................................... 96
P.C.-H. Cheng

Curriculum Evaluation: A Case Study .................................................... 106
H. Dufort, E. Aimeur, C. Frasson, and M. Lalonde

Tutoring and Authoring Tools

A Bottom-Up Approach to Multimedia Teachware .................................. 116
J. Caumanns

The Authoring Assistant ................................................................. 126
S. Ritter

Explanatory Mechanisms for Intelligent Tutoring Systems ...................... 136
D.P. Metzler, C.J. Martincic

DNA - Uncorking the Bottleneck in Knowledge Elicitation and
Organization ......................................................................................... 146
V.J. Shute, L.A. Torreano, and R.E. Willis

Evaluating Subject Matter Experts’ Learning and Use of an ITS
Authoring Tool .................................................................................... 156
B.M. Wenzel, M.T. Dirnberger, P.Y. Hsieh, T.J. Chudanov, and H.M. Halff

Component-Based Construction of a Science Learning Space .................. 166
K.R. Koedinger, D.D. Suthers, and K.D. Forbus
Collaborative Learning

'Do It Yourself' Student Models for Collaborative Student Modelling and Peer Interaction ................................................................. 176
S. Bull

Promoting Effective Peer Interaction in an Intelligent Collaborative Learning System .............................................................. 186
A. Soller, B. Goodman, F. Linton, and R. Gaimari

Using Induction to Generate Feedback in Simulation Based Discovery Learning Environments ........................................... 196
K. Veermans, W.R. Van Joolingen

An Interactive Graphical Tool for Efficient Cooperative Task Acquisition Based on Monaco-T Model ........................................ 206
S. Guepfa Tadié, J.-Y. Rossignol, C. Frasson, and B. Lefebvre

Learning in the Workplace: Initial Requirements of a Lessons Learned Centred Corporate Memory .............................. 216
L. Alem

Knowledge Structure and Representation

An ITS for Dutch Punctuation ................................................................. 224
A. Bouwer

Cognitive Task Analysis in Service of Intelligent Tutoring System Design: A Case Study in Statistics ..................................... 234
M.C. Lovett

Diagrammatic Reasoning for Geometry ITS to Teach Auxiliary Line Construction Problems ........................................... 244
N. Matsuda, T. Okamoto

Providing Feedback to Equation Entries in an Intelligent Tutoring System for Physics ...................................................... 254
A.S. Gertner

Using Automatic Methods for Structuring Conceptual Knowledge in Intelligent Learning Environments ................... 264

Two-Phase Updating of Student Models Based on Dynamic Belief Networks ................................................................. 274
J. Reye
## Teaching and Learning Strategies

Student Modeling

Evaluation of Data Aging: A Technique for Discounting Old Data During Student Modeling .............................................................. 384
G.I. Webb, M. Kuzmycz

Student Modelling by Case Based Reasoning ................................. 394
M.E. Shiri A., E. Aïmeur, and C. Frasson

Tutoring Prolog Novices Based on Programming Techniques .......... 404
J. Hong

Experiences in Implementing Constraint-Based Modeling in SQL-Tutor ... 414
A. Mitrović

A Practical Approach to Bayesian Student Modeling ...................... 424
W.R. Murray

Student Modeling from Conventional Test Data: A Bayesian Approach Without Priors .............................................................. 434
K. VanLehn, Z. Niu, S. Siler, and A.S. Gertner

Educational Agents

Toward a Unification of Human-Computer Learning and Tutoring .......... 444
H. Hamburger, G. Tecuci

Developing Intelligent Educational Agents with the Disciple Learning Agent Shell ................................................................. 454
G. Tecuci, H. Keeling

An Instructor’s Assistant for Team-Training in Dynamic Multi-Agent Virtual Worlds .............................................................. 464
S.C. Marsella, W.L. Johnson

Visual Emotive Communication in Lifelike Pedagogical Agents ........ 474
S.G. Towns, P.J. FitzGerald, and J.C. Lester

Incorporating Personality into a Multi-Agent Intelligent System for Training Teachers .............................................................. 484
J. Yin, M.Seif El- Nasr, L. Yang, and J. Yen
Deploying ITS

The Intelligent Helpdesk: Supporting Peer-Help in a University Course ...... 494
J. Greer, G. McCalla, J. Cooke, J. Collins, V. Kumar, A. Bishop, and J. Vassileva

On the Notion of Components for Intelligent Tutoring Systems ............... 504
V. Devedzic, D. Radovic, and L. Jerinic

An Intelligent Tutoring System for Teaching Formal Languages ............. 514
V. Devedzic, J. Debenham

Elaborating Models of Algebraic Expression-Writing .......................... 524
M.A. Mark, K.R. Koedinger, and W.S. Hadley

AVATAR: An Intelligent Air Traffic Control Simulator and Trainer .......... 534
C.A. Connolly, J. Johnson, and C. Lexa

An Advanced Embedded Training System (AETS) for Tactical Team Training ................................................................. 544
W. Zachary, J. Cannon-Bowers, J. Burns, P. Bilazarian, and D. Krecker

Web-Based ITS

Creating More Versatile Intelligent Learning Environments with a Component-Based Architecture .............................................. 554
S. Ritter, P. Brusilovsky, and O. Medvedeva

Goal-Based Autonomous Social Agents: Supporting Adaptation and Teaching in a Distributed Environment ................................................. 564
J. Vassileva

Curriculum Sequencing in a Web-Based Tutor ........................................ 574
M.K. Stern, B. Park Woolf

Vincent, an Autonomous Pedagogical Agent for On-the-Job Training ...... 584
A. Paiva, I. Machado

LANCA : A Distance Learning Architecture Based on Networked Cognitive Agents ................................................................. 594
C. Frasson, L. Martin, G. Gouardères, and E. Aimeur

Poster Papers ....................................................................................... 604

The Extension of an Actor Language from Domain-Specific Requirements ................................................................. 604
Stefano A. Cerri, Antonina Dattolo, and Vincenzo Loia
A Classification System for Web-Based Training ............................................... 604
Terrell N. Chandler and Craig Earon

An Interactive Intelligent Tutoring System with Tutorials Generation
and English-Malay Translation Abilities .......................................................... 605
Noornina Dahlan

WinKE: A Pedagogic Tool for Teaching Logic and Reasoning .......................... 605
Marcello D’Agostino, Marco Mondadori, Ulrich Endriss,
Dov Gabbay, and Jeremy Pitt

Thai Learning System on the WWW Using Natural Language
Processing and ITS Evaluation ....................................................................... 606
Suyada Dansuwan, Kikuko Nishina, and Kanji Akahori

Flexible ILE Development: Case Studies of an Agent-Based
Software Engineering Approach ................................................................. 606
David Duncan and Paul Brna

Declarative Mark-Up Languages as a Tool for Developing
Educational Hypermedia ............................................................................... 607
Baltasar Fernandez-Manjon, Antonio Navarro, Juan M. Cigarran, and
Alfredo Fernandez-Valmayor

Multi-Agent Based Pedagogical Games ...................................................... 607
Lucia M.M. Giraffa, Rosa M. Viccari, and John Self

The SYSTEMIONS: Agents to Design Intelligent Tutoring Systems .......... 608
Guy Gouarderes, C. M. Françoise Canut, and Eric Sanchis

An Intelligent Learning Environment for Data Modeling .......................... 608
Lynn Hall and Adrian Gordaon

Lessons Learned in Developing Simulation-Based Expert Systems for
Troubleshooting Training ........................................................................... 609
Julie A. Jones and Robin Taber

Adult Learning and University Aviation Education .................................... 609
Merrill R. (Ron) Karp

Integrating the CITS and CSCL Paradigms for the Design of an Effective
Collaborative Learning System .................................................................. 610
Sofiane Labidi and Jeane Silva Ferreira

Cognitive Diagnosis in ITS Using General Pedagogical Rules ................... 610
Tang-Ho Le
Coaching Software Skills on the Job: Laying the Groundwork ......................... 611
Frank Linton, Andy Charron, and Debbie Joy

The F-16 C Shop Maintenance Skills Tutor ..................................................... 611
Christopher Marsh

Using Bayesian Networks to Build and Handle the Student Model
in Exercise-Based Domains ........................................................................ 612
E. Millán-Valdeperas, J.L. Pérez-de-la-Cruz, and F. Triguero-Ruiz

SERAC : A Multi-Agent System for the Evaluation and Revision
of Knowledge in ITS .................................................................................... 612
Sophie Millett and Guy Gouarderes

MIS-Tutor: An ITS in Support of IS Mastery Learning ................................ 613
Ali Montazemi and Feng Wang

Modeling the Cognitive Effects of Participative Learner Modeling .............. 613
Rafael Morales, Helen Pain, and Michael Ramscar

Cognitive Measures for Visual Concept Teaching with Intelligent
Tutoring Systems ............................................................................................ 614
Andrey R. Pimentel and Alexandre I. Direne

GURU: A Self-Extending Tutor Model for Pascal Programming ................. 614
Rhodora L. Reyes, Razelle Apostol, Tiffany Kua,
Rowena Mendoza, and Carlo Antonio Tan

Computational Instructional Design for Construction of Adaptive
Tutors in Real Time from Distributed Learning Objects ................................. 615
Kurt Rowley

Influence of Didactic and Computational Constraints on ILE Design ............ 615
Nicolas van Labeke and Josette Morinet-Lambert

Panels .......................................................................................................... 616

Methodologies for Tutoring in Procedural Domains ................................. 616
Carol Redfield (Co-chair), Ben Bell (Co-chair), Patricia Y. Hsieh,
Joseph Lamos, R. Bowen Loftin, and David Palumbo

ITS Technologies in Virtual Environments:
Can We Harness the Synergy? ................................................................. 617
Carol Horwitz (Chair), Jeff Rickel, Allen Munro, Craig Hall,
Randy Stiles, and Helen Gigley
Semantics and Pedagogy in Authoring Educational Technology: Confronting the Mismatch Between Researchers' Expectations and Users’ ................................. 618
Benjamin Bell (Chair), Alex Kass, M. David Merrill, Tom Murray, and Brenda M. Wenzel

The Use of 'War Stories' in Intelligent Learning Environments .......................... 619
Benjamin Bell (Co-chair), Jan Hawkins (Co-chair), R. Bowen Loftin, Tom Carey and Alex Kass

Lessons Learned from Large-Scale Implementation of Adaptive Tutoring Systems: The Fundamental Skills Training Project .............................. 620
Kurt Rowley (Chair), Kurt Steuck, D'Anne Redmon, and Todd Miller

Workshops ................................................................. 621

Workshop I - Intelligent Tutoring Systems on the Web ................................. 621
Beverly P. Woolf and Mia K. Stern

Workshop II - Pedagogical Agents ................................................. 622
Claude Frasson and Guy Gouarderes

Workshop III - Efficient ITS Development ......................................... 623
Allen Munro and Wouter R. Van Joolingen

Workshop IV - The Failure of Cognitive Science in the Courseware Marketplace: If We’re So Damned Smart, Why Aren’t We Rich? ................................. 624
J. Wesley Regian

Exhibits ................................................................. 625

Authors Index ............................................................ 627
Intelligent Tutoring Systems
Goettl, B.P.; Halff, H.M.; Redfield, C.L.; Shute, V.J. (Eds.)
1998, XIX, 629 p. 136 illus., 99 illus. in color., Softcover
ISBN: 978-3-540-64770-6
