

# Contents

<b>Preface</b> .....	V
<b>1 Invited Presentations</b> .....	1
<b>Direct Multiple Shooting Methods for Control and Optimization of DAE in Chemical Engineering</b> .....	2
<i>Irene Bauer, H. Georg Bock, Daniel B. Leineweber, Johannes P. Schlöder</i>	
<b>Topology Based Comparison Technique for Vector Fields Using Earth Mover's Distance</b> .....	19
<i>Rajesh Batra, Yingmei Lavin, Lambertus Hesselink</i>	
<b>New Algorithms for Nonlinear Generalized Disjunctive Programming</b> .....	31
<i>Ignacio E. Grossmann, Sangbum Lee</i>	
<b>A Framework for Control, State Estimation, Fault Detection, and Verification of Hybrid Systems</b> .....	46
<i>Manfred Morari, Alberto Bemporad, Domenico Mignone</i>	
<b>Optimisation of Hybrid Dynamic Processes</b> .....	62
<i>Constantinos C. Pantelides, Marios P. Avraam, Nilay Shah</i>	
<b>Multi-Scale Approaches in Engineering and Scientific Computing</b> .....	77
<i>George Stephanopoulos</i>	
<b>2 Combustion and Flame</b> .....	93
<b>Numerical Simulation of Soot Particle Size Distributions with a Discrete Galerkin Method</b> .....	94
<i>Jörg Appel, Henning Bockhorn, Michael Wulkow</i>	
<b>Direct Numerical Simulation of 3d Flame Balls</b> .....	102
<i>Henning Bockhorn, Jochen Fröhlich, Wolfgang Gerlinger, Kai Schneider</i>	
<b>Hybrid Mixed Discretization Methods for Combustion Problems in Porous Media</b> .....	110
<i>Peter Knabner, Gerhard Summ</i>	

VIII

<b>Soot and NOx Formation in a Stationary Turbulent Combustor</b> .....	118
<i>Markus Kraft, Michael Balthasar, Fabian Mauss</i>	
<b>A DNS Study of Curvature Effects in Turbulent Premixed Flames</b> .....	126
<i>Marc Lange, Jürgen Warnatz</i>	
<b>3D-Modeling of Coal Combustion in Circulating Fluidized Beds</b> .....	134
<i>K. Luecke, T. Knoebig, J. Werther</i>	
<b>Transient Modeling of a Catalytic Combustor: A Critical Review of Assumptions Commonly Made</b> .....	142
<i>Roland Wanker, Harald Raupenstrauch, Gernot Staudinger</i>	
<b>3 Computer Aided Process Design</b> .....	151
<b>Parallel Modular Dynamic Process Simulation</b> .....	152
<i>Jürgen Borchardt, Klaus Ehrhardt, Friedrich Grund, Dietmar Horn</i>	
<b>Parallel Solution of Reaction-Diffusion Equations with a Stabilization Method</b> .....	160
<i>Uwe Kleis</i>	
<b>Integration of Membrane Technology in Process Synthesis - Exemplary Separation of Acetic Acid - Water</b> .....	168
<i>G. Krabbe, R. Günther, J. Hapke, H. Kadereit, G. Schembecker</i>	
<b>Hahn Polynomials and the Efficient Modelling of Fractionation</b> .....	176
<i>Peter Lory</i>	
<b>Coupling Iterative Subsystem Solvers</b> .....	184
<i>Wolfgang Mackens, Jürgen Menck, Heinrich Voss</i>	
<b>Work Control for Newton Type Coupling</b> .....	192
<i>Jürgen Menck</i>	
<b>The Use of Numerical Tracking of Homoclinic and Heteroclinic Orbits in the Analysis of Chemical Engineering Problems</b> .....	200
<i>Igor Schreiber, Martin Kohout, Milan Kubíček</i>	
<b>Modelling and Numerical Simulation of a Crosscurrent Heat Exchanger</b> .....	208
<i>Yvonne Wagner</i>	

<b>4 Control</b> .....	217
<b>Efficient Direct Multiple Shooting in Nonlinear Model   Predictive Control</b> .....	218
<i>Hans Georg Bock, Moritz Diehl, Daniel Leineweber,     Johannes Schlöder</i>	
<b>Control Concepts for Parabolic Equations with an Application   to the Control of Fluid Flow</b> .....	228
<i>Michael Hinze, Andreas Kauffmann</i>	
<b>Iterative Learning Control of Fluidized Bed Combustor for   Sewage Sludge</b> .....	236
<i>Jan Lunze, Andreas Wolff</i>	
<b>Numerical Solution of Variable Coefficient DAEs and   Descriptor System</b> .....	244
<i>Peter Kunkel, Volker Mehrmann, Werner Rath</i>	
<b>5 Image Processing</b> .....	253
<b>A Non Linear Diffusion Approach to Investigate Flow   Structures in Circulating Fluidized Bed Reactors</b> .....	254
<i>Ariane Bredebusch, Klaus Wiehler, Hans Burkhardt,     Rolf-R. Grigal</i>	
<b>Flow Visualization with Textures</b> .....	262
<i>Thomas Loser, Dieter Mewes, Yuval Levy, Lambertus Hesselink</i>	
<b>4-D Particle Tracking Velocimetry Applied to Gas-Liquid   Reactors</b> .....	270
<i>Michael Stöhr, Christoph Garbe, Dirk Engelmann, Peter Geißler,     Susana Gomes, Frank Hering, Bernd Jähne, Hans-Günter Wagner</i>	
<b>6 Optimization</b> .....	281
<b>Numerical Methods for Initial Value Problems and Derivative   Generation for DAE Models with Application to Optimum   Experimental Design of Chemical Processes</b> .....	282
<i>Irene Bauer, Hans Georg Bock, Stefan Körkel,     Johannes P. Schlöder</i>	
<b>Parameter Estimation for Nonlinear Transport and   Degradation Processes of Xenobiotica in Soil</b> .....	290
<i>Angelika E. Dienes, Johannes P. Schlöder, Hans Georg Bock,     Otto Richter</i>	

<b>Combined Stochastic and Gradient-Based Optimization</b> . . . . .	298
<i>A. R. J. Esparta, E. Stein, A. Spieker, E. D. Gilles</i>	
<b>A Scalable Discrete Optimization Algorithm for Heat Integration in Early Design</b> . . . . .	306
<i>Eric S. Fraga, Ken I. M. McKinnon</i>	
<b>Simulated Annealing for the Optimization of Chemical Batch Production Processes</b> . . . . .	314
<i>Michael Hanke, Klaus R. Schneider</i>	
<b>Convex Relaxations for Global Constrained Optimization Problems</b> . . . . .	322
<i>Christian Jansson</i>	
<b>The Concept of Contiguity in Models Based on Time-Indexed Formulations</b> . . . . .	330
<i>Josef Kallrath</i>	
<b>A Sequential Approach for Nonlinear Optimum Experimental Design in DAE Systems</b> . . . . .	338
<i>Stefan Körkel, Irene Bauer, Huns Georg Bock, Johannes P. Schlöder</i>	
<b>Application of Direct Search Optimization for Parameter Estimation</b> . . . . .	346
<i>Rein Luus</i>	
<b>Process Optimization of Reactive Systems Modeled by Elementary Reactions</b> . . . . .	354
<i>Volker Schulz, Olaf Deutschmann</i>	
<b>Dynamic Optimization of Multicomponent Distillation Processes</b> . . . . .	362
<i>Erik Stein, Achim Kienle, Ernst D. Gilles</i>	
<b>7 Neural Network</b> . . . . .	371
<b>Trajectory Tracking of a Batch Polymerization Reactor Based on Input–Output–Linearization of a Neural Process Model</b> . . .	372
<i>Joachim Horn</i>	
<b>Early Detection and Identification of Undesirable States in Chemical Plants Using Neural Networks</b> . . . . .	380
<i>Joachim Neumann, Gørge Deerberg, Stefan Schlüter, Wilfried Schmitt, Günther Hessel</i>	

**Adaptation of Dynamic Process Models with Integral Data A  
Lagrangian Approach** ..... 388  
*Josef Wagenhuber*

**Index** ..... 397

**Index of Complementary Volume** ..... 403

**Author's Index** ..... 409

**Author's Index of Complementary Volume** ... 411
