Preface

This is the second MICCAI – the flagship international conference for medical image computing and computer-assisted intervention. MICCAI was created by merging three closely related and thriving conference series – VBC (Visualisation in Biomedical Computing), MRCAS (Medical Robotics and Computer Assisted Surgery) and CVRMed (Computer Vision, Virtual Reality and Robotics in Medicine) – to provide a single focus for the presentation of high-quality research in this important multi-disciplinary area. The first MICCAI was held in Boston, USA in October 1998. It attracted a large number of excellent submissions and was extremely well attended. The meeting went a long way towards meeting its ambitious objectives of bringing together the best theoretical and applied work in this rapidly emerging field, and encouraging constructive dialogue between computer scientists and clinicians.

We are delighted to report a similar level of interest in MICCAI 99. A total of 213 full-length papers were submitted, covering a broad range of topics. Of these 133 were accepted for inclusion in the conference – 49 as oral presentations and 84 as posters. All the selected papers appear in these proceedings. Each paper was reviewed by four members of the Scientific Review Committee, selected for scientific or clinical expertise of relevance to the subject matter. Final decisions were made by the Programme Committee, following closely the advice of the reviewers. We are indebted to the members of the Scientific Review Committee for the time they devoted to the review process and for their well-informed and generally detailed feedback to authors.

The result is another volume of high-quality papers that we hope will contribute to the development of this important and exciting area. We are also indebted to the dedicated team of staff and students at Manchester who helped to put together the proceedings, particularly Angela Castledine, Alan Brett, Mike Rodgers, Danny Allen, Christine Beeston, Karen Davies, Tony Lacey, and Chris Wolstenholme. We are very pleased to welcome delegates to Cambridge and hope that you will find MICCAI an enjoyable and stimulating experience. For readers unable to attend the conference, we hope that you will find this a valuable record of the scientific programme, and look forwards meeting you at MICCAI 2000, which will be held in Pittsburgh, USA.

September 1999

Chris Taylor and Alan Colchester
Proceedings Editors
MICCAI99
Conference Organising Committee

Second International Conference on
Medical Image Computing and Computer-Assisted Intervention
Cambridge, England
September 19–22, 1999

General Chair
Alan Colchester University of Kent at Canterbury and Guy’s Hospital, London, UK

Co-chairs
Mike Brady University of Oxford, UK
Jun-Ichiro Toriwaki University of Nagoya, Japan

Programme Chair
Chris Taylor (Chair) University of Manchester, UK

Programme Committee
Nicholas Ayache INRIA Sophia Antipolis, France
Richard D Bucholz St Louis University School of Medicine, USA
Brian Davies Imperial College, UK
Tony DiGioia Shadyside Hospital, Pittsburgh, USA
James Scott Duncan Yale University, USA
Guido Gerig University of North Carolina, USA
David Hawkes Guy’s Hospital, UK
Max A Viergever Utrecht University, Netherlands

Clinical Advisory Committee Chair
Tony DiGioia Shadyside Hospital, Pittsburgh, USA

Tutorials
Guido Gerig University of North Carolina, USA
Industrial Liaison

- Nicholas Ayache, INRIA Sophia Antipolis, France
- Mike Brady, University of Oxford, UK
- Bart ter Haar Romeny, University of Utrecht, Netherlands
- Jocelyne Troccaz, University of Grenoble, France
- Nigel John (coordinator), University of Manchester, UK

Local Organising Committee

- Richard Prager, University of Cambridge, UK
- Andrew Gee, University of Cambridge, UK

Scientific Review Commitee

- James Anderson, Johns Hopkins School of Medicine, USA
- Takehide Asano, Chiba University School of Medicine, Japan
- Gerard A Ateshian, Columbia University, USA
- Nicholas Ayache, INRIA Sophia Antipolis, France
- Isabelle Bloch, Ecole Nationale Superieure des Telecommunications, France
- Fred Bookstein, University of Michigan, USA
- Mike Brady, University of Oxford, UK
- Richard D Bucholz, St Louis University School of Medicine, USA
- Steve Charles, University of Tennessee, USA
- Philippe Cinquin, Institut Albert Bonniot, France
- Ela Claridge, University of Birmingham, UK
- Court Cutting, New York University, USA
- Paolo Dario, ARTS Lab, Italy
- Brian Davies, Imperial College, UK
- Scott Delp, Stanford University, USA
- Tony DiGioia, Shadyside Hospital, Pittsburgh, USA
- Takeyoshi Dohi, University of Tokyo, Japan
- James Scott Duncan, Yale University, USA
- Norberto Ezquerra, Universidad Politecnica de Catalunya, Spain
- Elliot Fishman, The Johns Jopkins Hospital, USA
- J Michael Fitzpatrick, Vanderbilt University, USA
- Henry Fuchs, Universirty of North Carolina, USA
- Toshio Fukuda, Nagoya University, Japan
- Guido Gerig, University of North Carolina, USA
- Sarah Gibson, Mitsubishi Electric Research Lab, USA
- Eric L Grimson, MIT AI Lab, USA
- Blake Hannaford, University of Washington, USA
- Dave Hawkes, Guy’s Hospital, UK
- Derek Hill, Guy’s Hospital, UK
Karl Heinz Hohne  
University Hospital Eppendorf, Germany

Koji Ikuta  
Nagoya University, Japan

Branislav Jaramaz  
UPMC Shadyside, USA

Chris Johnson  
University of Utah, USA

Ferenc Jolesz  
Brigham and Women’s Hospital, USA

Leo Joskowicz  
Hebrew University of Jerusalem, Israel

Takeo Kanade  
Carnegie Mellon University, USA

Lou Kavoussi  
Brady Urological Institute, USA

Peter Kazanzides  
Integrated Surgical Systems, USA

Ron Kikinis  
Brigham and Women’s Hospital, USA

Andres Kriete  
University Clinic Giessen, Germany

Stephane Lavallee  
PRAXIM, France

Heinz Lemke  
Technical University Berlin, Germany

Robert J Macniumas  
University of Rochester Medical Center, USA

Gregoire Malandain  
INRIA, France

Jean-Francois Mangin  
Service Hospitalier Frederic Joliot, France

Maurilio Marcacci  
Laboratorio di Biomeccanica, Italy

Dwight Meglan  
Mitsubishi Electric, USA

Dimitris Metaxas  
University of Pennsylvania, USA

Chuck Meyer  
University of Michigan, USA

Brent D Mittelstadt  
Integrated Surgical Systems, USA

Heinrich Muller  
Univerisitat Dortmund, Germany

Alison Noble  
University of Oxford, UK

Lutz-P Nolte  
M.E. Muller Institute, Switzerland

Wieslaw Nowinski  
Kent Ridge Digital Labs, Singapore

Michael Peshkin  
Northwestern University, USA

Stephen Pizer  
University of North Carolina, USA

Rob Player  
Boston Dynamics Inc (BDI), USA

Jerry L Prince  
Johns Hopkins University, USA

Klaus Radermacher  
Helmholtz-Institute f. Biomedizinische Technik, Germany

Richard Robb  
Mayo Clinic, USA

Jean-Marie Rocchisani  
Hopital Avicenne, France

Joseph Rosen  
Dartmouth-Hitchcock Medical Centre, USA

Ichiro Sakuma  
University of Tokyo, Japan

Tim Salcudean  
University of British Columbia, Canada

Kenneth Salisbury  
Intuitive Surgical, Inc, USA

Rick Satava  
Yale Laproendoscopic Surgery Center, USA

Achim Schweikard  
TU Munchen, Germany

H Siegfried Stiehl  
University of Hamburg, Germany

Paul Suetens  
KU Leuven, Belgium

Gabor Szekely  
Swiss Federal Institute of Technology, Switzerland

Mark A Talamini  
Johns Hopkins University, USA

Russ Taylor  
John Hopkins University, USA

Frank Tendick  
University of California San Francisco, USA

Demetri Terzopoulos  
University of Toronto, Canada
