

---

# Contents

Chapter 1	
General Aspects of DNA Isolation and Purification . . . . .	1
Chapter 2	
Preparation of Genomic DNA from Animal Cells . . . . .	33
Chapter 3	
Preparation of Genomic DNA from Plant Cells . . . . .	57
Chapter 4	
Preparation of Genomic DNA from Bacteria . . . . .	79
Chapter 5	
Isolation of Plasmid DNA . . . . .	101
Chapter 6	
Isolation and Purification of RNA . . . . .	119
Chapter 7	
Isolation of PolyA+ RNA . . . . .	145
Chapter 8	
Agarose Gel Electrophoresis of DNA . . . . .	163
Chapter 9	
Preparation of Probes for Hybridization . . . . .	192
Chapter 10	
Nucleic Acid Hybridization. A Theoretical Consideration . . . . .	221

Chapter 11	
DNA Transfer and Hybridization .....	233
Chapter 12	
Northern Transfer and Hybridization .....	263
Chapter 13	
DNA Cloning. General Consideration .....	298
Chapter 14	
DNA Cloning – Experimental Procedures .....	320
Chapter 15	
DNA Sequencing .....	374
Chapter 16	
PCR Analysis .....	406
Subject Index .....	423
