Table of Contents

Shape Analysis ............................................................. 1
   Reinhard Wilhelm, Mooly Sagiv and Thomas Reps

Optimizing Java Bytecode Using the Soot Framework: Is It Feasible? ...... 18
   Raja Vallée-Rai, Étienne Gagnon, Laurie Hendren, Patrick Lam,
   Patrice Pominville and Vijay Sundaesan

Pipelined Java Virtual Machine Interpreters ............................... 35
   Jan Hoogerbrugge and Lex Augusteijn

Automatic Removal of Array Memory Leaks in Java ....................... 50
   Ran Shaham, Elliot K. Kolodner and Mooly Sagiv

A Static Study of Java Exceptions Using JESP .............................. 67
   Barbara G. Ryder, Donald Smith, Ulrich Kremer,
   Michael Gordon and Nirav Shah

Fast Escape Analysis and Stack Allocation for Object-Based Programs ...... 82
   David Gay and Bjarne Steensgaard

Constant Propagation on the Value Graph:
   Simple Constants and Beyond ............................................. 94
   Jens Knoop and Oliver Rüthing

Simple Generation of Static Single-Assignment Form ...................... 110
   John Aycock and Nigel Horspool

Demand-Driven Construction of Call Graphs ............................... 125
   Gagan Agrawal

A Framework for Loop Distribution on Limited On-Chip
   Memory Processors ........................................................ 141
   Lei Wang, Waibhav Tembe and Santosh Pande

Techniques for Effectively Exploiting a Zero Overhead Loop Buffer ...... 157
   Gang-Ryung Uh, Yuhong Wang, David Whalley, Sanjay Jinturkar,
   Chris Burns and Vincent Cao

Advanced Compiler Optimization for CalmRISC8 Low-End
   Embedded Processor ..................................................... 173
   Dae-Hwan Kim

Global Software Pipelining with Iteration Preselection .................. 189
   David Gregg

Analysis of Irregular Single-Indexed Array Accesses and
   Its Applications in Compiler Optimizations ................................ 202
   Yuan Lin and David Padua
