1 Fundamentals
1.1 Communication Technologies
1.1.1 Print Media
1.1.1.1 Books
1.1.1.2 Magazines
1.1.1.3 Newspapers
1.1.1.4 Brochures
1.1.1.5 Other Printed Media
1.1.2 Electronic Media
1.1.3 Multimedia
1.1.4 Distribution and Market Volume
1.1.5 For the Future: Trends and Scenarios
1.1.5.1 Changes in the Traditional Printing Sector
1.1.5.2 Integration of New Media
1.2 Production of Print Media
1.2.1 Layout, Typography, Graphic Design
1.2.1.1 Type
1.2.1.2 Typography
1.2.1.3 Graphic Design
1.2.2 Prepress
1.2.3 Printing
1.2.4 Postpress/Finishing
1.2.5 Digital Production Equipment in the Workflow
1.2.6 Premedia
1.3 Printing Technologies
1.3.1 Overview of Printing Technologies
1.3.2 Printing Technologies with a Printing Master
1.3.2.1 Letterpress/Flexographic Printing
1.3.2.2 Gravure Printing
1.3.2.3 Lithography/Offset Printing
1.3.2.4 Screen Printing
1.3.3 Printing Technologies without a Master (NIP Technologies)
1.3.3.1 Electrophotography
1.3.3.2 Ink Jet
1.3.3.3 Printing Systems based on Non-Impact Printing Technologies
1.4 Print Quality
1.4.1 Color/Color Theory
1.4.2 Color Image Composition
1.4.3 Halftone Process
1.4.4 Quality Control/Measurement Techniques
1.4.4.1 Color Measurement
1.4.4.2 Color Register
1.4.4.3 Measurement of Gloss
1.4.5 Surface Finishing Techniques
1.4.5.1 Characteristics of Surface Finishing
1.4.5.2 Surface Finishing Techniques
1.5 Print Media Materials
1.5.1 Substrates
1.5.2 Printing Inks
1.5.2.1 Structure and Requirements
1.5.2.2 Offset Printing Inks
1.5.2.3 Gravure Printing Inks
1.5.2.4 Flexographic Printing Inks
1.5.2.5 Letterpress Printing Inks
1.5.2.6 Screen Printing Inks
1.5.2.7 Pad Printing Inks
1.5.2.8 Inks for Non-Impact Printing Technologies
1.5.3 Varnishes
1.6 Printing Presses and Printing Systems
1.6.1 General Structure
1.6.2 Designs for Multicolor Printing
1.6.2.1 Sheet-Fed Printing Presses
1.6.2.2 Web-Fed Presses
1.6.2.3 Packaging Printing Presses
1.7 Drying Methods
1.7.1 Physical Drying (Absorption)
1.7.1.1 Infrared (IR) Drying
1.7.1.2 Evaporative Drying
1.7.1.3 Problems in Practical Operation
1.7.2 Chemical Drying
1.7.2.1 Oxidation
1.7.2.2 UV Drying
1.7.2.3 Electron Beam (EB) Drying
1.7.3 Auxiliary Drying Techniques
2.1 Offset Printing ..............................................
2.1.1 Basic Principles .................................
2.1.1.1 Process ........................................
2.1.1.2 Printing Plates, Printing Ink, Dampening Solution
2.1.1.3 Inking Unit, Dampening Unit, Printing Unit
2.1.1.4 Print Quality ...................................
2.1.2 Sheet-Fed Offset Printing ......................
2.1.2.1 Paper Travel ..................................
2.1.2.2 Feeders ........................................
2.1.2.3 Printing Units ................................
2.1.2.4 Sheet Reversal/Perfecting ..................
2.1.2.5 Delivery ........................................
2.1.2.6 Drying .......................................... 2.2 Gravure Printing ........................................
2.1.2.7 Print Enhancement and In-Line Finishing ...
2.1.2.8 Press Architecture (Special Designs) ...... 2.2.1 Process ............................................
2.1.3 Web Offset Printing ............................... 2.2.1.1 Gravure Cylinder Manufacture ..............
2.1.3.1 Press/System Concepts (Components) ....... 2.2.1.2 Gravure Cylinder Imaging ...................
2.1.3.2 Web Travel (Infeed and Further Processing)
2.1.3.3 Printing Unit .................................... 2.2.1.3 Storage and Changing of Gravure Cylinders
2.1.3.4 Folders, Print Product Variations  .......... 2.2.1.4 Impression Roller .............................
2.1.3.5 Newspaper Printing .......................... 2.2.1.5 Inking Unit and Doctor Blade ..............
2.1.4 Remote Control, Measurement and Control Systems
2.1.4.1 Press Remote Control Systems ............... 2.2.1.6 Drying .........................................
2.1.4.2 Color Measurement and Control Systems ... 2.2.1.7 Circumferential and Lateral Register ........
2.1.4.3 Register Measurement and Control ........... 2.2.1.8 Magazine Turner Bars Superstructure .......
2.1.4.4 Inspection of the Printed Image ............. 2.2.1.9 Gravure Printing Folders .................
2.1.4.5 In-line Print Quality Measurement and Control Systems
2.1.4.6 The State of the Art in Remote Control, Measurement and Control Systems
2.1.4.7 Potential for Further Development ...
2.2.2 Examples of Press Configurations ............. 2.2.3 Gravure Printing in the Packaging Industry
2.2.3.1 Further Development Potential .............
2.2.3.2 Examples of Presses .......................... 2.3 Letterpress Printing .................................
2.2.3.3 Further Development Potential ............. 2.3.1 Process ............................................
2.2.4 Gravure Printing (Process and Applications)
2.2.4.1 Process ........................................ 2.3.2 Flexography ........................................
2.2.4.2 Letterpress Printing (Process and Applications)
2.2.4.3 Flexography ......................................
2.2.4.4 Printing Unit .....................................
2.2.4.5 Further Development Potential .............
2.4 Screen Printing ...........................................
2.4.1 Process ............................................
2.4.1.1 Platemaking ....................................
2.4.1.2 Printing Process ............................... 2.4.2 Applications .....................................
2.4.2.1 Screen Printing on Flat Surfaces ...........
2.4.2.2 Screen Printing on Curved Surfaces ...
### Table of Contents

#### 2.4.3 Examples of Machinery
- 2.4.3.1 Equipment and Machinery for Flat-bed Screen Printing
- 2.4.3.2 Screen Printing Machinery for Printing on Curved Surfaces
- 2.4.3.3 Rotary Screen Printing Presses
- 2.4.4 Further Development Potential

#### 2.5 Special Printing and Product Specific Applications
- 2.5.1 Security Printing
- 2.5.1.1 Bank Notes
- 2.5.1.2 Postage Stamps, Stamps
- 2.5.1.3 Documents
- 2.5.2 Business Form Printing
- 2.5.3 Label Printing
- 2.5.4 Pad Transfer Printing
- 2.5.4.1 Printing Process
- 2.5.4.2 Cliché Making
- 2.5.4.3 Pad, Ink, Substrate Fixture
- 2.5.4.4 Multicolor Printing, Applications

#### 3 Prepress

##### 3.1 Conventional Prepress
- 3.1.1 Word Processing, Typesetting
- 3.1.1.1 Typesetting Procedure
- 3.1.1.2 Manuscript
- 3.1.1.3 Text Input
- 3.1.1.4 Word Processing and Composition
- 3.1.2 Text Output for the Production of Film/Plate
- 3.1.2.1 Designs of Output Devices
- 3.1.2.2 Requirements on Films
- 3.1.3 Photomechanical Image Processing/Reproduction
- 3.1.3.1 Use and Importance of Analog Reproduction
- 3.1.3.2 Principles, Tasks of Photomechanical Reproduction
- 3.1.3.3 Materials
- 3.1.3.4 Machines and Devices Used in Reproduction Technology
- 3.1.3.5 Production of Film Copy for Single-Color Printing
- 3.1.3.6 Production of Film Copy for Multicolor Printing
- 3.1.4 Electronic Reproduction Technology (Repro Scanner)
- 3.1.5 Assembly
- 3.1.5.1 Page Make-Up
- 3.1.5.2 Sheet Assembly
- 3.1.6 Proofs/Test Print
- 3.1.7 Platemaking and Quality Control
- 3.1.7.1 General
- 3.1.7.2 Offset Printing
- 3.1.7.3 Letterpress Printing, Flexography

##### 3.1.7.4 Gravure Printing
- 3.1.7.5 Screen Printing
- 3.1.8 Color Management
- 3.1.8.1 Processes for the Correction of Tone and Color Values
- 3.1.8.2 Offset-Gravure Conversion

##### 3.2 Digital Prepress
- 3.2.1 Structure of Digital Printing Products
- 3.2.1.1 Technological Capabilities and Workflows
- 3.2.1.2 Digital Description of the Printed Page
- 3.2.1.3 Digital Screening Processes
- 3.2.2 Quality Requirements
- 3.2.2.1 Input and Output Resolution
- 3.2.2.2 Transferable Tonal Range
- 3.2.2.3 Dot Shape
- 3.2.2.4 Tonal Value Influences in Printing
- 3.2.2.5 Color Management Profiles
- 3.2.2.6 Image-Dependent Effects and Corrections
- 3.2.3 Digital Photography
- 3.2.3.1 Origins of Digital Photography
- 3.2.3.2 Image Scanning with Digital Cameras
- 3.2.3.3 Demands on the Resolution
- 3.2.3.4 Special Features of Digital Cameras
- 3.2.3.5 Digital Photography and Color Management
- 3.2.4 Digitizing Originals (Scanner)
- 3.2.4.1 Scanner Designs and Models
- 3.2.4.2 Drum Scanners
- 3.2.4.3 Flat-Bed Scanners
- 3.2.4.4 Digitizing and Redigitizing
- 3.2.5 Sheet Assembly and Imposition
- 3.2.5.1 Page Make-up and Sheet Assembly
- 3.2.5.2 Full-Sheet Output
- 3.2.5.3 Imposition through Software
- 3.2.5.4 Imposition Workflows
- 3.2.6 Raster Image Processor (RIP)
- 3.2.7 Storage Media
- 3.2.8 Networks
- 3.2.8.1 Network Concepts and Components
- 3.2.8.2 Working with Networks
- 3.2.9 Data Formats
- 3.2.10 Color Management
- 3.2.10.1 The Image Reproduction Process Using Color Management
- 3.2.10.2 Production of Color Profiles
- 3.2.10.3 Structure of Color Profiles
- 3.2.10.4 Connection of Color Profiles
- 3.2.10.5 Rendering Intent
- 3.2.10.6 Color Management and the Production of Proofs
- 3.2.10.7 Color Management for Images on the Internet
- 3.2.10.8 Color Management and Standardization

Table of Contents

8 Material and Data Flow

8.1 Material Conveyance Logistics

8.1.1 Logistics around the Press

8.1.2 The Supply of Printing Plates

8.1.3 Paper Reel Logistics

8.1.4 Ink, Dampening Solution, and Air Supply

8.1.5 Waste Disposal

8.1.6 Paper Pile Logistics for Sheet-fed Offset Presses

8.1.7 Logistics in Printing Companies

8.1.8 Procurement Logistics in Printing Companies

8.1.9 Inventory Management in Printing Companies

8.1.10 Production Logistics in Printing Companies

8.1.11 Logistics in Publishing Houses

8.2 Networking and Data Flow in Print Production

8.2.1 Network Concepts and Interfaces

8.2.2 Digital Workflow

8.2.3 Digital Workflow: Advantages, Challenges, and Possibilities

8.2.4 CIP3 for the Computer-Integrated Manufacturing (CIM) of Printed Products

8.2.5 Production Management Monitoring Systems

9 Production Strategies for Print Media

9.1 Production Concepts

9.1.1 Strategic Orientation of Printing Companies

9.1.2 Centralized and Distributed Production

9.1.3 Centralized Production at One Site

9.1.4 Distributed Production at Several Sites

9.1.5 Integrated Production, Interlinking of Systems

9.1.6 Print on Demand

9.1.7 Personalization

9.2 Production Systems

10 Comparison of Printing and Production Technologies for Print Media

10.1 Introduction

10.2 Overview of Methods and Technologies for the Production of Print Media

10.3 Production Methods and Strategies

10.4 Criteria for the Selection of Printing Technologies and Production Methods

10.5 Performance Criteria of Printing Systems and Trends in Print Media Production

11 Electronic Media and Multimedia

11.1 Media Concepts

11.2 Data Types, Data Structures and their Applications

11.3 Data Carriers

11.4 Networks

11.5 Data Compression

11.6 Quality and Productivity/Run Length

11.7 Productivity

11.8 Production Costs per Print Page

11.9 Trends in Print Media Production

11.10 Document

11.11 Hard Disk Storage Units

11.12 Rewritable Removable Storage Units

11.13 CD-ROM and DVD-ROM

11.14 Magnetic Tapes

11.15 Internet

11.16 Intranet, Extranet

11.17 Broad Band Networks

11.18 Compressed Data Archives

11.19 Compression Processes for Image Data Files

11.20 Compression Processes for Audio

11.21 Compression Processes for Video
Table of Contents

11.6 Output Devices for Electronic Media and Multimedia
   11.6.1 Screen Output
   11.6.2 Projection Equipment
   11.6.3 Stereo Output
   11.6.4 Projection directly to the Eyes

11.7 Multimedia Applications

12 Print Media and Electronic Media
   12.1 Examples of Print Media and Electronic Media
       12.1.1 History of Technology (Press and Prepress)
       12.1.2 Offset Printing and Offset Printing Presses
       12.1.3 Gravure Printing and Gravure Printing Presses
       12.1.4 Letterpress Printing and Letterpress Printing Presses
       12.1.5 The Historical Relationship of the Printing Press Manufacturers
       12.1.6 Prepress
       12.1.7 Education and Qualifications (Career Profiles, Courses)
           12.1.7.1 The Printing Industry as an Employer
           12.1.7.2 Educational Requirements and Options
           12.1.7.3 Vocational Training
           12.1.7.4 Course of Study
           12.1.7.5 Scholarships for International Study Programs
           12.1.7.6 Heidelberg Print Media Academy
           12.1.7.7 Science and Research (selected Examples)
           12.1.7.8 Subjects, Methods and Cooperations
           12.1.7.9 Inking Units
           12.1.7.10 Printing Units
           12.1.7.11 Sheet Transfer
           12.1.7.12 Joint Industrial Research

12.2 Market Shares and Trends

13 Special Topics
   13.1 History, Education, Research
       13.1.1 History of Technology (Press and Prepress)
       13.1.2 Offset Printing and Offset Printing Presses
       13.1.3 Gravure Printing and Gravure Printing Presses
       13.1.4 Letterpress Printing and Letterpress Printing Presses
       13.1.5 The Historical Relationship of the Printing Press Manufacturers
       13.1.6 Prepress
       13.1.7 Education and Qualifications (Career Profiles, Courses)
           13.1.7.1 The Printing Industry as an Employer
           13.1.7.2 Educational Requirements and Options
           13.1.7.3 Vocational Training
           13.1.7.4 Course of Study
           13.1.7.5 Scholarships for International Study Programs
           13.1.7.6 Heidelberg Print Media Academy
           13.1.7.7 Science and Research (selected Examples)
           13.1.7.8 Subjects, Methods and Cooperations
           13.1.7.9 Inking Units
           13.1.7.10 Printing Units
           13.1.7.11 Sheet Transfer
           13.1.7.12 Joint Industrial Research

13.2 Environment, Safety, Standardization
   13.2.1 Environmental Protection in the Printing Industry
       13.2.1.1 Introduction
       13.2.1.2 Environmental Protection in Offset Printing
       13.2.1.3 Environmental Protection in Gravure Printing
       13.2.1.4 Environmental Protection in Letterpress and Flexographic Printing
       13.2.1.5 Environmental Protection in Screen Printing
       13.2.1.6 Environment-oriented Business Management
       13.2.1.7 Legal Foundations
       13.2.1.8 Support and Advice for Environment-relevant Measures
       13.2.2 Safety Resources
       13.2.2.1 Health and Safety
       13.2.2.2 International and European Directives (Laws) and Standards
       13.2.2.3 Safety-conscious Design
       13.2.2.4 Requirements for Separating Protective Devices
       13.2.2.5 Hazard Evaluation, Risk Assessment
       13.2.2.6 CE Mark and GS Label
       13.2.2.7 Intended Use
       13.2.3 Industry Standards, Codes of Practice and National/International Standards

13.3 Markets and Development Trends for Print Media
   13.3.1 Newspaper Market
   13.3.2 Magazine Market
   13.3.3 Book Market
   13.3.4 Catalogue Market
   13.3.5 Advertising Printing Market
   13.3.6 Packaging Market
   13.3.7 SOHO Market

14 Appendix
   14.1 Explanation of Specific Terms
       14.1.1 Glossary
       14.1.2 Abbreviations and their Meaning
       14.1.3 Abbreviations of Source Data

14.2 Physical-Technical Quantities and Conversions
   14.2.1 Quantities and Units in the SI-System (Selection)
   14.2.2 Conversion between the SI-System and the Imperial System (Metric/Imperial)

14.3 Bibliography
   14.3.1 Bibliographical References to Readings on the Chapters and sections in this Handbook
