### Table of Contents

**Part I: Design of Business Processes**

- Techniques for Modeling Workflows and Their Support of Reuse ................................................. 1  
  Gerrit K. Janssens, Jan Verelst, Bart Weyn
- Modeling Processes and Workflows by Business Rules................................................................. 16  
  Gerhard Knolmayer, Rainer Endl, Marcel Pfahrer
- Guidelines of Business Process Modeling ....................................................................................... 30  
  Jörg Becker, Michael Rosemann, Christoph von Uthmann
- A Knowledge-Based Approach for Designing Robust Business Processes.............................. 50  
  Chrysanthos Dellarocas, Mark Klein
- The "Organized Activity" Foundation for Business Processes and Their Management ................................................................. 66  
  Anatol W. Holt
- Evaluation of Generic Process Design Patterns: An Experimental Study ............................... 83  
  Michael Zapf, Armin Heinzl
- Management-Oriented Models of Business Processes ................................................................................. 99  
  Anastasia Pagnoni Holt

**Part II: Formalisms and Analysis**

- Validation of Process Models by Construction of Process Nets ............................................... 110  
  Jörg Desel
- Modeling, Simulation and Analysis of Business Processes ......................................................... 129  
  Jörg Desel, Thomas Erwin
- Using Formal Analysis Techniques in Business Process Redesign ........................................ 142  
  Kees M. van Hee, Hajo A. Reijers
- Workflow Verification: Finding Control-Flow Errors
- Using Petri-Net-Based Techniques ................................................................................................. 161  
  Wil M.P. van der Aalst
- Compositional Modeling and Verification of Workflow Processes ........................................ 184  
  Marc Voorhoeve
A Workflow Change Is a Workflow ................................................................. 201
  Clarence A. Ellis, Karim Keddara
Improving Flexibility of Workflow Management Systems ....................... 218
  Alessandra Agostini, Giorgio De Michelis
Inter-operability of Workflow Applications:
Local Criteria for Global Soundness......................................................... 235
  Ekkart Kindler, Axel Martens, Wolfgang Reisig
Object Oriented Petri Nets in Business Process Modeling ....................... 254
  Daniel Moldt, Rüdiger Valk

Part III: Systems and Applications
Information Gathering and Process Modeling in a Petri Net Based Approach...... 274
  Wolfgang Deiters
Why Modellers Wreck Workflow Innovations.......................................... 289
  Stef M.M. Joosten
The Effects of Workflow Systems on Organizations: A Qualitative Study ....... 301
  Peter Kueng
On the Practical Relevance of an Integrated Workflow Management System
- Results of an Empirical Study ................................................................. 317
  Martin Meyer
Configurable Business Objects for Building Evolving
Enterprise Models and Applications ......................................................... 328
  Mike P. Papazoglou, Willem-Jan van den Heuvel
Workflow Management Between Formal Theory and Pragmatic Approaches...... 345
  Stefan Jablonski
Documentary Petri Nets: A Modeling Representation
for Electronic Trade Procedures .............................................................. 359
  Ronald M. Lee
ARIS Architecture and Reference Models for Business Process Management ..... 376
  August-Wilhelm Scheer, Markus Nüttgens

Author Index ............................................................................................ 391
Business Process Management
Models, Techniques, and Empirical Studies
Aalst, W. van der; Desel, J.; Oberweis, A. (Eds.)
2000, VIII, 396 p., Softcover
ISBN: 978-3-540-67454-2
