Contents

Laudatio on Professor Wolfgang J.R. Hoefer ................................. ix
Peter Russer

In Search of the Intangible – 43 Years of Research in Electromagnetics  . 1
Wolfgang J.R. Hoefer

Full-Wave Simulation of Integrated Circuit Packages on a Parallel
Architecture ................................................................. 19
Erion Gjonaj, Andreas Barchanski, Peter Thoma and Thomas Weiland

Recent Progress in Unifying the Time- and Frequency-Domain Methods . 31
Zhizhang (David) Chen and Michel M. Ney

Time-Domain Neural Network Approaches to EM Modeling of
Microwave Components ................................................... 41
Qi-Jun Zhang and Yi Cao

Modeling of Curved Boundaries in the Finite-Difference Time-Domain
Method using a Lagrangian Approach ................................. 55
Johannes A. Russer, Prasad S. Sumant and Andreas C. Cangellaris

Computing the Transmission Line Parameters of an On-chip
Multiconductor Digital Bus .............................................. 69
Hristomir Yordanov and Peter Russer

Two Decades of SCN Modelling and Beyond .......................... 79
Dr. Poman So, P. Eng.

Calculation of Instantaneous Power and Energy Quantities in TLM
Simulations ................................................................. 91
John Paul, Christos Christopoulos, and David W. P. Thomas

xiii
The Combined Schrödinger-Maxwell Problem in the Electronic/Electromagnetic Characterization of Nanodevices ....... 105
Luca Pierantoni, Davide Mencarelli and Tullio Rozzi

Recent Advances in the Combination of the Unscented Transform (UT) with the Transmission Line Modeling Method (TLM) ................. 135
Leonardo R.A.X de Menezes, Ajibola Ajayi, Christos Christopoulos, Phillip Sewell and Geovany A. Borges

Bandwidth Optimization using Transmission Line Matrix Modeling and System Identification ..................................................... 147
Nikolaus Fichtner, Uwe Siart, Yury Kuznetsov, Andrey Baev and Peter Russer

Study of Single and Dual Band Wearable Metallic Button Antennas for Personal Area Networks (PANs) ........................................ 173
Benito Sanz-Izquierdo, Fengxi Huang, John C. Batchelor and Mohammed I. Sobhy

Fast and Efficient Methods for Circuit-based Automotive EMC Simulation ................................................................. 189
Martin L. Zitzmann and Robert Weigel

Equivalent Circuit (EC) FDTD Method for Dispersive Materials: Derivation, Stability Criteria and Application Examples ............... 211
A. Rennings, A. Lauer, C. Caloz and I. Wolff

A 3D Isotropic Left-Handed Metamaterial Based on the Rotated TLM Scheme ............................................................. 239
M. Zedler, C. Caloz and P. Russer

Connection Subnetworks for the Transmission Line Matrix (TLM) Method ................................................................. 263
Petr Lorenz and Peter Russer

RFID ....................................................................................... 283
Li Yang, Amin Rida, Anya Traitle and Manos M. Tentzeris

Numerical Modeling of Car Antennas ........................................ 303
Stefan Lindenmeier and Joachim Brose

Time-Domain Modelling of Group-Delay and Amplitude Characteristics in Ultra-Wideband Printed-Circuit Antennas ............... 321
Hung-Jui Lam, Yining Lu, Huilian Du, Poman P.M. So and Jens Bornemann

On the Modeling of Ultra Wide Band (UWB) Radiating Structures .... 333
Bruno Biscontini, Uwe Siart and Peter Russer
An Efficient Electromagnetically Optimized Design and Realization of Pseudo-Elliptic All-Metal Cavities Filters ........................... 345
Dr. Savvas Kosmopoulos and Nikolaos Sidiropoulos

Simulation of Coplanar Devices Accessing Nano Systems .............. 361
F. Peretti, G. Csaba and P. Lugli

Time-Domain Measurements of Electromagnetic Interference .......... 375
Stephan Braun, Arnd Frech and Peter Russer

Space Mapping Optimization and Modeling of Microwave Devices with MEFiSTo ................................................................. 393
Slawomir Koziel and John W. Bandler

Index ................................................................. 409
Time Domain Methods in Electrodynamics
A Tribute to Wolfgang J. R. Hoefer
Russer, P.; Siart, U. (Eds.)
2008, XXI, 417 p., Hardcover
ISBN: 978-3-540-68766-5
