
Contents

1	Introduction	1
2	Ring Resonators: Theory and Modeling	3
2.1	Single Ring Resonators	3
2.1.1	Ring Structure	3
2.1.2	Racetrack-Shaped Resonators	16
2.2	Double Ring Resonators	17
2.2.1	Serially Coupled Double Ring Resonator	18
2.2.2	Parallel Coupled Double Ring Resonator	21
2.3	Multiple Coupled Resonators	25
2.3.1	Serially Coupled Ring Resonators	26
2.3.2	Parallel Coupled Ring Resonators	34
3	Materials, Fabrication, and Characterization Methods	41
3.1	Wafer Bonding	42
3.1.1	Bonding with Intermediate Layer	42
3.1.2	Bonding Without Intermediate Layer	43
3.1.3	Benzocyclobutene Wafer Bonding	44
3.2	Dry Etching	46
3.3	Si-Based Materials	47
3.3.1	Ring Resonators Based on Si-SiO ₂	47
3.3.2	Ring Resonators Based on Ta ₂ O ₅ -SiO ₂	52
3.3.3	Ring Resonators Based on SiN, SiON, and Si ₃ N ₄	54
3.3.4	Ring Resonators Based on SiO ₂ -GeO ₂	57
3.4	III-V Materials	57
3.4.1	The Quaternary Semiconductor Compound GaInAsP	57
3.4.2	The Semiconductor Compound AlGaAs	59
3.4.3	Lateral Coupling in GaInAsP/InP	60
3.4.4	Vertical Coupling in GaInAsP/InP	67

3.4.5	Lateral Coupling in AlGaAs/GaAs	71
3.4.6	Vertical Coupling in AlGaAs/GaAs	73
3.4.7	Implementation of Gain in Ring Resonators	74
3.5	Polymers	83
3.5.1	Conventional Fabrication Techniques	83
3.5.2	Replication and Nanoimprinting	89
3.6	Temperature Insensitivity	94
3.7	Polarization Independence	96
3.8	Characterization Methods	99
3.8.1	Conventional Characterization	100
3.8.2	Optical Low Coherence Reflectometry	103
3.8.3	Evanescent Field Measurement Methods	106
4	Building Blocks of Ring Resonator Devices	111
4.1	Couplers	112
4.1.1	Directional Couplers	112
4.1.2	Multimode Interference Couplers	114
4.1.3	Y-Couplers	116
4.2	Bends	118
4.3	Spot Size Converters for Light In- and Outcoupling	123
5	Devices	125
5.1	Filters	126
5.1.1	Passive Devices	126
5.1.2	Devices with Gain Section	143
5.2	Tunability Methods	150
5.2.1	Wavelength Tuning	151
5.2.2	Center Wavelength Trimming	159
5.2.3	Tunable Couplers in Ring Resonators	164
5.3	Dispersion Compensators	165
5.4	Mach-Zehnder Interferometers Combined with Ring Resonators	169
5.5	Modulators	173
5.6	Lasers	178
5.6.1	All Active Lasers	179
5.6.2	Devices with Gain Section	187
5.6.3	Passive Ring Resonator Coupled Lasers	191
5.7	Wavelength Converters	197
5.8	Optical Signal Processing	202
5.8.1	Logic Gates	203
5.8.2	Switching	206
5.9	Sensors	209

6	Whispering Gallery Mode Devices	215
6.1	Whispering Gallery Modes	215
6.2	WGM Filters	216
6.3	WGM Lasers	219
7	Outlook	231
	References	233
	Index	255

Integrated Ring Resonators

The Compendium

Rabus, D.G.

2007, XVI, 258 p. 243 illus., Hardcover

ISBN: 978-3-540-68786-3
