Introduction ............................................................................. 1

Part I Description and Properties of Multipliers

1 Trace Inequalities for Functions in Sobolev Spaces ......... 7
  1.1 Trace Inequalities for Functions in $w_1^m$ and $W_1^m$ ........ 7
  1.1.1 The Case $m = 1$ ................................................ 7
  1.1.2 The Case $m \geq 1$ ............................................. 12
  1.2 Trace Inequalities for Functions in $w_p^m$ and $W_p^m$, $p > 1$ .... 14
    1.2.1 Preliminaries .................................................. 14
    1.2.2 The $(p,m)$-Capacity ....................................... 16
    1.2.3 Estimate for the Integral of Capacity of a Set Bounded
          by a Level Surface ............................................. 19
    1.2.4 Estimates for Constants in Trace Inequalities .......... 22
    1.2.5 Other Criteria for the Trace Inequality (1.2.29)
          with $p > 1$ ...................................................... 25
    1.2.6 The Fefferman and Phong Sufficient Condition ...... 28
  1.3 Estimate for the $L_q$-Norm with respect to an Arbitrary
          Measure .................................................................. 29
    1.3.1 The case $1 \leq p < q$ ...................................... 30
    1.3.2 The case $q < p \leq n/m$ .................................... 30

2 Multipliers in Pairs of Sobolev Spaces ....................... 33
  2.1 Introduction ............................................................. 33
  2.2 Characterization of the Space $M(W_1^m \to W_1^l)$ ............ 35
  2.3 Characterization of the Space $M(W_p^m \to W_p^l)$ for $p > 1$ .... 38
    2.3.1 Another Characterization of the Space $M(W_p^m \to W_p^l)$
          for $0 < l < m$, $pm \leq n$, $p > 1$ .......................... 43
    2.3.2 Characterization of the Space $M(W_p^m \to W_p^l)$
          for $pm > n$, $p > 1$ ......................................... 47
2.3.3 One-Sided Estimates for Norms of Multipliers in the Case $pm \leq n$ ........................................ 48
2.3.4 Examples of Multipliers ........................................ 49
2.4 The Space $M(W^m_p(\mathbb{R}_+^n) \rightarrow W^q_l(\mathbb{R}_+^n))$ ........................................ 50
2.4.1 Extension from a Half-Space ........................................ 50
2.4.2 The Case $p > 1$ ........................................ 51
2.4.3 The Case $p = 1$ ........................................ 53
2.5 The Space $M(W^m_p \rightarrow W^q_l)$ ........................................ 54
2.7 Certain Properties of Multipliers ........................................ 58
2.8 The Space $M(w^m_p \rightarrow w^l_p)$ ........................................ 60
2.9 Multipliers in Spaces of Functions with Bounded Variation .......... 63
2.9.1 The Spaces $M_{bv}$ and $MBV$ ........................................ 66

3 Multipliers in Pairs of Potential Spaces ........................................ 69
3.1 Trace Inequality for Bessel and Riesz Potential Spaces ............... 69
3.1.1 Properties of Bessel Potential Spaces ........................................ 70
3.1.2 Properties of the $(p, m)$-Capacity ........................................ 71
3.1.3 Main Result ........................................ 73
3.2 Description of $M(H^m_p \rightarrow H^l_p)$ ........................................ 75
3.2.1 Auxiliary Assertions ........................................ 75
3.2.2 Imbedding of $M(H^m_p \rightarrow H^l_p)$ into $M(H^{m-1}_p \rightarrow L_p)$ ........................................ 76
3.2.3 Estimates for Derivatives of a Multiplier ........................................ 78
3.2.4 Multiplicative Inequality for the Strichartz Function ............... 79
3.2.5 Auxiliary Properties of the Bessel Kernel $G_l$ ........................................ 80
3.2.6 Upper Bound for the Norm of a Multiplier ........................................ 81
3.2.7 Lower Bound for the Norm of a Multiplier ........................................ 85
3.2.8 Description of the Space $M(H^m_p \rightarrow H^l_p)$ ........................................ 86
3.2.9 Equivalent Norm in $M(H^m_p \rightarrow H^l_p)$ Involving the Norm in $L^{mp/(m-1)}$ ........................................ 87
3.2.10 Characterization of $M(H^m_p \rightarrow H^l_p)$, $m > l$, Involving the Norm in $L_{1, \text{unit}}$ ........................................ 89
3.2.11 The Space $M(H^m_p \rightarrow H^l_p)$ for $mp > n$ ........................................ 95
3.3 One-Sided Estimates for the Norm in $M(H^m_p \rightarrow H^l_p)$ .... 95
3.3.1 Lower Estimate for the Norm in $M(H^m_p \rightarrow H^l_p)$ Involving Morrey Type Norms ........................................ 96
3.3.2 Upper Estimate for the Norm in $M(H^m_p \rightarrow H^l_p)$ Involving Marcinkiewicz Type Norms ........................................ 96
3.3.3 Upper Estimates for the Norm in $M(H^m_p \rightarrow H^l_p)$ Involving Norms in $H^{l/m}_{n/l}$ ........................................ 98
3.4 Upper Estimates for the Norm in $M(H^m_p \rightarrow H^l_p)$ by Norms in Besov Spaces ........................................ 99
3.4.1 Auxiliary Assertions ........................................ 99
3.4.2 Properties of the Space $B^p_{q, \infty}$ ........................................ 103
3.4.3 Estimates for the Norm in $M(H^m_p \to H^l_p)$
by the Norm in $B^\mu_{q,\infty}$ ........................................ 108
3.4.4 Estimate for the Norm of a Multiplier in $MH^l_p(\mathbb{R}^d)$
by the $q$-Variation ................................................... 110
3.5 Miscellaneous Properties of Multipliers in $M(H^m_p \to H^l_p)$ ......... 111
3.6 Spectrum of Multipliers in $H^l_p$ and $H^{-l}_p$ ......................... 115
3.6.1 Preliminary Information ........................................ 115
3.6.2 Facts from Nonlinear Potential Theory .......................... 117
3.6.3 Main Theorem .................................................... 118
3.6.4 Proof of Theorem 3.6.1 .......................................... 120
3.7 The Space $M(h^m_p \to h^l_p)$ ..................................... 122
3.8 Positive Homogeneous Multipliers .................................... 125
3.8.1 The Space $M(H^m_p(\partial B_1) \to H^l_p(\partial B_1))$ .................. 125
3.8.2 Other Normalizations of the Spaces $h^m_p$ and $H^m_p$ .......... 127
3.8.3 Positive Homogeneous Elements of the Spaces
$M(h^m_p \to h^l_p)$ and $M(H^m_p \to H^l_p)$ ...................... 130

4 The Space $M(B^m_p \to B^l_p)$ with $p > 1$ ............................... 133
4.1 Introduction .......................................................... 133
4.2 Properties of Besov Spaces ......................................... 134
4.2.1 Survey of Known Results ...................................... 134
4.2.2 Properties of the Operators $\mathcal{D}_{p,l}$ and $D_{p,l}$ .............. 136
4.2.3 Pointwise Estimate for Bessel Potentials ....................... 138
4.3 Proof of Theorem 4.1.1 ............................................. 141
4.3.1 Estimate for the Product of First Differences .................... 141
4.3.2 Trace Inequality for $B^k_p$, $p > 1$ .......................... 143
4.3.3 Auxiliary Assertions Concerning $M(B^m_p \to B^l_p)$ ............ 145
4.3.4 Lower Estimates for the Norm in $M(B^m_p \to B^l_p)$ ........... 146
4.3.5 Proof of Necessity in Theorem 4.1.1 .......................... 149
4.3.6 Proof of Sufficiency in Theorem 4.1.1 ........................ 155
4.3.7 The Case $mp > n$ .............................................. 164
4.3.8 Lower and Upper Estimates for the Norm in $M(B^m_p \to B^l_p)$ .................................................. 165
4.4 Sufficient Conditions for Inclusion into $M(W^m_p \to W^l_p)$
with Noninteger $m$ and $l$ ............................................ 166
4.4.1 Conditions Involving the Space $B^m_q$ ......................... 166
4.4.2 Conditions Involving the Fourier Transform ................... 168
4.4.3 Conditions Involving the Space $B^m_q$ ......................... 170
4.5 Conditions Involving the Space $H^l_{n/m}$ .......................... 173
4.6 Composition Operator on $M(W^m_p \to W^l_p)$ ...................... 174

7.2.6 Estimates of the Essential Norm for $mp > n$, $p > 1$
and for $p = 1$ ........................................... 263
7.2.7 One-Sided Estimates for the Essential Norm .......... 266
7.2.8 The Space of Compact Multipliers .................... 267
7.3 Two-Sided Estimates for the Essential Norm
in the Case $m = l$ ........................................ 270
7.3.1 Estimate for the Maximum Modulus of a Multiplier
in $W^l_p$ by its Essential Norm .......................... 270
7.3.2 Estimates for the Essential Norm Involving Cutoff
Functions (The Case $lp \leq n$, $p > 1$) ..................... 272
7.3.3 Estimates for the Essential Norm Involving Capacity
(The Case $lp \leq n$, $p > 1$) .............................. 277
7.3.4 Two-Sided Estimates for the Essential Norm
in the Cases $lp > n$, $p > 1$, and $p = 1$ ................ 278
7.3.5 Essential Norm in $\mathcal{M}(W^l_p)$ .................... 281

8 Traces and Extensions of Multipliers ........................ 285
8.1 Introduction .............................................. 285
8.2 Multipliers in Pairs of Weighted Sobolev Spaces in $\mathbb{R}^n$...... 285
8.3 Characterization of $M(W^{l,p}_{p,\beta} \to W^{s,\alpha}_p)$ ............ 288
8.4 Auxiliary Estimates for an Extension Operator .......... 292
8.4.1 Pointwise Estimates for $\nabla T\gamma$ and $\nabla T\gamma$ .......... 292
8.4.2 Weighted $L^p$-Estimates for $T\gamma$ and $\nabla T\gamma$ ............... 294
8.5 Trace Theorem for the Space $M(W^{l,p}_{p,\beta} \to W^{s,\alpha}_p)$ ........ 297
8.5.1 The Case $l < 1$ ....................................... 298
8.5.2 The Case $l > 1$ ....................................... 301
8.5.3 Proof of Theorem 8.5.1 for $l > 1$ ......................... 303
8.6 Traces of Multipliers on the Smooth Boundary of a Domain ....... 304
8.7 $\mathcal{M}(W^l_p(\mathbb{R}^n))$ as the Space of Traces of Multipliers in the
Weighted Sobolev Space $W^{l,p}_{p,\beta}((\mathbb{R}^n)^{m})$ ........... 305
8.7.1 Preliminaries ........................................... 305
8.7.2 A Property of Extension Operator ..................... 306
8.7.3 Trace and Extension Theorem for Multipliers ............. 308
8.7.4 Extension of Multipliers from $\mathbb{R}^n$ to $\mathbb{R}^{n+1}_{+}$ ........... 311
8.7.5 Application to the First Boundary Value Problem
in a Half-Space ............................................ 311
8.8 Traces of Functions in $\mathcal{M}(W^l_p(\mathbb{R}^{n+m}))$ on $\mathbb{R}^n$ ........ 312
8.8.1 Auxiliary Assertions ................................... 313
8.8.2 Trace and Extension Theorem .......................... 315
8.9 Multipliers in the Space of Bessel Potentials as Traces
of Multipliers ............................................. 319
8.9.1 Bessel Potentials as Traces ............................ 319
8.9.2 An Auxiliary Estimate for the Extension Operator $T$ ...... 320
8.9.3 $\mathcal{M}(H^l_p)$ as a Space of Traces ....................... 322
9 Sobolev Multipliers in a Domain, Multiplier Mappings and Manifolds ............................................. 325
  9.1 Multipliers in a Special Lipschitz Domain .................. 326
     9.1.1 Special Lipschitz Domains .......................... 326
     9.1.2 Auxiliary Assertions ................................. 326
     9.1.3 Description of the Space of Multipliers ............... 329
  9.2 Extension of Multipliers to the Complement of a Special
     Lipschitz Domain .......................................... 332
  9.3 Multipliers in a Bounded Domain .................. 336
     9.3.1 Domains with Boundary in the Class \( C^{0,1} \) .......... 336
     9.3.2 Auxiliary Assertions ................................. 337
     9.3.3 Description of Spaces of Multipliers in a Bounded
           Domain with Boundary in the Class \( C^{0,1} \) .......... 339
     9.3.4 Essential Norm and Compact Multipliers
           in a Bounded Lipschitz Domain .......................... 340
     9.3.5 The Space \( ML_{1,p}^{1}(\Omega) \) for an Arbitrary
           Bounded Domain ......................................... 346
  9.4 Change of Variables in Norms of Sobolev Spaces ......... 350
     9.4.1 \((p, l)\)-Diffeomorphisms ............................. 350
     9.4.2 More on \((p, l)\)-Diffeomorphisms ...................... 352
     9.4.3 A Particular \((p, l)\)-Diffeomorphism ................... 353
     9.4.4 \((p, l)\)-Manifolds .................................... 356
     9.4.5 Mappings \( T_{m,l}^{p} \) of One Sobolev Space into
           Another ...................................................... 357
  9.5 Implicit Function Theorems ................................ 364
  9.6 The Space \( M(W^{m}_{p}(\Omega) \rightarrow W^{l}_{p}(\Omega)) \) ........ 367
     9.6.1 Auxiliary Results ...................................... 367
     9.6.2 Description of the Space \( M(W^{m}_{p}(\Omega) \rightarrow W^{l}_{p}(\Omega)) \) .... 369

Part II Applications of Multipliers to Differential and Integral
Operators

10 Differential Operators in Pairs of Sobolev Spaces .......... 373
  10.1 The Norm of a Differential Operator: \( W^{h}_{p} \rightarrow W^{h-k}_{p} \) .... 373
     10.1.1 Coefficients of Operators Mapping \( W^{h}_{p} \) into
           \( W^{h-k}_{p} \) as Multipliers ............................... 374
     10.1.2 A Counterexample ..................................... 378
     10.1.3 Operators with Coefficients Independent
           of Some Variables .......................................... 379
     10.1.4 Differential Operators on a Domain .................. 382
  10.2 Essential Norm of a Differential Operator ................ 384
  10.3 Fredholm Property of the Schrödinger Operator .......... 386
  10.4 Domination of Differential Operators in \( \mathbb{R}^{n} \) .......... 387
11 Schrödinger Operator and $M(w^1_2 \to w^{-1}_2)$ ......................... 391
  11.1 Introduction ......................................................... 391
  11.2 Characterization of $M(w^1_2 \to w^{-1}_2)$ and the Schrödinger
      Operator on $w^1_2$ .................................................. 393
  11.3 A Compactness Criterion ............................................. 407
  11.4 Characterization of $M(W^{1/2}_2 \to W^{-1/2}_2)$ .................. 411
  11.5 Characterization of the Space $M(w^1_2(\Omega) \to w^{-1}_2(\Omega))$ .... 416
  11.6 Second-Order Differential Operators Acting from $w^1_2$ to $w^{-1}_2$ .. 421

12 Relativistic Schrödinger Operator
    and $M(W^{1/2}_2 \to W^{-1/2}_2)$ ..................................... 427
  12.1 Auxiliary Assertions .................................................. 427
      12.1.1 Main Result .................................................... 436
  12.2 Corollaries of the Form Boundedness Criterion and Related
      Results ............................................................... 441

13 Multipliers as Solutions to Elliptic Equations .................... 445
  13.1 The Dirichlet Problem for the Linear Second-Order Elliptic
      Equation in the Space of Multipliers ............................. 445
  13.2 Bounded Solutions of Linear Elliptic Equations
      as Multipliers .......................................................... 447
      13.2.1 Introduction .................................................... 447
      13.2.2 The Case $\beta > 1$ ......................................... 448
      13.2.3 The Case $\beta = 1$ .......................................... 452
      13.2.4 Solutions as Multipliers from $W^{1,w_1(\rho)}_2(\Omega)$ into
          $W^{1,1}_2(\Omega)$ . 454
  13.3 Solvability of Quasilinear Elliptic Equations in Spaces
      of Multipliers .......................................................... 456
      13.3.1 Scalar Equations in Divergence Form .......................... 457
      13.3.2 Systems in Divergence Form .................................... 458
      13.3.3 Dirichlet Problem for Quasilinear Equations
          in Divergence Form .............................................. 461
      13.3.4 Dirichlet Problem for Quasilinear Equations
          in Nondivergence Form .......................................... 463
  13.4 Coercive Estimates for Solutions of Elliptic equations
      in Spaces of Multipliers ............................................. 467
      13.4.1 The Case of Operators in $\mathbb{R}^n$ ......................... 467
      13.4.2 Boundary Value Problem in a Half-Space ...................... 469
      13.4.3 On the $L_{\infty}$-Norm in the Coercive Estimate .......... 473
  13.5 Smoothness of Solutions to Higher Order Elliptic Semilinear
      Systems ............................................................... 474
      13.5.1 Composition Operator in Classes of Multipliers .......... 474
      13.5.2 Improvement of Smoothness of Solutions to Elliptic
          Semilinear Systems ............................................. 477
14 Regularity of the Boundary in $L_p$-Theory of Elliptic Boundary Value Problems ................................................. 479
14.1 Description of Results ............................................. 479
14.2 Change of Variables in Differential Operators ................. 481
14.3 Fredholm Property of the Elliptic Boundary Value Problem . . 483
14.3.1 Boundaries in the Classes $M^{i-1/p}_p, W^{i-1/p}_p,$ and $M^{i-1/p}_p(\delta)$ ................................................. 483
14.3.2 A Priori $L_p$-Estimate for Solutions and Other Properties of the Elliptic Boundary Value Problem .... 484
14.4 Auxiliary Assertions ................................................ 489
14.4.1 Some Properties of the Operator $T$ .............................. 490
14.4.2 Properties of the Mappings $\lambda$ and $\kappa$ ...................... 491
14.4.3 Invariance of the Space $W^k_p \cap W^h_p$ Under a Change of Variables ......................................................... 492
14.4.4 The Space $W^{-k}_p$ for a Special Lipschitz Domain ........ 496
14.4.5 Auxiliary Assertions on Differential Operators in Divergence Form ......................................................... 498
14.5 Solvability of the Dirichlet Problem in $W^k_p(\Omega)$ .......... 502
14.5.1 Generalized Formulation of the Dirichlet Problem ......... 502
14.5.2 A Priori Estimate for Solutions of the Generalized Dirichlet Problem ......................................................... 502
14.5.3 Solvability of the Generalized Dirichlet Problem .......... 503
14.5.4 The Dirichlet Problem Formulated in Terms of Traces . . . 504
14.6 Necessity of Assumptions on the Domain ....................... 507
14.6.1 A Domain Whose Boundary is in $M^{3/2}_3 \cap C^1$ but does not Belong to $M^{3/2}_3(\delta)$ ................................. 507
14.6.2 Necessary Conditions for Solvability of the Dirichlet Problem ................................................................. 509
14.6.3 Boundaries of the Class $M^{i-1/p}_p(\delta)$ ........................ 510
14.7 Local Characterization of $M^{i-1/p}_p(\delta)$ ........................ 513
14.7.1 Estimates for a Cutoff Function .................................. 513
14.7.2 Description of $M^{i-1/p}_p(\delta)$ Involving a Cutoff Function ................................................................. 515
14.7.3 Estimate for $s_1$ .................................................... 516
14.7.4 Estimate for $s_2$ ..................................................... 520
14.7.5 Estimate for $s_3$ ..................................................... 523

15 Multipliers in the Classical Layer Potential Theory for Lipschitz Domains ......................................................... 531
15.1 Introduction ............................................................... 531
15.2 Solvability of Boundary Value Problems in Weighted Sobolev Spaces ......................................................... 537
15.2.1 $(p, k, \alpha)$-Diffeomorphisms ...................................... 537
15.2.2 Weak Solvability of the Dirichlet Problem ................. 539
15.2.3 Main Result ............................................................. 542
15.3 Continuity Properties of Boundary Integral Operators ........ 547
15.4 Proof of Theorems 15.1.1 and 15.1.2 ......................... 551
   15.4.1 Proof of Theorem 15.1.1 .......................... 551
   15.4.2 Proof of Theorem 15.1.2 .......................... 557
15.5 Properties of Surfaces in the Class $M_p^r(\delta)$ .......... 559
15.6 Sharpness of Conditions Imposed on $\partial \Omega$ .............. 562
   15.6.1 Necessity of the Inclusion $\partial \Omega \in W_p^r$ in Theorem 15.2.1 ......................... 562
   15.6.2 Sharpness of the Condition $\partial \Omega \in B_{\infty,p}^r$ ............... 563
   15.6.3 Sharpness of the Condition $\partial \Omega \in M_p^r(\delta)$ in Theorem 15.2.1 ......................... 564
   15.6.4 Sharpness of the Condition $\partial \Omega \in M_p^r(\delta)$ in Theorem 15.1.1 ......................... 566
15.7 Extension to Boundary Integral Equations of Elasticity ....... 568

16 Applications of Multipliers to the Theory of Integral Operators ................................................. 573
   16.1 Convolution Operator in Weighted $L_2$-Spaces .......... 573
   16.2 Calculus of Singular Integral Operators with Symbols in Spaces of Multipliers .............................. 575
   16.3 Continuity in Sobolev Spaces of Singular Integral Operators with Symbols Depending on $x$ ............... 579
      16.3.1 Function Spaces ................................. 580
      16.3.2 Description of the Space $M(H^{m,\mu} \rightarrow H^{1,\mu})$ ....... 582
      16.3.3 Main Result ................................. 585
      16.3.4 Corollaries ................................ 588

References ..................................................... 591

List of Symbols ............................................. 605

Author and Subject Index ..................................... 607
Theory of Sobolev Multipliers
With Applications to Differential and Integral Operators
Maz'ya, V.; Shaposhnikova, T.O.
2009, XIV, 614 p. 2 illus., Hardcover
ISBN: 978-3-540-69490-8
