Table of Contents

User Keynotes

PDM/ EDM as Integration Layer for Continuous Workflows Based on Relevant Product Data

K.H. Mühleck

DMU@Airbus – Evolution of the Digital Mock-up (DMU) at Airbus to the Centre of Aircraft Development

R. Garbade, W. R. Dolezal

Knowledge-based Design – An Integrated Approach

A. Katzenbach, W. Bergholz, A. Rolinger

Vendor Keynotes

Cross Disciplinary Methods for Accelerated Product Delivery

C. Grindstaff

Advances in PLM Methodologies Driving Needs for New Competencies

X. Fouger

A Systematic Approach to Product Development Best Practices

J. Heppelmann
Design Theory

SPALTEN Matrix – Product Development Process on the Basis of Systems Engineering and Systematic Problem Solving.................. 43
A. Albers, M. Meboldt

How to Measure the Success Potential and the Degree of Innovation of Technical Ideas and Products............................... 53
H. Binz, M. Reichle

Towards a Generic Model of Smart Synthesis Tools.............................. 65
W. O. Schotborgh, H. Tragter, F. G. M. Kokkelers, F. J. A. M. van Houten, T. Tomiyama

Improving Product Development by Design-for-X (DfX) Support........ 75
A. Bufardi, A. Edler, M. Frey, D. Kiritsis, A. Metin, B. Smith

Looking at “DFX” and “Product Maturity” from the Perspective of a New Approach to Modelling Product and Product Development Processes......................................................... 85
Chr. Weber

Support of Design Engineering Activity for a Systematic Improvement of Products....................................................... 105
A. Albers, T. Alink

The STEP Standards in Semantic Web – A Way to Integrate the Product Development Chain................................. 115
K. Schützer, A.A.A. Moura

Configuration instead of New Design Using Reference Product Structures............................................................. 125
E. Nurcahya

Implications of Complexity in Early Stages of Innovation Processes for the Definition of Heuristic Engineering Methods.............................................. 135
M. Weigt

Table of Contents

Complex Design, Mechatronics

Facing Multi-Domain Complexity in Product Development.................. 351
U. Lindemann, M. Maurer

Using Evolutionary Algorithms to Support
the Design of Self-optimizing Mechatronic Systems ......................... 363
R. Radkowski, U. Frank, J. Gausemeier

Case Study of a MEMS Switch Supported
by a FBS and DFM Framework.............................................................. 377

Reverse Engineering

Digital Processing and Fusion of 3D Data from Emerging
Non-Contact 3D Measurement Technologies ........................................ 387
A. Fischer

3D Digitalization for Patrimonial Machines.......................................... 397
F. Laroche, A. Bernard, M. Cotte

Using a Modified Failure Modes and Effects Analysis
within the Structured Design Recovery Framework.............................. 409
R. J. Urbanic, W. H. ElMaraghy

Knowledge Reengineering for Reverse Engineering Purposes .............. 421
Z. Weiss, M. Pankowski

Virtual Prototyping

Extended Virtual Prototyping................................................................. 431
G. Höhne, S. Husung, E. Lotter

MagicMirror & FootGlove:
A New System for the Customized Shoe Try-on .................................. 441
S. Mottura, L. Greci, E. Travaini, G. Viganò, M. Sacco
**Contact Pressure Calculation Methodologies**  
in Aeronautic Gearboxes in the CAD Process ........................................ 451  
*L. Zamponi, E. Mermoz, J.M. Linares*

**Product Design**

Common Representation of Products and Services:  
A Necessity for Engineering Designers  
to Develop Product-Service Systems ..................................................... 463  
*N. Maussang, D. Brissaud, P. Zwolinski*

Toward Design Interference Detection to Deal  
with Complex Design Problems .............................................................. 473  
*T. Tomiyama, V. D’Amelio*

About the Efficiency and Cost Reduction  
of Parallel Mixed-Model Assembly Lines .................................................. 483  
*S. Hazbany, I. Gilad, M. Shpitalni*

The Application of a Statistical Design of Experiment for Quantitative  
Analysis and Optimisation of Development Processes ............................. 493  
*F.-L. Krause, Chr. Kind, C. Biantoro*

**PLM**

PLM Services in Practice ........................................................................ 503  
*L. Lämmer, R. Bugow*

Composite Applications Enabling Product Data Management  
Applying SOA Principles and Software Factory Methods ........................ 513  
*Y. Bock*

A Holistic, Methodical Approach to Evaluate  
the PDMS-capability of Companies ......................................................... 521  
*J. Feldhusen, B. Gebhardt, M. Löwer*

Lifecycle Information Model for Higher Order  
Bifurcated Sheet Metal Products ............................................................... 531  
*R. Anderl, Z. Wu, Th. Rollmann, M. Kormann*
Simulation-based Multiple Project Management in Engineering Design ................................................................. 543
  T. Licht, L. Schmidt, C.M. Schlick, L. Dohmen, H. Luczak

Towards “The Timeless Way of Product Lifecycle Management” ........ 555
  J. Feldhusen, F. Bungert

Development of a Strategy Tool for Environmental Compliance Management .................................................. 565
  A. Dimache, L. Dimache, E. Zoldi, T. Roche

KBE

Software Engineering and Knowledge Engineering: From Competition to Cooperation ........................................... 575
  S. Ammar-Khodja, N. Perry, A. Bernard

Applying KBE Technologies to the Early Phases of Multidisciplinary Product Design ...................................... 587
  A. Schneegans, F. Ehlermann

A Way to Manage Calculation Engineers’ Knowledge ..................................................................................... 597
  C. Beylier, F. Pourroy, F. Villeneuve

On the Way to Knowledge Awareness in Early Design .................................................................................. 607
  Å. Ericson, M. Bergström, C. Johansson, T. Larsson

Enhanced B-Rep Graph-based Feature Sequences Recognition Using Manufacturing Constraints ...................... 617
  R. Harik, V. Capponi, W. Derigent

Facilitating Product Development with the Help of Knowledge Management: the McKnow Platform .................. 629
  J. Vertommen, J. D’hondt, J. Duflou

Integration of Learning Aptitude into Technical Systems ............................................................................ 639
  K. Paetzold
XX Table of Contents

Science Keynotes

New Perspectives on Design and Innovation ........................................ 649
L. Alting, C. Clausen, U. Jørgensen, Y. Yoshinaka

Future Trends in Product Lifecycle Management (PLM) ...................... 665
M. Abramovici

Modeling, Evaluation and Design of Product Quality under Disturbances throughout the Total Product Life Cycle .............. 675
F. Kimura

Closing Keynotes

Hype or Reality: Service Oriented Architecture in Product Lifecycle Management – How IBM Can Help You Achieve Innovation That Matters .......... 685
C. An

The Future of Product Development in India ...................................... 691
A. Chakrabarti

Virtual Product Development as an Engine for Innovation ............... 703
F.-L. Krause, H. Jansen, Chr. Kind, U. Rothenburg
The Future of Product Development
Proceedings of the 17th CIRP Design Conference
Krause, F.-L. (Ed.)
2007, XX, 713 p., Hardcover
ISBN: 978-3-540-69819-7
