Contents

Editors’ Preface ........................................................................................................ V

From Biological Macromolecules to Drape of Clothing: 50 Years of Computing for Textiles................................. 1
  John Hearle

Part I: Textile Quality Assessment from Image Analysis ..................................................................................... 21

Objective Assessment of Pilling of Knitted and Nonwoven Fabrics Using the Two Dimensional Discrete Wavelet Transform ......................................................................................................................... 23
  Stuart Palmer and Xungai Wang

Selecting Relevant Features from Fabric Images for Automated Quality Control of Seam Pucker Using Data Analysis and Human Experts Grading ................................................................................................. 39
  Ludovic Koehl, Jawad Chraibi Miou, Xianyi Zeng

Part II: Modelling and Simulation of Textile Structures ....................................................................................... 55

Complex Characterization of Yarn Unevenness .......................................................... 57
  Jiří Militký and Sayed Ibrahim

Computer Simulation of Woven Structures Based on Actual Yarn Photographs .............................................................................................................................. 75
  Hakan Özdemir and Güngör Başer

Computation of Permeability of Textile with Experimental Validation for Monofilament and Non-Crimp Fabrics ............... 93
  B. Verleye, M. Klitz, R. Croce, D. Roose, S.V. Lomov, I. Verpoest
Part III: COMPUTER AIDED GARMENT DESIGN

Measuring Geodesic Body Measurements with Distributed Collocation Method
Roger Ng and Glory Ty. Pong

Isomorphic Mesh of Human Body Surface for Computerized Apparel Design
Shigeru Inui, Kaori Hara, Hidehiko Okabe, Tomoe Masuda

Integration of an Adaptive CAD System for Flexible Furniture Industry
Nicolas Ansel, Sébastien Thomassey, Pascal Bruniaux, Xianyi Zeng

Part IV: COMPUTERIZED TEXTILE MANAGEMENT AND TEXTILE SUPPLY CHAIN

Stochastic Planning in the Textile Supply Chain: How Robust is a Newsboy Model?
Pierre Douillet, Besoa Rabenasolo

Developing an Apparel Supply Chain Simulation System with the Application of Fuzzy Logic
A.H. Dong, W.K. Wong, S.F. Chan, P.K.W. Yeung

Part V: COMPUTATIONAL THERMAL BIOENGINEERING OF TEXTILES

Computational Textile Bioengineering
Yi Li

FeaFur: A Computer Software Package for Simulating Human Thermophysiological Responses in Dynamic Thermal Environment
Yi Li, Zhong Wang, Ruomei Wang, Aihua Mao, Yubei Lin

Computational Investigation of Thermoregulatory Effects of Multi-Layer PCM Textile Assembly
B.A. Ying, Y.L. Kwok, Y. Li, C.Y. Yeung, Q.Y. Zhu, F.Z. Li

Computational Simulation of Multi-Phase Coupled Heat and Moisture Transfer in Phase Change and Self-Heating Porous Materials
Sheng Li, Yi Li, Fengzhi Li, Shuxiao Wang
Contents

Numerical Simulation of Heat and Moisture Transfer in Porous Walls with Microencapsulated PCM………………………………… 255
Y.Li, X.Wang, S. Li, J.L. Niu

Mathematical Simulation of Human Psychological Perception of Moisture Sensation……………………………………………….. 265
A.S.W. Wong, Y. Li, E. Newton

Part VI: COMPUTATIONAL BIOMECHANICAL ENGINEERING OF TEXTILES…………………………………………………………… 275

A CAD System for the Biomechanical Sensory Engineering of Clothing……………………………………………………………… 277
Ruomei Wang, Yi Li, Xin Zhang, Xiaonan Luo, Xiaoqun Dai

The Simulation of Elastic Human Body Deformation and Garment Pressure with Moving Mesh Method………………………… 289
Fang You, Jian-Min Wang, Guo-Jun Liao

Numerical Simulation of Skin Pressure Distribution Applied by Graduated Compression Stockings .................................. 301
X.Q. Dai, R. Liu, Y. Li, M. Zhang, Y.L. Kwok

Computational Modeling the Foot-Insole Interface.............................. 311
Ming Zhang, Jason Tak-Man Cheung, Yi Li

Computational Simulation of Skin and Sock Pressure Distributions.................................................................................. 323
Ming Zhang, X. Q. Dai, Y. Li, Jason Tak-Man Cheung

SUBJECT INDEX..................................................................................... 335
Computational Textile
Zeng, X.; Li, Y.; Ruan, D.; Koehl, L. (Eds.)
2007, XIV, 336 p. 141 illus., 29 illus. in color., Hardcover
ISBN: 978-3-540-70656-4
