Contents

COMMONS GAME Made More Exciting
by an Intelligent Utilization of the Two Evolutionary Algorithms
Norio Baba, Hisashi Handa ........................................... 1

Adaptive Generation of Dilemma-based Interactive Narratives
Heather Barber, Daniel Kudenko ........................................ 19

Computational Intelligence in Racing Games
Julian Togelius, Simon M. Lucas and Renzo De Nardi ............... 39

Evolutionary Algorithms for Board Game Players with Domain Knowledge
Kyung-Joong Kim and Sung-Bae Cho .................................... 71

The ChessBrain Project – Massively Distributed Chess Tree Search
Colin Frayn, Carlos Justiniano ........................................... 91

Designing and Developing Electronic Market Games
Maria Fasli and Michael Michalakopoulos ............................... 117

EVE’s Entropy: A Formal Gauge of Fun in Games
Kevin Burns ................................................................. 153

Capturing Player Enjoyment in Computer Games
Georgios N. Yannakakis, John Hallam .................................... 175
Advanced Intelligent Paradigms in Computer Games
Baba, N.; Handa, H. (Eds.)
2007, VII, 201 p., Hardcover
ISBN: 978-3-540-72704-0
