

Contents

Preface	V
1 Introduction and Basics.....	1
1.1 The Historical Development of Time Series Analysis	2
1.2 Graphical Representations of Economic Time Series	5
1.3 Ergodicity and Stationarity	12
1.4 The Wold Decomposition.....	21
References	22
2 Univariate Stationary Processes	27
2.1 Autoregressive Processes.....	27
2.1.1 First Order Autoregressive Processes	27
2.1.2 Second Order Autoregressive Processes	40
2.1.3 Higher Order Autoregressive Processes	49
2.1.4 The Partial Autocorrelation Function	52
2.1.5 Estimating Autoregressive Processes	56
2.2 Moving Average Processes.....	57
2.2.1 First Order Moving Average Processes	58
2.2.2 Higher Order Moving Average Processes	64
2.3 Mixed Processes	67
2.3.1 ARMA(1,1) Processes	67
2.3.2 ARMA(p,q) Processes	73
2.4 Forecasting.....	75
2.4.1 Forecasts with Minimal Mean Squared Errors	75
2.4.2 Forecasts of ARMA(p,q) Processes.....	80
2.4.3 Evaluation of Forecasts	84
2.5 The Relation between Econometric Models and ARMA Processes.....	87
References	88
3 Granger Causality.....	93
3.1 The Definition of Granger Causality	95
3.2 Characterisations of Causal Relations in Bivariate Models.....	97

3.2.1	Characterisations of Causal Relations using the Autoregressive and Moving Average Representations	97
3.2.2	Characterising Causal Relations by Using the Residuals of the Univariate Processes	99
3.3	Causality Tests	102
3.3.1	The Direct Granger Procedure	102
3.3.2	The Haugh-Pierce Test	106
3.3.3	The Hsiao Procedure	110
3.4	Applying Causality Tests in a Multivariate Setting	114
3.4.1	The Direct Granger Procedure with More Than Two Variables	114
3.4.2	Interpreting the Results of Bivariate Tests in Systems With More Than Two Variables	117
3.5	Concluding Remarks	118
	References	120
4	Vector Autoregressive Processes	125
4.1	Representation of the System	127
4.2	Granger Causality	136
4.3	Impulse Response Analysis	138
4.4	Variance Decomposition	144
4.5	Concluding Remarks	149
	References	150
5	Nonstationary Processes	153
5.1	Forms of Nonstationarity	153
5.2	Trend Elimination	159
5.3	Unit Root Tests	163
5.3.1	Dickey-Fuller Tests	165
5.3.2	The Phillips-Perron Test	171
5.3.3	Unit Root Tests and Structural Breaks	176
5.3.4	A Test with the Null Hypothesis of Stationarity	178
5.4	Decomposition of Time Series	180
5.5	Further Developments	187
5.5.1	Fractional Integration	187
5.5.2	Seasonal Integration	189
5.6	Deterministic versus Stochastic Trends in Economic Time Series	191
	References	194
6	Cointegration	199
6.1	Definition and Properties of Cointegrated Processes	203

6.2 Cointegration in Single Equation Models: Representation, Estimation and Testing	205
6.2.1 Bivariate Cointegration	205
6.2.2 Cointegration with More Than Two Variables.....	208
6.2.3 Testing Cointegration in Static Models	209
6.2.4 Testing Cointegration in Dynamic Models.....	213
6.3 Cointegration in Vector Autoregressive Models	218
6.3.1 The Vector Error Correction Representation.....	219
6.3.2 The Johansen Approach.....	222
6.3.3 Analysis of Vector Error Correction Models.....	229
6.4 Cointegration and Economic Theory.....	234
References	235
7 Autoregressive Conditional Heteroskedasticity	241
7.1 ARCH Models	245
7.1.1 Definition and Representation.....	245
7.1.2 Unconditional Moments	248
7.1.3 Temporal Aggregation.....	249
7.2 Generalised ARCH Models	252
7.2.1 GARCH Models	252
7.2.2 The GARCH(1,1) process	254
7.2.3 Nonlinear Extensions.....	257
7.3 Estimation and Testing	259
7.4 ARCH/GARCH Models as Instruments of Financial Market Analysis.....	261
References	263
Index of Names and Authors	267
Subject Index.....	271
