Contents

Education

Emergent Behaviour Real-time Programming of a Six-Legged
Omni-Directional Mobile Robot: Planning of Viennese Waltz Behaviour .... 3
Frank Nickols

The Hong Kong Underwater Robot Challenge ................................... 17
Robin Bradbeer

Dynamics and Control of a VTOL Quad-Thrust Aerial Robot ............... 27
Joshua N. Portlock and Samuel N. Cubero

Project-oriented Low Cost Autonomous Underwater Vehicle
with Servo-visual Control for Mechatronics Curricula ....................... 41
C. A. Cruz-Villar, V. Parra-Vega, and A. Rodriguez-Angeles

Coordination in Mechatronic Engineering Work ............................. 51
James Trevelyan

Vision Techniques

A Vision System for Depth Perception that Uses Inertial Sensing
and Motion Parallax ............................................................................. 65
Vlatko Bečanović and Xue-Bing Wang

Rate Shape Identification Based on Particle Swarm Optimization ....... 77
P.W.M. Tsang and T.Y.Y. Yuen

Advanced 3D Imaging Technology for Autonomous
Manufacturing Systems ........................................................................ 87
A. Pichler, H. Bauer, C. Eberst, C. Heindl, J. Minichberger

Vision Based Person Tracking and Following
in Unstructured Environments ............................................................... 99
Mahmoud Tarokh and John Kuo
## Contents

### Simple, Robust and Accurate Head-Pose Tracking Using a Single Camera

*Simon Meers, Koren Ward and Ian Piper*  
111

### Vision Applications

**Machine Vision for Beer Keg Asset Management**  
*Michael Lees, Duncan Campbell, Andrew Keir*  
125

**Millimetre Wave Radar Visualisation System: Practical Approach to Transforming Mining Operations**  
*E. Widzyk-Capehart, G. Brooker, S. Scheding, A. Maclean, R. Hennessy, C. Lobsey and M. Sivadorai*  
139

**An Underwater Camera and Instrumentation System for Monitoring the Undersea Environment**  
*Kenneth K.K. Ku, Robin Bradbeer and Katherine Lam*  
167

**Visual Position Estimation for Automatic Landing of a Tail-Sitter Vertical Takeoff and Landing Unmanned Air Vehicle**  
*Allen C. Tsai, Peter W. Gibbens and R. Hugh Stone*  
181

**Minutiae-based Fingerprint Alignment Using Phase Correlation**  
*Weiping Chen and Yongsheng Gao*  
193

### Robotic Techniques

**A Snake-like Robot for Inspection Tasks**  
*Bin Li, Li Chen and Yang Wang*  
201

**Modelling Pneumatic Muscles as Hydraulic Muscles for Use as an Underwater Actuator**  
*Kenneth K.K. Ku and Robin Bradbeer*  
209

**Automated Tactile Sensory Perception of Contact Using the Distributive Approach**  
*X. Ma, P. Tongpadungrod and P.N. Brett*  
219

**Blind Search Inverse Kinematics for Controlling All Types of Serial-link Robot Arms**  
*Samuel N. Cubero*  
229
Medical Applications

Distributive Tactile Sensing Applied to Discriminate Contact and Motion of a Flexible Digit in Invasive Clinical Environments ........................................ 247
Betty Tam, Peter Brett, David Holding, and Mansel Griffiths

Intelligent Approach to Cordblood Collection ........................................ 255
S.L. Chen, K.K. Tan, S.N. Huang and K.Z. Tang

An Autonomous Surgical Robot Applied in Practice ............................... 261
P.N. Brett, R.P. Taylor, D. Proops, M.V. Griffiths and C. Coulson

Development of an Intelligent Physiotherapy System ............................. 267
S.L. Chen, W.B. Lai, T.H. Lee and K.K. Tan

Visual Prostheses for the Blind: A Framework for Information Presentation ..................................................... 275
Jason Dowling, Wageeh Boles and Anthony Maeder

Computer-based Method of Determining the Path of a HIFU Beam Through Tissue Layers from Medical Images to Improve Cancer Treatment ......................................................... 289
E. McCarthy and S. Pather

Agricultural Applications

On-the-go Machine Vision Sensing of Cotton Plant Geometric Parameters: First Results ................................................................. 305
Cheryl McCarthy, Nigel Hancock and Steven Raine

Robotics for Agricultural Systems ............................................................ 313
Mario M. Foglia, Angelo Gentile, and Giulio Reina

More Machine Vision Applications in the NCEA ................................. 333
John Billingsley

Authors .................................................................................................... 345

Index ........................................................................................................ 347
Mechatronics and Machine Vision in Practice
Billingsley, J.; Bradbeer, R. (Eds.)
2008, IX, 348 p., Hardcover
ISBN: 978-3-540-74026-1
