1	Introduction	1
1.1	Music Information Retrieval	1
1.1.1	Outline of Part I	3
1.1.2	Further Notes	4
1.2	Motion Retrieval	5
1.2.1	Outline of Part II	7
1.2.2	Further Notes	9
1.3	General Concepts	10

Part I Analysis and Retrieval Techniques for Music Data

2	Fundamentals on Music and Audio Data	17
2.1	Music Representations	17
2.1.1	Score Representation	18
2.1.2	Sound, Waveform, and Audio Representation	20
2.1.3	MIDI Representation	24
2.2	Fourier Transform	28
2.2.1	Signals and Signal Spaces	28
2.2.2	Fourier Representations	31
2.2.3	Discrete Fourier Transform	35
2.2.4	Further Notes	38
2.3	Digital Filters	39
2.3.1	Convolution Filters	39
2.3.2	Frequency Response	41
2.3.3	Filter Specifications	43
2.3.4	Examples	45
2.3.5	Further Notes	48

3	Pitch- and Chroma-Based Audio Features	51
3.1	Pitch Features	52
3.2	Local Energy (STMSP) and Onset Features	55
3.3	Chroma and CENS Features	60
3.4	Further Notes	65
4	Dynamic Time Warping	69
4.1	Classical DTW	69
4.2	Variations of DTW	74
4.2.1	Step Size Condition	74
4.2.2	Local Weights	76
4.2.3	Global Constraints	76
4.2.4	Approximations	77
4.3	Multiscale DTW	78
4.4	Subsequence DTW	79
4.5	Further Notes	82
5	Music Synchronization	85
5.1	Synchronization Tasks	85
5.2	A Multiscale Approach to Audio Synchronization	87
5.2.1	Audio Features	88
5.2.2	Local Cost Measure	89
5.2.3	Resolution Levels and δ -Neighborhood	90
5.2.4	Experimental Results	92
5.2.5	Enhancing Cost Matrices	94
5.3	Onset-Based Score–Audio Synchronization	96
5.3.1	Audio Features	97
5.3.2	Local Similarity Measure	98
5.3.3	Matching Model and Alignment	99
5.3.4	Efficiency and Anchor Matches	102
5.3.5	Experimental Results	103
5.4	Further Notes	106
6	Audio Matching	109
6.1	Diagonal Audio Matching	110
6.1.1	Audio Features	110
6.1.2	Basic Matching Procedure	111
6.1.3	Global Variations in Tempo and Key	113
6.1.4	Efficient Implementation	115
6.2	Experimental Results for Diagonal Audio Matching	115
6.2.1	Representative Matching Results	116
6.2.2	Dependence on Query Length	121
6.3	Codebook Selection for CENS Features	123
6.3.1	Codebook Selection by Unsupervised Learning	123
6.3.2	Codebook Selection Based on Musical Knowledge	125

6.4	Index-Based Audio Matching	126
6.4.1	Exact Matches	127
6.4.2	Fault Tolerance Mechanisms	128
6.4.3	Retrieval Scenario and Ranking	129
6.5	Experimental Results for Index-Based Audio Matching	131
6.5.1	Diagonal vs. Index-Based Matching	132
6.5.2	Comparison of Codebooks	135
6.5.3	Running Times	135
6.6	Further Notes	137
7	Audio Structure Analysis	141
7.1	General Strategy and Notation	142
7.2	Enhancing Similarity Matrices	145
7.3	Path Extraction	147
7.4	Global Structure Analysis	150
7.5	Experiments	155
7.5.1	General Results	156
7.5.2	Running Time Behavior	161
7.5.3	Transpositions	162
7.6	Further Notes	165
8	SyncPlayer: An Advanced Audio Player	169
8.1	Overview	169
8.2	SyncPlayer Server	171
8.3	SyncPlayer Client	174
8.4	Further Notes	180

Part II Analysis and Retrieval Techniques for Motion Data

9	Fundamentals on Motion Capture Data	187
9.1	Motion Capture Data	187
9.2	Similarity Aspects	189
9.3	Kinematic Chains	194
9.3.1	Formal Definition	194
9.3.2	Forward Kinematics	195
9.3.3	Animated Kinematic Chains	197
9.3.4	Further Notes	198
9.4	Rotations	199
9.4.1	Basic Definitions and Properties	199
9.4.2	Euler Angles	201
9.4.3	Quaternions	203
9.4.4	Further Notes	208

10	DTW-Based Motion Comparison and Retrieval	211
10.1	Local Distance Measures	211
10.1.1	Quaternion-Based Pose Distance	211
10.1.2	3D Point Cloud Distance	213
10.1.3	Examples	216
10.2	DTW-Based Motion Warping	219
10.3	Motion Retrieval Based on Self-Similarity	221
10.4	Further Notes	225
11	Relational Features and Adaptive Segmentation	227
11.1	Relational Features	228
11.1.1	A Basic Example	228
11.1.2	Generic Features	230
11.1.3	Threshold Selection	233
11.1.4	Example for Some Feature Set	235
11.2	Adaptive Segmentation	236
11.3	Further Notes	239
12	Index-Based Motion Retrieval	241
12.1	Indexing, Queries, and Hits	241
12.1.1	Inverted File Index	242
12.1.2	Exact Queries and Exact Hits	243
12.1.3	Fuzzy Queries and Fuzzy Hits	244
12.1.4	Adaptive Fuzzy Hits	245
12.2	QBE Motion Retrieval	248
12.2.1	Query and Retrieval Mechanism	248
12.2.2	Indexing Stage	249
12.2.3	Experimental Results	251
12.2.4	Ranking Strategies	253
12.3	Further Applications	255
12.3.1	Accelerating DTW-Based Motion Alignment	255
12.3.2	Keyframe-Based Preselection	256
12.3.3	Toward Scene Descriptions	258
12.4	Further Notes	260
12.4.1	Problems and Limitations	260
12.4.2	Related Work	262
13	Motion Templates	265
13.1	Basic Definitions and Properties	265
13.2	MT Learning Procedure: Overview	267
13.3	MT Learning Procedure: Technical Details	270
13.3.1	Reference-Based WMT Warping	270
13.3.2	WMT Unwarping	271
13.3.3	Reference-Based WMT Averaging	273
13.3.4	Reference-Free WMT Averaging	273

13.4	Experimental Results	275
13.4.1	Motion Class Database	275
13.4.2	WMT Computation and Time Complexity	275
13.4.3	Examples	277
13.5	Further Notes	280
14	MT-Based Motion Annotation and Retrieval	283
14.1	MT-Based Matching	283
14.2	MT-Based Annotation	285
14.3	MT-Based Retrieval	286
14.4	Keyframe-Based Preprocessing	289
14.5	Comparison to Other Retrieval Methods	292
14.6	Further Notes	293
