

Table of Contents

| | |
|---------------------------------------------------------------------|----|
| Chapter 0. Introduction..... | 1 |
| A. Brief Definitions and Motivation..... | 1 |
| B. Why Write a Book on Einstein Manifolds?..... | 5 |
| C. Existence..... | 6 |
| D. Examples | |
| 1. Algebraic Examples..... | 6 |
| 2. Examples from Analysis..... | 7 |
| 3. Sporadic Examples..... | 8 |
| E. Uniqueness and Moduli..... | 9 |
| F. A Brief Survey of Chapter Contents..... | 10 |
| G. Leitfaden..... | 14 |
| H. Getting the Feel of Ricci Curvature..... | 15 |
| I. The Main Problems Today..... | 18 |
| Chapter 1. Basic Material..... | 20 |
| A. Introduction..... | 20 |
| B. Linear Connections..... | 22 |
| C. Riemannian and Pseudo-Riemannian Manifolds..... | 29 |
| D. Riemannian Manifolds as Metric Spaces..... | 35 |
| E. Riemannian Immersions, Isometries and Killing Vector Fields..... | 37 |
| F. Einstein Manifolds..... | 41 |
| G. Irreducible Decompositions of Algebraic Curvature Tensors..... | 45 |
| H. Applications to Riemannian Geometry..... | 48 |
| I. Laplacians and Weitzenböck Formulas..... | 52 |
| J. Conformal Changes of Riemannian Metrics..... | 58 |
| K. First Variations of Curvature Tensor Fields..... | 62 |
| Chapter 2. Basic Material (Continued): Kähler Manifolds..... | 66 |
| 0. Introduction..... | 66 |
| A. Almost Complex and Complex Manifolds..... | 66 |
| B. Hermitian and Kähler Metrics..... | 69 |
| C. Ricci Tensor and Ricci Form..... | 73 |
| D. Holomorphic Sectional Curvature..... | 75 |
| E. Chern Classes..... | 78 |

| | |
|-----------------------------------------------------------------------------|---------|
| F. The Ricci Form as the Curvature Form of a Line Bundle | 81 |
| G. Hodge Theory | 83 |
| H. Holomorphic Vector Fields and Infinitesimal Isometries | 86 |
| I. The Calabi-Futaki Theorem | 92 |
| Chapter 3. Relativity | 94 |
| A. Introduction | 94 |
| B. Physical Interpretations | 94 |
| C. The Einstein Field Equation | 96 |
| D. Tidal Stresses | 97 |
| E. Normal Forms for Curvature | 98 |
| F. The Schwarzschild Metric | 101 |
| G. Planetary Orbits | 105 |
| H. Perihelion Precession | 107 |
| I. Geodesics in the Schwarzschild Universe | 108 |
| J. Bending of Light | 110 |
| K. The Kruskal Extension | 111 |
| L. How Completeness May Fail | 113 |
| M. Singularity Theorems | 115 |
| Chapter 4. Riemannian Functionals | 116 |
| A. Introduction | 116 |
| B. Basic Properties of Riemannian Functionals | 117 |
| C. The Total Scalar Curvature: First Order Properties | 119 |
| D. Existence of Metrics with Constant Scalar Curvature | 122 |
| E. The Image of the Scalar Curvature Map | 124 |
| F. The Manifold of Metrics with Constant Scalar Curvature | 126 |
| G. Back to the Total Scalar Curvature: Second Order Properties | 129 |
| H. Quadratic Functionals | 133 |
| Chapter 5. Ricci Curvature as a Partial Differential Equation | 137 |
| A. Pointwise (Infinitesimal) Solvability | 137 |
| B. From Pointwise to Local Solvability: Obstructions | 138 |
| C. Local Solvability of $\text{Ric}(g) = r$ for Nonsingular r | 140 |
| D. Local Construction of Einstein Metrics | 142 |
| E. Regularity of Metrics with Smooth Ricci Tensors | 143 |
| F. Analyticity of Einstein Metrics and Applications | 145 |
| G. Einstein Metrics on Three-Manifolds | 146 |
| H. A Uniqueness Theorem for Ricci Curvature | 152 |
| I. Global Non-Existence | 153 |
| Chapter 6. Einstein Manifolds and Topology | 154 |
| A. Introduction | 154 |
| B. Existence of Einstein Metrics in Dimension 2 | 155 |
| C. The 3-Dimensional Case | 157 |

| | |
|----------------------------------------------------------------------------------------------------------------|------------|
| D. The 4-Dimensional Case | 161 |
| E. Ricci Curvature and the Fundamental Group | 165 |
| F. Scalar Curvature and the Spinorial Obstruction | 169 |
| G. A Proof of the Cheeger-Gromoll Theorem on Complete Manifolds with Non-Negative Ricci Curvature | 171 |
| Chapter 7. Homogeneous Riemannian Manifolds | 177 |
| A. Introduction | 177 |
| B. Homogeneous Riemannian Manifolds. | 178 |
| C. Curvature | 181 |
| D. Some Examples of Homogeneous Einstein Manifolds. | 186 |
| E. General Results on Homogeneous Einstein Manifolds | 189 |
| F. Symmetric Spaces. | 191 |
| G. Standard Homogeneous Riemannian Manifolds | 196 |
| H. Tables | 200 |
| I. Remarks on Homogeneous Lorentz Manifolds | 205 |
| Chapter 8. Compact Homogeneous Kähler Manifolds | 208 |
| 0. Introduction | 208 |
| A. The Orbits of a Compact Lie Group for the Adjoint Representation . . | 209 |
| B. The Canonical Complex Structure. | 212 |
| C. The G -Invariant Ricci Form | 215 |
| D. The Symplectic Structure of Kirillov-Kostant-Souriau | 220 |
| E. The Invariant Kähler Metrics on the Orbits. | 221 |
| F. Compact Homogeneous Kähler Manifolds. | 224 |
| G. The Space of Orbits | 227 |
| H. Examples. | 229 |
| Chapter 9. Riemannian Submersions. | 235 |
| A. Introduction | 235 |
| B. Riemannian Submersions | 236 |
| C. The Invariants A and T | 238 |
| D. O'Neill's Formulas for Curvature. | 241 |
| E. Completeness and Connections | 244 |
| F. Riemannian Submersions with Totally Geodesic Fibres | 249 |
| G. The Canonical Variation. | 252 |
| H. Applications to Homogeneous Einstein Manifolds | 256 |
| I. Further Examples of Homogeneous Einstein Manifolds. | 263 |
| J. Warped Products. | 265 |
| K. Examples of Non-Homogeneous Compact Einstein Manifolds with Positive Scalar Curvature | 272 |
| Chapter 10. Holonomy Groups | 278 |
| A. Introduction | 278 |
| B. Definitions. | 280 |

| | |
|---------------------------------------------------------------------------------------------|-----|
| C. Covariant Derivative Vanishing Versus Holonomy Invariance. | |
| Examples | 282 |
| D. Riemannian Products Versus Holonomy | 285 |
| E. Structure I. | 288 |
| F. Holonomy and Curvature. | 290 |
| G. Symmetric Spaces; Their Holonomy | 294 |
| H. Structure II | 300 |
| I. The Non-Simply Connected Case | 307 |
| J. Lorentzian Manifolds | 309 |
| K. Tables | 311 |
| | |
| Chapter 11. Kähler-Einstein Metrics and the Calabi Conjecture | 318 |
| A. Kähler-Einstein Metrics | 318 |
| B. The Resolution of the Calabi Conjecture and its Consequences. | 322 |
| C. A Brief Outline of the Proofs of the Aubin-Calabi-Yau Theorems. | 326 |
| D. Compact Complex Manifolds with Positive First Chern Class | 329 |
| E. Extremal Metrics | 333 |
| | |
| Chapter 12. The Moduli Space of Einstein Structures | 340 |
| A. Introduction | 340 |
| B. Typical Examples: Surfaces and Flat Manifolds. | 342 |
| C. Basic Tools | 345 |
| D. Infinitesimal Einstein Deformations. | 346 |
| E. Formal Integrability | 348 |
| F. Structure of the Premoduli Spaces | 351 |
| G. The Set of Einstein Constants. | 352 |
| H. Rigidity of Einstein Structures | 355 |
| I. Dimension of the Moduli Space | 358 |
| J. Deformations of Kähler-Einstein Metrics | 361 |
| K. The Moduli Space of the Underlying Manifold of K3 Surfaces | 365 |
| | |
| Chapter 13. Self-Duality | 369 |
| A. Introduction | 369 |
| B. Self-Duality | 370 |
| C. Half-Conformally Flat Manifolds | 372 |
| D. The Penrose Construction. | 379 |
| E. The Reverse Penrose Construction | 385 |
| F. Application to the Construction of Half-Conformally Flat Einstein Manifolds | 390 |
| | |
| Chapter 14. Quaternion-Kähler Manifolds. | 396 |
| A. Introduction | 396 |
| B. Hyperkählerian Manifolds | 398 |
| C. Examples of Hyperkählerian Manifolds | 400 |

| | |
|------------------------------------------------------------------------------------------------------------------------------|---------|
| D. Quaternion-Kähler Manifolds | 402 |
| E. Symmetric Quaternion-Kähler Manifolds. | 408 |
| F. Quaternionic Manifolds | 410 |
| G. The Twistor Space of a Quaternionic Manifold | 412 |
| H. Applications of the Twistor Space Theory | 415 |
| I. Examples of Non-Symmetric Quaternion-Kähler Manifolds | 419 |
| Chapter 15. A Report on the Non-Compact Case | 422 |
| A. Introduction | 422 |
| B. A Construction of Nonhomogeneous Einstein Metrics | 423 |
| C. Bundle Constructions | 424 |
| D. Bounded Domains of Holomorphy | 428 |
| Chapter 16. Generalizations of the Einstein Condition | 432 |
| A. Introduction | 432 |
| B. Natural Linear Conditions on Dr | 433 |
| C. Codazzi Tensors. | 436 |
| D. The Case $Dr \in C^\infty(Q \oplus S)$: Riemannian Manifolds with Harmonic Weyl Tensor | 440 |
| E. Condition $Dr \in C^\infty(S)$: Riemannian Manifolds with Harmonic Curvature | 443 |
| F. The Case $Dr \in C^\infty(Q)$ | 447 |
| G. Condition $Dr \in C^\infty(A)$: Riemannian Manifolds such that $(D_X r)(X, X) = 0$ for all Tangent Vectors X | 450 |
| H. Oriented Riemannian 4-Manifolds with $\delta W^+ = 0$ | 451 |
| Appendix. Sobolev Spaces and Elliptic Operators | 456 |
| A. Hölder Spaces. | 456 |
| B. Sobolev Spaces. | 457 |
| C. Embedding Theorems | 457 |
| D. Differential Operators | 459 |
| E. Adjoint | 460 |
| F. Principal Symbol | 460 |
| G. Elliptic Operators. | 461 |
| H. Schauder and L^p Estimates for Linear Elliptic Operators | 463 |
| I. Existence for Linear Elliptic Equations. | 464 |
| J. Regularity of Solutions for Elliptic Equations | 466 |
| K. Existence for Nonlinear Elliptic Equations. | 467 |
| Addendum | 471 |
| A. Infinitely Many Einstein Constants on $S^2 \times S^{2m+1}$ | 471 |
| B. Explicit Metrics with Holonomy G_2 and $\text{Spin}(7)$ | 472 |
| C. Inhomogeneous Kähler-Einstein Metrics with Positive Scalar Curvature | 474 |

| | |
|-------------------------------------------------------------------------------|-----|
| D. Uniqueness of Kähler-Einstein Metrics with Positive Scalar Curvature | 475 |
| E. Hyperkählerian Quotients..... | 477 |
| Bibliography | 479 |
| Notation Index | 500 |
| Subject Index..... | 505 |
| Errata | 511 |
