Contents

Part I: Satellite Gravity and Geodynamics

Do We Need New Gravity Field Recovery Techniques for the New Gravity Field Satellites? .................. 3
  K.H. Ilk, A. Löcher, T. Mayer-Gürr

A Localizing Basis Functions Representation for Low–Low Mode SST and Gravity Gradients
  Observations ................................................................. 10
  W. Keller

Gravity Field Modeling on the Basis of GRACE Range-Rate Combinations ............................... 17
  P. Ditmar, X. Liu

The Torus Approach in Spaceborne Gravimetry .......................................................... 23
  C. Xu, M.G. Sideris, N. Sneeuw

Gravity Recovery from Formation Flight Missions .................................................. 29
  N. Sneeuw, M.A. Sharifi, W. Keller

GRACE Gravity Model Derived by Energy Integral Method ........................................ 35

Robust Estimation and Robust Re-Weighting in Satellite Gravity Modelling ....................... 43
  J.P. van Loon

Topographic and Isostatic Reductions for Use in Satellite Gravity Gradiometry .................... 49
  F. Wild, B. Heck

Gravity Change After the First Water Impoundment in the Three-Gorges Reservoir, China .......... 56
  S. Sun, A. Xiang, C. Shen, P. Zhu, B.F. Chao

Continental Water Storage Changes from GRACE Line-of-Sight Range Acceleration Measurements ... 62
  Y. Chen, B. Schaffrin, C.K. Shum

Atmospheric De-Aliasing Revisited .......................................................... 67
  T. Peters

First Results of the 2005 Seismology – Geodesy Monitoring Campaign for Volcanic Crustal
  Deformation in the Reykjanes Peninsula, Iceland ............................................. 73
  J. Nicolas, S. Durand, S. Cravoisier, L. Geoffroy, C. Dorbath

The Statistical Analysis of the Eigenspace Components of the Strain Rate Tensor Derived
  from FinnRef GPS Measurements (1997–2004) in Fennoscandia ............................ 79
  J. Cai, E.W. Grafarend, H. Koivula, M. Poutanen

GPS Research for Earthquake Studies in India .................................................. 88
  M. N. Kulkarni

Preliminary Results of Subsidence Measurements in Xi’an by Differential SAR Interferometry ...... 94
  C. Zhao, Q. Zhang, X. Ding, Z. Li
Part II: Reference Frame, GPS Theory, Algorithms and Applications

Accuracy Assessment of the ITRF Datum Definition ................................................. 101
   Z. Altamimi, X. Collilieux, C. Boucher

The ITRF Beyond the “Linear” Model. Choices and Challenges ............................. 111
   A. Dermanis

Approach for the Establishment of a Global Vertical Reference Level ..................... 119
   L. Sánchez

The Research Challenges of IAG Commission 4 “Positioning & Applications” ............. 126
   C. Rizos

Integrated Adjustment of LEO and GPS in Precision Orbit Determination ................. 133
   J.H. Geng, C. Shi, Q.L. Zhao, M.R. Ge, J.N. Liu

Reduced-Dynamic Precise Orbit Determination Based on Helmert Transformation .......... 138
   J. Chen, J. Wang

GNSS Ambiguity Resolution: When and How to Fix or not to Fix? ......................... 143
   P.J.G. Teunissen, S. Verhagen

Probabilistic Evaluation of the Integer Least-Squares and Integer Aperture Estimators .................. 149
   S. Verhagen, P.J.G. Teunissen

The Evaluation of the Baseline’s Quality Based on the Probabilistic Characteristics
   of the Integer Ambiguity ..................................................................................... 155
   R. Xu, D. Huang, C. Li, L. Zhou, L. Yuan

Kinematic GPS Batch Processing, a Source for Large Sparse Problems .................. 160
   M. Roggero

Optimal Recursive Least-Squares Filtering of GPS Pseudorange Measurements .......... 166
   A.Q. Le, P.J.G. Teunissen

A Comparison of Particle Filters for Personal Positioning ........................................ 173
   D. Petrovich, R. Piché

An Effective Wavelet Method to Detect and Mitigate Low-Frequency Multipath Effects .. 179

Regional Tropospheric Delay Modeling Based on GPS Reference Station Network ......... 185
   H. Yin, D. Huang, Y. Xiong

Research on GPS Receiver Antenna Gain and Signal Carrier-to-Noise Ratio ............. 189
   J. Liu, J. Huang, H. Tian, C. Liu

Optimal Combination of Galileo Inter-Frequencies ................................................... 195
   B. Li, Y. Shen

Closed-Form ADOP Expressions for Single-Frequency GNSS-Based Attitude Determination .... 200
   D. Odijk, P.J.G. Teunissen, A.R. Amiri-Sinkoeei
Safety Monitoring for Dam Construction Crane System with Single Frequency GPS Receiver

W. Wang, J. Guo, B. Chao, N. Luo

PPP for Long-Range Airborne GPS Kinematic Positioning

X. Zhang, J. Liu, R. Forsberg

The Uniform Tykhonov-Phillips Regularization (α-weighted S-homBLE) and its Application in GPS Rapid Static Positioning

J. Cai, E.W. Grafarend, C. Hu, J. Wang

Part III: Statistical Estimation: Methods and Applications

Collocation with Integer Trend

P.J.G. Teunissen

Multidimensional Statistical Tests for Imprecise Data

H. Kutterer, I. Neumann

Multivariate Total Least – Squares Adjustment for Empirical Affine Transformations

B. Schaffrin, Y.A. Felus

Robust Double-k-Type Ridge Estimation and Its Applications in GPS Rapid Positioning

S. Han, Q. Gui, C. Ma

Adaptive Robust Sequential Adjustment

L. Sui, Y.Y. Liu, W. Wang, P. Fan

Application of Unscented Kalman Filter in Nonlinear Geodetic Problems

D. Zhao, Z. Cai, C. Zhang

Order Statistics Filtering for Detecting Outliers in Depth Data along a Sounding Line

M. Li, Y.C. Liu, Z. Lv, J. Bao

Stepwise Solutions to Random Field Prediction Problems

M. Reguzzoni, N. Tselfes, G. Venuti

Maximum Possibility Estimation Method with Application in GPS Ambiguity Resolution

X. Wang, C. Xu

Variance Component Estimation by the Method of Least-Squares

P.J.G. Teunissen, A.R. Amiri-Simkooei

Noise Characteristics in High Precision GPS Positioning

A.R. Amiri-Simkooei, C.C.J.M. Tiberius, P.J.G. Teunissen

Helmert Variance Component Estimation-based Vondrak Filter and its Application in GPS Multipath Error Mitigation

Statistical Analysis of Negative Variance Components in the Estimation of Variance Components

B. Gao, S. Li, W. Li, X. Wang

A Method to Adjust the Systematic Error along a Sounding Line in an Irregular Net

M. Li, Y.C. Liu, Z. Lv, J. Bao

Research on Precise Monitoring Method of Riverbed Evolution

J.H. Zhao, H.M. Zhang
Part IV: Geodetic Boundary Value Problems and Inverse Problem Theory

On the Universal Solvability of Classical Boundary-Value Problems of Potential Theory:
A Contribution from Geodesy ................................................................. 311
F. Sansò, F. Sacerdote

Model Refinements and Numerical Solutions of Weakly Formulated Boundary-Value Problems in Physical
Geodesy ................................................................................................. 320
P. Holota, O. Nesvadba

On an Ellipsoidal Approach to the Singularity-Free Gravity Space Theory ....................... 327
G. Austen, W. Keller

Local Geoid Modelling From Vertical Deflections ......................................................... 333
W. Freeden, S. Gramsch, M. Schreiner

Monte Carlo Integration for Quasi–linear Models ......................................................... 337
B. Gundlich, J. Kusche

Wavelet Evaluation of Inverse Geodetic Problems ......................................................... 345
M. El-Habiby, M.G. Sideris, C. Xu

Correcting the Smoothing Effect of Least-Squares Collocation with a Covariance-Adaptive
Optimal Transformation ................................................................. 350
C. Kotsakis

Analytical Downward and Upward Continuation Based on the Method of Domain Decomposition
and Local Functions ................................................................. 356
Y.M. Wang, D.R. Roman, J. Saleh

Author Index ................................................................................................. 361
