Contents

1 CONCURED: Defining the Leading Edge in Research of Adverse Effects of Treatment for Adult-Onset Cancers
Lois B. Travis ................................................................. 1

2 Bioimaging In Vivo to Discern the Evolution of Late Effects Temporally and Spatially
Jessica L. Hubbs, Jiho Nam, Sumin Zhou, Carol A. Hahn, and Lawrence B. Marks ........................................... 7

3 Association Between Single Nucleotide Polymorphisms and Susceptibility for the Development of Adverse Effects Resulting from Radiation Therapy
Barry S. Rosenstein .......................................................... 25

4 Prospective Second-Cancer Risk Estimation for Contemporary Radiotherapeutic Protocols
David J. Brenner and Igor Shuryak ....................................... 33

5 Bioengineering in the Repair of Irradiated Normal Tissue by Bone Marrow Derived Stem Cell Populations
Joel S. Greenberger .......................................................... 41

6 Development of a Queriable Database for Oncology Outcome Analysis

7 Post-Radiation Dysphagia
Bharat Mittal and Avraham Eisbruch ................................. 67

8 Lithium as a Differential Neuroprotector During Brain Irradiation
Luigi Moretti, Eddy S. Yang, Denies E. Hallahan, and Bo Lu .......... 81
9 Risks and Surveillance for Second Malignant Tumors in Prostate and Bladder Cancer Survivors
Andre Konski ................................................................. 93

10 Cardiotoxic Effects of Radiation Therapy in Hodgkin’s Lymphoma and Breast Cancer Survivors and the Potential Mitigating Effects of Exercise
Karen M. Mustian, Jacob Adams, Ronald G. Schwartz, Steven E. Lipshultz, and Louis S. Constine ......................... 103

11 Biodetection and Biointervention: Cytokine Pathways as a Rationale for Anticytokine Interventions Post-Radiation
Mitchel S. Anscher, Paul R. Graves, Ross Mikkelsen, and Zelijko Vujaskovic .................................................. 117

12 Late Toxicity from Hypofractionated Stereotactic Body Radiation
Michael T. Milano, Jacqueline P. Williams, Louis S. Constine, and Paul Okunieff ................................................. 129

13 The Radiation Spectrum of Normal Tissue Toxicity and Tolerance – Multiorgan Domino Effect
Philip Rubin ........................................................................ 141

14 Risk Factors for Second Malignancies Following Stem Cell Transplant
Debra L Friedman ............................................................. 155

Subject Index ................................................................... 163

List of Contributors .......................................................... 171
Cured II - LENT Cancer Survivorship Research And Education
Late Effects on Normal Tissues
Rubin, P.; Constine, L.S.; Marks, L.L.; Okunieff, P. (Eds.)
2008, XII, 180 p. 62 illus., 42 illus. in color., Hardcover
ISBN: 978-3-540-76270-6
