List of Contributors xi

Introduction 1

ZHOU Qiming, Brian G. LEES and TANG Guo-an 3
Advances in Digital Terrain Analysis: The TADTM Initiative

Section 1: Digital Representation for Terrain Analysis 11

George Ch. MILIARESIS 13
Quantification of Terrain Processes

Peter A. SHARY 29
Models of Topography

LI Zhilin 59
Multi-Scale Digital Terrain Modelling and Analysis

ZHAO Xuesheng, BAI Jianjun and CHEN Jun 85
A Seamless and Adaptive LOD Model of the Global Terrain Based on the QTM

Section 2: Morphological Terrain Analysis 105

TANG Guo-an and LI Fayuan 107
Landform Classification of the Loess Plateau Based on Slope Spectrum from Grid DEMs

Josef STROBL 125
Segmentation-based Terrain Classification

Lucian D. DRĂGUȚ and Thomas BLASCHKE 141
Terrain Segmentation and Classification using SRTM Data
LU Huaxing  
*Modelling Terrain Complexity*  
159

LIU Aili  
*DEM-based Analysis of Local Relief*  
177

YANG Qinke, David JUPP, LI Rui and LIANG Wei  
*Re-Scaling Lower Resolution Slope by Histogram Matching*  
193

**Section 3: Hydrological Terrain Analysis**  
211

John P. WILSON, Graeme AGGETT, DENG Yongxin and Christine S. LAM  
*Water in the Landscape: A Review of Contemporary Flow Routing Algorithms*  
213

Petter PILESJÖ  
*An Integrated Raster-TIN Surface Flow Algorithm*  
237

TIAN Yuan, WU Lun, GAO Yong, WANG Daming and ZHANG Yi  
*DEM-based Modelling and Simulation of Modern Landform Evolution of Loess*  
257

**Section 4: Uncertainty in Terrain Analysis**  
277

ZHOU Qiming and LIU Xuejun  
*Assessing Uncertainties in Derived Slope and Aspect from a Grid DEM*  
279

LIU Xuejun and BIAN Lu  
*Accuracy Assessment of DEM Slope Algorithms Related to Spatial Autocorrelation of DEM Errors*  
307

DENG Fengdong, WANG Lili, ZHUO Jing and LIU Anlin  
*Modelling Slope Field Uncertainty Derived From DEM in the Loess Plateau*  
323
ZHU A-Xing, James E. BURT, Michael SMITH, WANG Rongxun and GAO Jing
The Impact of Neighbourhood Size on Terrain Derivatives and Digital Soil Mapping

Brian G. LEES, HUANG Zhi, Kimberley VAN NIEL and Shawn W. LAFFAN
The Impact of DEM Error on Predictive Vegetation Mapping

Section 5: Applications of Terrain Analysis

Igor V. FLORINSKY
Global Lineaments: Application of Digital Terrain Modelling

John B. LINDSAY and James J. ROTHWELL
Modelling Channelling and Deflection of Wind by Topography

ZHANG Ting, LI Jun, WANG Chun and ZHAN Lei
Spatial Correlation of Topographic Attributes in Loess Plateau

YANG Xin and XIAO Chenchao
Terrain-based Revision of an Air Temperature Model in Mountain Areas

James R.F. BARRINGER, Allan E. HEWITT, Ian H. LYNN and Jochen SCHMIDT
National Mapping of Landform Elements in Support of S-Map, A New Zealand Soils Database

Concluding Remarks

Brian G. LEES
Progress in Digital Terrain Analysis
Advances in Digital Terrain Analysis
Zhou, Q.; Lees, B.; Tang, G.-a. (Eds.)
2008, XIV, 462 p., Hardcover
ISBN: 978-3-540-77799-1
