Contents

Part I Hydroinformatics: Integrating Data and Models

1 Some Future Prospects in Hydroinformatics ............................. 3
   M.B. Abbott

2 Data-Driven Modelling: Concepts, Approaches and Experiences .... 17
   D. Solomatine, L.M. See and R.J. Abrahart

Part II Artificial Neural Network Models

3 Neural Network Hydroinformatics: Maintaining Scientific Rigour . 33
   R.J. Abrahart, L.M. See and C.W. Dawson

4 Neural Network Solutions to Flood Estimation at Ungauged Sites . 49
   C.W. Dawson

5 Rainfall-Runoff Modelling: Integrating Available Data and Modern
   Techniques ........................................................................ 59
   S. Srinivasulu and A. Jain

6 Dynamic Neural Networks for Nonstationary Hydrological Time
   Series Modeling ................................................................. 71
   P. Coulibaly and C.K. Baldwin

7 Visualisation of Hidden Neuron Behaviour in a Neural Network
   Rainfall-Runoff Model ....................................................... 87
   L.M. See, A. Jain, C.W. Dawson and R.J. Abrahart

8 Correction of Timing Errors of Artificial Neural Network
   Rainfall-Runoff Models ...................................................... 101
   N.J. de Vos and T.H.M. Rientjes
9  Data-Driven Streamflow Simulation: The Influence of Exogenous Variables and Temporal Resolution ............................ 113
    E. Toth

10 Groundwater Table Estimation Using MODFLOW and Artificial Neural Networks ............................................ 127
    K. Mohammadi

11 Neural Network Estimation of Suspended Sediment: Potential Pitfalls and Future Directions ........................................ 139

Part III Models Based on Fuzzy Logic

12 Fuzzy Logic-Based Approaches in Water Resource System Modelling .......................................................... 165
    P.P. Mujumdar and S. Ghosh

13 Fuzzy Rule-Based Flood Forecasting ........................................ 177
    A. Bardossy

14 Development of Rainfall–Runoff Models Using Mamdani-Type Fuzzy Inference Systems ........................................ 189
    A.P. Jacquin and A.Y. Shamseldin

15 Using an Adaptive Neuro-fuzzy Inference System in the Development of a Real-Time Expert System for Flood Forecasting .. 201
    I.D. Cluckie, A. Moghaddamnia and D. Han

16 Building Decision Support Systems based on Fuzzy Inference ...... 215
    C.K. Makropoulos, D. Butler and C. Maksimovic

Part IV Global and Evolutionary Optimization

17 Global and Evolutionary Optimization for Water Management Problems .................................................. 231
    D. Savic

18 Conditional Estimation of Distributed Hydraulic Conductivity in Groundwater Inverse Modeling: Indicator-Generalized Parameterization and Natural Neighbors ........................................ 245
    F.T-C. Tsai and X. Li

19 Fitting Hydrological Models on Multiple Responses Using the Multiobjective Evolutionary Annealing-Simplex Approach ........ 259
    A. Efstratiadis and D. Koutsoyiannis

# Part VI Model Integration

31 Uncertainty Propagation in Ensemble Rainfall Prediction Systems used for Operational Real-Time Flood Forecasting .......................... 437  
I.D. Cluckie and Y. Xuan

32 OpenMI – Real Progress Towards Integrated Modelling .................. 449  
D. Fortune, P. Gijsbers, J. Gregersen and R. Moore

33 Hydroinformatics – The Challenge for Curriculum and Research, and the “Social Calibration” of Models ............................. 465  
J.P. O’Kane

34 A New Systems Approach to Flood Management in the Yangtze River, China ............................................................... 479  
H. Betts, S. Markar and S. Clark

35 Open Model Integration in Flood Forecasting ............................. 495  
M. Werner
Practical Hydroinformatics
Computational Intelligence and Technological Developments in Water Applications
Abrahart, R.J.; See, L.M.; Solomatine, D.P. (Eds.)
