Contents

1 Global Climate Changes –
Sources and Impacts on the Water Cycle...............................1

1.1 Climate Change and Water Cycle — Some Lessons from the Geological Past
Volker Mosbrugger ..................................................................................3

1.2 Climate Change and the Water Cycle - Some Information Concerning Precipitation Trends
Christian-D Schönwiese .........................................................................15

1.3 Moroccan Climate in the Present and Future: Combined View from Observational Data and Regional Climate Scenarios
K Born, M Christoph, A H Fink, P Knippertz, H Paeth and P Speth ..............................................................29

1.4 Impact of Climate Change on Water Availability in the Near East
Peter Suppan, Harald Kunstmann, Andreas Heckl, Alon Rimmer .................................................................47

1.5 Climatic Changes in Lebanon, Predicting Uncertain Precipitation Events — Do Climatic Cycles Exist?
Abdul-Rahman M Arkadan ...................................................................59

2 Impact of Climate Change on Water Resources.....................75

2.1 Water Resources Management in the Middle East under Aspects of Climatic Changes
Heinz Hötzl ................................................................................................77
## Contents

### 2.2 Virtual Water Trade as an Adaptation Demand Management of Climate Change Impact on Water Resources in the Middle East
*Mutasem El-Fadel and Rania Maroun* .................................................. 93

### 2.3 The Impacts of Climate Change on Water Resources in Jordan
*Ibrahim M Oroud* ........................................................................... 109

### 2.4 Impact of Climate Change on Water Resources of Lebanon: Indications of Hydrological Droughts
*Amin Shaban* .................................................................................. 125

### 2.5 The Impact of Global Warming on the Water Resources of the Middle East: Past, Present, and Future
*Arie S Issar* .......................................................................................... 145

### 2.6 Decadal Precipitation Variances and Reservoir Inflow in the Semi-Arid Upper Drâa basin (South-Eastern Morocco)
*Schulz, O, Busche, H and Benbouziane, A* ........................................ 165

### 2.7 Management Options for a Sustainable Groundwater Use in the Middle Drâa Oases under the Pressure of Climatic Changes
*Stephan Klose, Barbara Reichert, Abdeddaim Lahmouri* ........... 179

---

### 3 Water Resources and Water Management ....................... 197

#### 3.1 A Decision Support System (DSS) for Water Resources Management, – Design and Results from a Pilot Study in Syria

#### 3.2 Management Strategies of Water Resources in the Arid Zone of South-Eastern Morocco
*Hassane Jarar Oulidi, Lahcen Benaabidate, Ralf Löwner, Alan Ernest Fryar* .............................................................. 227
