# Chapter 1

**Epidemiology of Pediatric Strabismus**

Amy E. Green-Simms and Brian G. Mohney

1.1 Introduction ........................................... 1  
1.2 Forms of Pediatric Strabismus ...................... 1  
1.2.1 Esodeviations ...................................... 1  
1.2.1.1 Congenital Esotropia .............................. 2  
1.2.1.2 Accommodative Esotropia ....................... 2  
1.2.1.3 Acquired Nonaccommodative Esotropia ......... 2  
1.2.1.4 Abnormal Central Nervous System Esotropia ...... 2  
1.2.2 Exodeviations ...................................... 3  
1.2.2.1 Intermittent Exotropia .......................... 3  
1.2.2.2 Congenital Exotropia ............................ 3  
1.2.2.3 Convergence Insufficiency ...................... 3  
1.2.2.4 Abnormal Central Nervous System Exotropia ...... 3  
1.2.2.5 Sensory Exotropia ............................... 3  
1.2.3 Hyperdeviations .................................... 3  
1.3 Strabismus and Associated Conditions ................ 4  
1.4 Changing Trends in Strabismus Epidemiology .......... 4  
1.4.1 Changes in Strabismus Prevalence ................ 4  
1.4.2 Changes in Strabismus Surgery Rates ............. 4  
1.5 Worldwide Incidence and Prevalence of Childhood Strabismus 4  
1.6 Incidence of Adult Strabismus ...................... 7  

References ................................................... 7

# Chapter 2

**Changes in Strabismus Over Time: The Roles of Vergence Tonus and Muscle Length Adaptation**

David L. Guyton

2.1 Binocular Alignment System .......................... 11  
2.1.1 Long-Term Maintenance of Binocular Alignment .... 11  
2.1.2 Vergence Adaptation .............................. 12  
2.1.3 Muscle Length Adaptation ........................ 12  
2.2 Modeling the Binocular Alignment Control System .......... 13  
2.2.1 Breakdown of the Binocular Alignment Control System .... 14  
2.2.2 Clarification of Unanswered Questions Regarding the Long-Term Binocular Alignment Control System .... 14  
2.2.3 Changes in Strabismus as Bilateral Phenomena .......... 14  
2.2.4 Changes in Basic Muscle Length .................. 15  
2.2.5 Version Stimulation and Vergence Stimulation .......... 16  
2.2.6 Evidence Against the “Final Common Pathway” .......... 17  
2.3 Changes in Strabismus .............................. 18  
2.3.1 Diagnostic Occlusion: And the Hazard of Prolonged Occlusion 19  
2.3.2 Unilateral Changes in Strabismus .................. 19  
2.3.2.1 Supporting Evidence for Bilateral Feedback Control of Muscle Lengths .. 19  
2.4 Applications of Bilateral Feedback Control to Clinical Practice and to Future Research ...................... 21  
References ................................................... 22

# Chapter 3

**A Dissociated Pathogenesis for Infantile Esotropia**

Michael C. Brodsky

3.1 Dissociated Eye Movements .......................... 25  
3.2 Tonus and its relationship to infantile esotropia .......... 25  
3.3 Esotropia and Exotropia as a Continuum ................. 26  
3.4 Distinguishing Esotonus from Convergence ............... 28  
3.5 Pathogenetic Role of Dissociated Eye Movements in Infantile Esotropia .. 29  
References ................................................... 30
Chapter 4
The Monofixation Syndrome: New Considerations on Pathophysiology
Kyle Arnoldi

4.1 Introduction ........................................ 33
4.2 Normal and Anomalous Binocular Vision .... 33
4.2.1 Binocular Correspondence: Anomalous, Normal, or Both? ... 34
4.3 MFS with Manifest Strabismus ............ 35
4.3.1 Esotropia is the Most Common form of MFS .......... 35
4.3.2 Esotropia Allows for Better Binocular Vision ...... 35
4.3.3 Esotropia is the Most Stable Form .......... 36
4.4 Repairing and Producing MFS ............ 36
4.4.1 Animal Models for the Study of MFS ........ 37
4.5 Primary MFS (Sensory Signs of Infantile-Onset Image Decorrelation) ... 38
4.5.1 Motor Signs of Infantile-Onset Image Decorrelation ..... 38
4.5.2 References ..................................... 39

Chapter 5
Visual Cortex Mechanisms of Strabismus: Development and Maldevelopment
Lawrence Tychsen

5.1 Esotropia as the Major Type of Developmental Strabismus .... 41
5.1.1 Early-Onset (Infantile) Esotropia ...... 41
5.1.2 Early Cerebral Damage as the Major Risk Factor .... 41
5.1.3 Cytotoxic Insults to Cerebral Fibers .... 42
5.1.4 Genetic Influences on Formation of Cerebral Connections .... 42
5.1.5 Development of Binocular Visuomotor Behavior in Normal Infants .......... 42
5.1.6 Development of Sensorial Fusion and Stereopsis .......... 43
5.1.7 Development of Fusional Vergence and an Innate Convergence Bias ...... 44
5.1.8 Development of Motion Sensitivity and Conjugate Eye Tracking (Pursuit/OKN) .......... 44
5.1.9 Development and Maldevelopment of Cortical Binocular Connections ...... 44
5.1.10 Binocular Connections Join Monocular Compartments Within Area V1 (Striate Cortex) .......... 44
5.1.11 Too Few Cortical Binocular Connections in Strabismic Primate .... 46
5.1.12 Projections from Striate Cortex (Area V1) to Extrastriate Cortex (Areas MT/MST) ....... 46
5.1.13 Inter-Ocular Suppression Rather than Cooperation in Strabismic Cortex .......... 46
5.1.14 Naso-Temporal Inequalities of Cortical Suppression .......... 47
5.1.15 Persistent Nasalward Visuomotor Biases in Strabismic Primate ........ 47
5.1.16 Repair of Strabismic Human Infants: The Historical Controversy .... 50
5.1.17 Repair of High-grade Fusion is Possible ........ 50
5.1.18 Timely Restoration of Correlated Binocular Input: The Key to Repair .... 50
5.2 Visual Cortex Mechanisms in Micro-Esotropia (Monofixation Syndrome) ....... 51
5.2.1 Neuroanatomic Findings in Area V1 of Micro-Esotropic Primates ..... 52
5.2.2 Extrastriate Cortex in Micro-Esotropa .......... 52
5.2.3 References ..................................... 54

Chapter 6
Neuroanatomical Strabismus
Joseph L. Demer

6.1 General Etiologies of Strabismus .......... 59
6.2 Extraocular Myopathy ................. 59
6.2.1 Primary EOM Myopathy ...... 59
6.2.2 Immune Myopathy .............. 60
6.2.3 Inflammatory Myositis ........ 61
6.2.4 Neoplastic Myositis .......... 61
6.2.5 Traumatic Myopathy ........... 61
6.3 Congenital Pulley Heterotopy .......... 62
6.4 Acquired Pulley Heterotopy .......... 63
6.5 “Divergence Paralysis” Esotropia .......... 64
6.6 Vertical Strabismus Due to Sagging Eye Syndrome .......... 65
6.7 Postsurgical and Traumatic Pulley Heterotopy ........ 65
6.8 Axial High Myopia .......... 65
6.9 Congenital Peripheral Neuropathy: The Congenital Cranial Dysinnervation Disorders (CCDDs) .... 66
Chapter 7
Congenital Cranial Dysinnervation Disorders:
Facts and Perspectives to Understand Ocular Motility Disorders
Antje Neugebauer and Julia Fricke

7.1 Congenital Cranial Dysinnervation Disorders: Facts About Ocular Motility Disorders 77
7.1.1 The Concept of CCDDs: Ocular Motility Disorders as Neurodevelopmental Defects 77
7.1.1.1 Brainstem and Cranial Nerve Development 78
7.1.1.2 Single Disorders Representing CCDDs 78
7.1.1.3 Disorders Understood as CCDDs 81
7.2 Congenital Cranial Dysinnervation Disorders: Perspectives to Understand Ocular Motility Disorders 83
7.2.1 Congenital Ocular Elevation Deficiencies: A Neurodevelopmental View 83
7.2.1.1 Brown Syndrome 83
7.2.1.2 Congenital Monocular Elevation Deficiency and Vertical Retraction Syndrome 87
7.2.2 A Model of some Congenital Elevation Deficiencies as Neurodevelopmental Diseases 89
References 91

Chapter 8
The Value of Screening for Amblyopia Revisited
Jill Carlton and Carolyn Czoski-Murray

8.1 Amblyopia 95
8.2 What Is Screening? 96
8.2.1 Screening for Amblyopia, Strabismus, and/or Refractive Errors 96
8.2.1.1 Screening for Amblyopia 97
8.2.1.2 Screening for Strabismus 97
8.2.1.3 Screening for Refractive Error 97
8.2.1.4 Screening for Other Ocular Conditions 97
8.2.2 Justification Between a Screening and Diagnostic Test 97
8.2.3 Justification for Screening for Amblyopia and/or Strabismus 98
8.2.4 Recent Reports Examining Pre-School Vision Screening 98
8.3 Screening Tests for Amblyopia, Strabismus, and/or Refractive Error 100
8.3.1 Vision Tests 100
8.3.2 Cover-Uncover Test 100
8.3.3 Stereoacuity 101
8.3.4 Photoscreening and/or Autorefraction 101
8.3.5 What to Do with Those Who Are Unable to Perform Screening Tests? 102
8.3.6 Who Should Administer the Screening Program? 102
8.4 Treatment of Amblyopia 103
8.4.1 Type of Treatment 103
8.4.2 Refractive Adaptation 103
8.4.3 Conventional Occlusion 104
8.4.4 Pharmacological Occlusion 104
8.4.5 Optical Penalization 104
8.4.6 Effective Treatment of Amblyopia in Older Children (Over the Age of 7 Years) 104
8.4.7 Treatment Compliance 105
8.4.8 Other Treatment Options for Amblyopia 105
8.4.9 Recurrence of Amblyopia Following Therapy 105
8.5 Quality of Life 106
8.6 The Impact of Amblyopia Upon HRQoL 106
8.6.1 Stereoaucity and Motor Skills in Children with Amblyopia 106
8.6.2 Reading Speed and Reading Ability in Children with Amblyopia 106

Contents xi
Chapter 12
Management of Congenital Nystagmus with and without Strabismus
Anil Kumar, Frank A. Proudlock, and Irene Gottlob

12.1 Overview .................................................. 154
12.1.1 Congenital Nystagmus with and Without Sensory Deficits ...... 154
12.1.1.1 The Clinical Characteristics of Congenital Nystagmus .......... 156
12.1.2 Manifest Latent Nystagmus (MLN) ...... 157
12.1.2.1 Clinical Characteristics of Manifest Latent Nystagmus (MLN) ... 157
12.1.3 Congenital Periodic Alternating Nystagmus (PAN), 158
12.1.3.1 Clinical characteristics of congenital periodic alternating nystagmus ...... 159
12.1.4 Compensatory Mechanisms ................................ 160
12.1.4.1 Dampening by Versions .......... 160
12.1.4.2 Dampening by Vergence .............. 160
12.1.4.3 Anomalous Head Posture (AHP) .......... 160
12.1.4.4 Measurement of AHP, 160
12.1.4.5 Effect of Monocular and Binocular Visual Acuity Testing on AHP, 161
12.1.4.6 Testing AHP at Near .......... 162
12.1.4.7 The Effect of Straightening the Head in Patients with AHP, 162
12.2 Treatment ...................................................... 162
12.2.1 Optical Treatment ........................................ 162
12.2.1.1 Refractive Correction .......... 162
12.2.1.2 Spectacles and Contact Lenses (CL) .............. 162
12.2.1.3 Prisms .............................................. 163
12.2.1.4 Low Visual Aids, .......... 163
12.2.2 Medication ............................................ 163
12.2.3 Acupuncture ......................................... 164
12.2.4 Biofeedback ........................................... 164
12.2.5 Botulinum Toxin-A (Botox) ............... 164
12.2.6 Surgical Treatment of Congenital Nystagmus, 164
12.2.6.1 Management of Horizontal AHP .......... 165
12.3 Treatment ...................................................... 162
12.3.1 Optical Treatment ........................................ 162
12.3.1.1 Refractive Correction .......... 162
12.3.1.2 Spectacles and Contact Lenses (CL) .............. 162
12.3.1.3 Prisms .............................................. 163
12.3.1.4 Low Visual Aids, .......... 163
12.3.2 Medication ............................................ 163
12.3.3 Acupuncture ......................................... 164
12.3.4 Biofeedback ........................................... 164
12.3.5 Botulinum Toxin-A (Botox) ............... 164
12.3.6 Surgical Treatment of Congenital Nystagmus, 164
12.3.6.1 Management of Horizontal AHP .......... 165
12.3.6.2 Management of Vertical AHP .......... 166
12.3.6.3 Management of Head Tilt .......... 167
12.3.6.4 Artificial Divergence Surgery .......... 167
12.3.6.5 Surgery to Decrease the Intensity of Nystagmus, 168
References ..................................................... 169

Chapter 13
Surgical Management of Dissociated Deviations
Susana Gamio

13.1 Dissociated Deviations .......... 174
13.2 Surgical Alternatives to Treat Patients with DVD .......... 175
13.2.1 Symmetric DVD with Good Bilateral Visual Acuity, with No Oblique Muscles Dysfunction .......... 175
13.2.2 Bilateral DVD with Deep Unilateral Amblyopia, 175
13.2.3 DVD with Inferior Oblique Overaction (IOOA) and V Pattern, 176
13.2.4 DVD with Superior Oblique Overaction (SOOA) and A Pattern, 177
13.2.5 Symmetric vs. Asymmetric Surgeries for DVD, 178
13.2.6 DVD with Hypotropia of the Nonfixating Eye, 178
13.3 Dissociated Horizontal Deviation, 179
13.4 Dissociated Torsional Deviation, 179
13.5 Conclusions, 182
References ..................................................... 182

Chapter 14
Surgical Implications of the Superior Oblique Frenulum
Burton J. Kushner and Megumi Iizuka

14.1 Introduction .......... 185
14.2 Clinical and Theoretical Investigations, 186
14.2.1 The Effect of Superior Rectus Muscle Recession on the Location of the Superior Oblique Tendon Before and After Cutting the Frenulum, 186
14.2.2 The Effect of the Frenulum on Superior Oblique Recession Using a Suspension Technique, 188
14.2.3 The Theoretical Effect of the Superior Oblique Frenulum on the Posterior Partial Tenectomy of the Superior Oblique, 189
References ..................................................... 192
### Chapter 15
**Pearls and Pitfalls in Surgical Management of Paralytic Strabismus**
Seyhan B. Özkan

15.1 General Principles of Surgical Treatment in Paralytic Strabismus .......................... 195
15.1.1 Aims of Treatment .................................. 195
15.1.2 Timing of Surgery ................................. 195
15.1.3 Preoperative Assessment ......................... 196
15.1.4 Methods of Surgical Treatment .......... 197
15.2 Third Nerve Palsy .................................. 198
15.2.1 Complete Third Nerve Palsy .......... 198
15.2.2 Incomplete Third Nerve Palsy ........ 199
15.3 Fourth Nerve Palsy ................................. 200
15.4 Sixth Nerve Palsy ................................ 204
References .............................................. 205

### Chapter 16
**Modern Treatment Concepts in Graves Disease**
Anja Eckstein and Joachim Esser

16.1 Graves Orbitopathy (GO):
Pathogenesis and Clinical Signs ............ 207
16.1.1 Graves Orbitopathy is Part of a Systemic Disease: Graves Disease (GD) .......... 207
16.1.2 Graves Orbitopathy–Clinical Signs .... 208
16.1.2.1 Clinical Changes Result in
Typical Symptoms ................................. 208
16.1.3 Clinical Examination of GO ............ 208
16.1.3.1 Signs of Activity ......................... 208
16.1.3.2 Assessing Severity of GO ............ 209
16.1.3.3 Imaging ................................ 211
16.1.4 Classification of GO .......................... 211
16.2 Natural History .................................... 212
16.3 Treatment of GO ................................ 213
16.3.1 Active Inflammatory Phase ............... 213
16.3.1.1 Glucocorticoid Treatment ............... 213
16.3.1.2 Orbital Radiotherapy .................... 213
16.3.1.3 Combined Therapy: Glucocorticoids
and Orbital Radiotherapy ..................... 213
16.3.1.4 Other Immunosuppressive Treatments
and New Developments ....................... 213
16.3.1.5 Therapy of Dysthyroid Optic
Neuropathy [DON] and
Sight-Threatening Corneal Breakdown .......... 214
16.3.1.6 Other Simple Measures that
may Alleviate Symptoms ....................... 214
16.3.2 Inactive Disease Stages .................... 215
16.3.2.1 Orbital Decompression ................. 215
16.3.2.2 Extraocular Muscle Surgery .......... 216
16.3.2.3 Lid Surgery ................................ 217
16.4 Thyroid Dysfunction and GO ............ 220
16.4.1 Association Between Treatment of Hyperthyroidism and Course of GO .... 220
16.4.2 Relationship Between
TSH-Receptor-Antibody (TRAb)
Levels and Orbitopathy ....................... 220
16.5 Environmental and Genetic Influence on the Course of GO .................. 221
16.5.1 Relationship Between Cigarette Smoking and Graves Orbitopathy ........ 221
16.5.2 Genetic Susceptibility ....................... 221
16.6 Special Situations .............................. 221
16.6.1 Euthyroid GO ................................. 222
16.6.2 Childhood GO .............................. 222
16.6.3 GO and Diabetes ............................ 222
References .............................................. 223
