Contents

Part I: Keynotes .................................................................................................................. 1

1. A Virtual Geographic Environment for a Simulation of Air Pollution Dispersion in the Pearl River Delta (PRD) Region ....... 3
   Hui Lin, Jun Zhu, Bingli Xu, Wenshi Lin and Ya Hu

2. Representing and Exchanging 3D City Models with CityGML ...... 15
   Thomas H. Kolbe

3. Research and Development Program for the Third National Geographic Information System Project in Korea: Korean Land Spatialization Program .................................................. 33
   Byung-Guk Kim, Hoon-Sung Choi and Yeun J. Jung

Part II: Papers..................................................................................................................... 45

4. Construction Operators for Modelling 3D Objects and Dual Navigation Structures ........................................................................... 47
   Pawel Boguslawski and Christopher Gold

5. A Multilayered Space-Event Model for Navigation in Indoor Spaces ................................................................................................ 61
   Thomas Becker, Claus Nagel and Thomas H. Kolbe

   Umit Isikdag and Sisi Zlatanova

7. Managed Objects for Infrastructure Data ......................................................... 97
   Erik Kjems, Lars Bodum and Jan Kolar

8. Integrating Terrain Surface and Street Network for 3D Routing .......................................................................................... 109
   Arne Schilling, Sandra Lanig, Pascal Neis and Alexander Zipf

20. Solar Radiation over the Urban Texture: LIDAR Data and Image Processing Techniques for Environmental Analysis at City Scale......................................................................................................................... 319
   Cláudio Carneiro, Eugenio Morello, Carlo Ratti and François Golay

21. Creation and Error Analysis of High Resolution DEM Based on Source Data Sets of Various Accuracy .............................................. 341
   Jari Pohjola, Jari Turunen, Tarmo Lipping and Ari Ikonen

22. A Topological Analysis Method for 3D Geo-Entities Structured as Hexahedron Tessellations .................................................. 355
   GUO Jiateng and WU Lixin

23. Constraint-based Generation and Visualization of 3D City Models........................................................................................................... 365
   Volker Coors, Karina Hünlich and Giwon On

24. GeoVEs as Tools to Communicate in Urban Projects: Requirements for Functionality and Visualization............................. 379
   Mahmud Shahrear Kibria, Sisi Zlatanova, Laure Itard and Machiel van Dorst

25. Producing 3D Applications for Urban Planning by Integrating 3D Scanned Building Data with Geo-spatial Data.................. 397
   Yonghui Song, Hongxia Wang, Andy Hamilton and Yusuf Arayici

26. 3D Dynamic Simulation and Visualization for GIS-based Infiltration Excess Overland Flow Modelling........................................... 413
   Izham Mohamad Yusoff, Muhamad Uznir Ujang and Alias Abdul Rahman
