Part I Non-Player Characters and Reinforcement Learning

1	Non-Player Characters in Multiuser Games	3
1.1	Types of Multiuser Games.....	4
1.1.1	Massively Multiplayer Online Role-Playing Games.....	4
1.1.2	Multiuser Simulation Games.....	5
1.1.3	Open-Ended Virtual Worlds.....	5
1.2	Character Roles in Multiuser Games.....	8
1.3	Existing Artificial Intelligence Techniques for Non-Player Characters in Multiuser Games.....	9
1.3.1	Reflexive Agents.....	9
1.3.2	Learning Agents.....	12
1.3.3	Evolutionary Agents.....	14
1.3.4	Smart Terrain.....	14
1.4	Summary.....	15
1.5	References.....	15
2	Motivation in Natural and Artificial Agents	17
2.1	Defining Motivation.....	17
2.2	Biological Theories of Motivation.....	20
2.2.1	Drive Theory.....	20
2.2.2	Motivational State Theory.....	22
2.2.3	Arousal.....	23
2.3	Cognitive Theories of Motivation.....	26
2.3.1	Curiosity.....	26
2.3.2	Operant Theory.....	28
2.3.3	Incentive.....	29
2.3.4	Achievement Motivation.....	30
2.3.5	Attribution Theory.....	31
2.3.6	Intrinsic Motivation.....	33

2.4	Social Theories of Motivation.....	35
2.4.1	Conformity	35
2.4.2	Cultural Effect	36
2.4.3	Evolution	36
2.5	Combined Motivation Theories	37
2.5.1	Maslow's Hierarchy of Needs	38
2.5.2	Existence Relatedness Growth Theory	38
2.6	Summary	39
2.7	References.....	40
3	Towards Motivated Reinforcement Learning.....	45
3.1	Defining Reinforcement Learning	45
3.1.1	Dynamic Programming	47
3.1.2	Monte Carlo Methods.....	48
3.1.3	Temporal Difference Learning	49
3.2	Reinforcement Learning in Complex Environments.....	52
3.2.1	Partially Observable Environments	52
3.2.2	Function Approximation	53
3.2.3	Hierarchical Reinforcement Learning	54
3.3	Motivated Reinforcement Learning	57
3.3.1	Using a Motivation Signal in Addition to a Reward Signal.....	58
3.3.2	Using a Motivation Signal Instead of a Reward Signal.....	64
3.4	Summary	67
3.5	References.....	68
4	Comparing the Behaviour of Learning Agents.....	71
4.1	Player Satisfaction	71
4.1.1	Psychological Flow	72
4.1.2	Structural Flow	73
4.2	Formalising Non-Player Character Behaviour	73
4.2.1	Models of Optimality for Reinforcement Learning.....	74
4.2.2	Characteristics of Motivated Reinforcement Learning.....	78
4.3	Comparing Motivated Reinforcement Learning Agents	81
4.3.1	Statistical Model for Identifying Learned Tasks	83
4.3.2	Behavioural Variety.....	83
4.3.3	Behavioural Complexity.....	85
4.4	Summary	86
4.5	References.....	87

Part II Developing Curious Characters Using Motivated Reinforcement Learning

5	Curiosity, Motivation and Attention Focus	91
5.1	Agents in Complex, Dynamic Environments.....	91
	5.1.1 States	93
	5.1.2 Actions	94
	5.1.3 Reward and Motivation	94
5.2	Motivation and Attention Focus.....	95
	5.2.1 Observations.....	96
	5.2.2 Events	98
	5.2.3 Tasks and Task Selection	100
	5.2.4 Experience-Based Reward as Cognitive Motivation	102
	5.2.5 Arbitration Functions.....	108
	5.2.6 A General Experience-Based Motivation Function.....	109
5.3	Curiosity as Motivation for Support Characters.....	111
	5.3.1 Curiosity as Interesting Events	111
	5.3.2 Curiosity as Interest and Competence	116
5.4	Summary	119
5.5	References.....	119
6	Motivated Reinforcement Learning Agents	121
6.1	A General Motivated Reinforcement Learning Model	121
6.2	Algorithms for Motivated Reinforcement Learning	123
	6.2.1 Motivated Flat Reinforcement Learning	123
	6.2.2 Motivated Multioption Reinforcement Learning.....	126
	6.2.3 Motivated Hierarchical Reinforcement Learning	131
6.3	Summary	133
6.4	References.....	134

Part III Curious Characters in Games

7	Curious Characters for Multiuser Games	137
7.1	Motivated Reinforcement Learning for Support Characters in Massively Multiplayer Online Role-Playing Games.....	138
7.2	Character Behaviour in Small-Scale, Isolated Game Locations..	141
	7.2.1 Case Studies of Individual Characters	142
	7.2.2 General Trends in Character Behaviour	145
7.3	Summary	148
7.4	References.....	149

8	Curious Characters for Games in Complex, Dynamic Environments	151
8.1	Designing Characters That Can Multitask	152
	8.1.1 Case Studies of Individual Characters	155
	8.1.2 General Trends in Character Behaviour	156
8.2	Designing Characters for Complex Tasks.....	159
	8.2.1 Case Studies of Individual Characters.....	159
	8.2.2 General Trends in Character Behaviour	161
8.3	Games That Change While Characters Are Learning	163
	8.3.1 Case Studies of Individual Characters.....	164
	8.3.2 General Trends in Character Behaviour	167
8.4	Summary	169
8.5	References.....	170
9	Curious Characters for Games in <i>Second Life</i>	171
9.1	Motivated Reinforcement Learning in Open-Ended Simulation Games	171
	9.1.1 Game Design	172
	9.1.2 Character Design	172
9.2	Evaluating Character Behaviour in Response to Game Play Sequences.....	176
	9.2.1 Discussion	187
9.3	Summary	188
9.4	References.....	189
 Part IV Future		
10	Towards the Future	193
10.1	Using Motivated Reinforcement Learning in Non-Player Characters	193
10.2	Other Gaming Applications for Motivated Reinforcement Learning.....	194
	10.2.1 Dynamic Difficulty Adjustment.....	194
	10.2.2 Procedural Content Generation	195
10.3	Beyond Curiosity	195
	10.3.1 Biological Models of Motivation	195
	10.3.2 Cognitive Models of Motivation	196
	10.3.3 Social Models of Motivation.....	196
	10.3.4 Combined Models of Motivation	196
10.4	New Models of Motivated Learning	197
	10.4.1 Motivated Supervised Learning	197
	10.4.2 Motivated Unsupervised Learning	198
10.5	Evaluating the Behaviour of Motivated Learning Agents.....	198
10.6	Concluding Remarks.....	198
10.7	References.....	199
