

Contents

1	Experimental Approaches Toward a Functional Understanding of Insect Flight Control	1
	Steven N. Fry	
2	From Visual Guidance in Flying Insects to Autonomous Aerial Vehicles	15
	Mandyam V. Srinivasan, Saul Thurrowgood, and Dean Socol	
3	Optic Flow Based Autopilots: Speed Control and Obstacle Avoidance	29
	Nicolas Franceschini, Franck Ruffier and Julien Serres	
4	Active Vision in Blowflies: Strategies and Mechanisms of Spatial Orientation	51
	Martin Egelhaaf, Roland Kern, Jens P. Lindemann, Elke Braun, and Bart Geurten	
5	Wide-Field Integration Methods for Visuomotor Control	63
	J. Sean Humbert, Joseph K. Conroy, Craig W. Neely, and Geoffrey Barrows	
6	Optic Flow to Steer and Avoid Collisions in 3D	73
	Jean-Christophe Zufferey, Antoine Beyeler, and Dario Floreano	
7	Visual Homing in Insects and Robots	87
	Jochen Zeil, Norbert Boeddeker, and Wolfgang Stürzl	
8	Motion Detection Chips for Robotic Platforms	101
	Rico Moeckel and Shih-Chii Liu	
9	Insect-Inspired Odometry by Optic Flow Recorded with Optical Mouse Chips	115
	Hansjürgen Dahmen, Alain Millers, and Hanspeter A. Mallot	
10	Microoptical Artificial Compound Eyes	127
	Andreas Brückner, Jacques Duparré, Frank Wippermann, Peter Dannberg, and Andreas Bräuer	
11	Flexible Wings and Fluid–Structure Interactions for Micro-Air Vehicles	143
	W. Shyy, Y. Lian, S.K. Chimakurthi, J. Tang, C.E.S. Cesnik, B. Stanford, and P.G. Ifju	

12	Flow Control Using Flapping Wings for an Efficient Low-Speed Micro-Air Vehicle	159
	Kevin D. Jones and Max F. Platzer	
13	A Passively Stable Hovering Flapping Micro-Air Vehicle	171
	Floris van Breugel, Zhi Ern Teoh, and Hod Lipson	
14	The Scalable Design of Flapping Micro-Air Vehicles Inspired by Insect Flight	185
	David Lentink, Stefan R. Jongerius, and Nancy L. Bradshaw	
15	Springy Shells, Pliant Plates and Minimal Motors: Abstracting the Insect Thorax to Drive a Micro-Air Vehicle	207
	Robin J. Wootton	
16	Challenges for 100 Milligram Flapping Flight	219
	Ronald S. Fearing and Robert J. Wood	
17	The Limits of Turning Control in Flying Insects	231
	Fritz-Olaf Lehmann	
18	A Miniature Vehicle with Extended Aerial and Terrestrial Mobility	247
	Richard J. Bachmann, Ravi Vaidyanathan, Frank J. Boria, James Pluta, Josh Kiihne, Brian K. Taylor, Robert H. Bledsoe, Peter G. Ifju, and Roger D. Quinn	
19	Towards a Self-Deploying and Gliding Robot	271
	Mirko Kovač, Jean-Christophe Zufferey, and Dario Floreano	
20	Solar-Powered Micro-air Vehicles and Challenges in Downscaling	285
	André Noth and Roland Siegart	
21	Technology and Fabrication of Ultralight Micro-Aerial Vehicles	299
	Adam Klaptocz and Jean-Daniel Nicoud

Flying Insects and Robots

Floreano, D.; Zufferey, J.-C.; Srinivasan, M.; Ellington, C.
(Eds.)

2010, XII, 316 p., Hardcover

ISBN: 978-3-540-89392-9
