

Contents

Part I Perspectives and Regional Syntheses	1
1 Biogeochemistry of Continental Margins in a Global Context	3
<i>Kon-Kee Liu, Larry Atkinson, Renato A. Quiñones and Liana Talaue-McManus</i>	
1.1 Dimensions of the Continental Margin	4
1.2 Evolving Views	5
1.3 Scope	7
1.4 Characterization of Continental Margins	9
1.5 A Global Perspective	20
2 Eastern Boundary Current Systems	25
2.1 An Overview of Eastern Boundary Current Systems	25
<i>Renato A. Quiñones</i>	
2.2 The Northern and Central California Coastal Upwelling System	29
<i>J. Timothy Pennington, Gernot E. Friederich, Carmen G. Castro, Curt A. Collins, Wiley W. Evans and Francisco P. Chavez</i>	
2.3 The Humboldt Current System	44
<i>Renato A. Quiñones, Marcelo H. Gutiérrez, Giovanni Daneri, Dimitri Gutiérrez Aguilar, Humberto E. González and Francisco P. Chavez</i>	
2.4 The Benguela Current System	65
<i>Pedro M.S. Monteiro</i>	
2.5 The Northwest African Margin	78
<i>Gerhard Fischer, Susanne Neuer, Robert Davenport, Peer Helmke, Reiner Schlitzer, Oscar Romero, Volker Ratmeyer, Barbara Donner, Tim Freudenthal, Helge Meggers and Gerold Wefer</i>	
2.6 Iberian Margin: The Rías	103
<i>Xosé Antón Álvarez-Salgado, Alberto Vieira Borges, Francisco Gómez Figueiras and Lei Chou</i>	
3 Western Boundary Currents	121
3.1 Western Boundary Current Overview	121
<i>Larry P. Atkinson</i>	

3.2	The Kuroshio and the East China Sea	124
	<i>Kon-Kee Liu, Gwo-Ching Gong, Chau-Ron Wu, and Hung-Jen Lee</i>	
3.3	The Gulf Stream	146
	<i>Richard A. Jahnke and Jackson O. Blanton</i>	
3.4	The Brazil Current: Physical–Biogeochemical Domains	153
	<i>Eduardo Marone, Bastiaan A. Knoppers, Weber F.L. de Souza, Ilson C. da Silveira, and Sueli S. de Godoi</i>	
4	Indian Ocean Margins	171
4.1	An Overview of Indian Ocean Margins	171
	<i>S.W.A. Naqvi</i>	
4.2	Carbon and Nitrogen Fluxes in the North Indian Ocean	180
	<i>S.W.A. Naqvi, Hema Naik, Witty D’Souza, P.V. Narvekar, A.L. Paropkari and H.W. Bange</i>	
4.3	The Agulhas Current	192
	<i>Dan Baird</i>	
4.4	The Leeuwin Current	197
	<i>Ming Feng and Karen Wild-Allen</i>	
5	Subpolar Margins	211
5.1	An Overview of the Subpolar Margins	211
	<i>Jonathan Sharples</i>	
5.2	The Northeast Atlantic Margins	215
	<i>John M. Huthnance</i>	
5.3	Northwest Atlantic Continental Shelf	234
	<i>David W. Townsend and William G. Ellis</i>	
5.4	The Continental Shelf of the South-Western Atlantic Ocean	248
	<i>Jorge E. Marcovecchio, Rubén Hugo Freije and Pedro J. Depetris</i>	
5.5	The Southern Chile Continental Margin	265
	<i>Silvio Pantoja, José L. Iriarte, Marcelo H. Gutiérrez and Carolina Calvete</i>	
5.6	New Zealand Continental Margins	273
	<i>John Zeldis, Murray Hicks, Noel Trustrum, Alan Orpin, Scott Nodder, Keith Probert, Ude Shankar and Kim Currie</i>	
6	Polar Margins	289
6.1	An Overview of Cross-Shelf Carbon Exchanges in Polar Margins	289
	<i>Walker O. Smith</i>	
6.2	The Arctic Ocean	291
	<i>Robie W. Macdonald, Leif G. Anderson, John P. Christensen, Lisa A. Miller, Igor P. Semiletov and Rudy Stein</i>	
6.3	The Ross Sea	303
	<i>Giulio Catalano, Giorgio Budillon, Rosabrina La Ferla, Paolo Povero, Mariangela Ravaoli, Vincenzo Saggiomo, Alessandra Accornero, Maurizio Azzaro, Gian Carlo Carrada, Federico Giglio, Leonardo Langone, Olga Mangoni, Cristina Misic and Monica Modigh</i>	
6.4	Antarctic Continental Margins	318
	<i>Walker O. Smith, Jill A. Peloquin and David M. Karl</i>	

7	Marginal Seas	331
7.1	An Overview of the Marginal Seas <i>Chen-Tung Arthur Chen</i>	331
7.2	The Baltic Sea <i>Helmuth Thomas, Janusz Pempkowiak, Fred Wulff and Klaus Nagel</i>	334
7.3	The North Sea <i>Helmuth Thomas, Yann Bozec, Hein de Baar, Khalid Elkalay, Michel Frankignoulle, Wilfried Kühn, Hermann Lenhart, Andreas Moll, Johannes Pätsch, Günther Radach, Laure-Sophie Schiettecatte and Alberto Vieira Borges</i>	346
7.4	The Black Sea and the Turkish Straits System <i>Temel Oguz and Suleyman Tugrul</i>	355
7.5	The Mediterranean Sea: The Shelf–Slope Systems <i>Xavier Durrieu de Madron, Wolfgang Ludwig, Giuseppe Civitarese, Miroslav Gacic, Maurizio Ribera d’Alcalà, Patrick Raimbault, Eva Krasakopoulou and Catherine Goyet</i>	364
7.6	The East Sea (Sea of Japan) <i>Dong-Jin Kang, Jae-Yeon Kim, Tongsup Lee and Kyung-Ryul Kim</i>	383
7.7	Okhotsk Sea <i>Andrey Andreev and Galina Pavlova</i>	394
7.8	The Mississippi River Plume and Adjacent Margin in the Gulf of Mexico <i>Wei-Jun Cai and Steven E. Lohrenz</i>	406
8	Tropical Margins	423
8.1	An Overview of Tropical Margins <i>G.J. Brunskill</i>	423
8.2	The Tropical Brazilian Continental Margin <i>Tim C. Jennerjahn, Bastiaan A. Knoppers, Weber F.L. de Souza, Carlos E.V. Carvalho, Gesine Mollenhauer, Matthias Hübner and Venugopalan Ittekkot</i>	427
8.3	The Amazon Shelf <i>Joseph M. Smoak</i>	443
8.4	The Outer Amazon Plume: An Atmospheric CO ₂ Sink <i>Arne Körtzinger</i>	450
8.5	The Cariaco Basin: CARIACO Oceanographic Time Series <i>Frank E. Muller-Karger, Ramon Varela, Robert C. Thunell, Mary I. Scranton, Gordon T. Taylor, Yrene Astor, C. R. Benitez-Nelson, Laura Lorenzoni, Kent A. Fanning, Eric Tappa, Miguel A. Goñi, Digna Rueda, and Chuanmin Hu</i>	454
8.6	The South China Sea <i>K.-K. Liu, C.-M. Tseng, C.-R. Wu and I.-I. Lin</i>	464
8.7	Tropical Coastal Seas of Australia and Papua New Guinea <i>Gregg J. Brunskill, I. Zagorskis and J. Pfitzner</i>	482

Part II Arising Issues and New Approaches	495
9 Examining Human Impacts on Global Biogeochemical Cycling Via the Coastal Zone and Ocean Margins	497
<i>Liana Talaue-McManus</i>	
9.1 Introduction	497
9.2 Human Activities Along the Catchment–Coast Continuum	498
9.3 Large-Scale Impacts on Coastal and Shelf Biogeochemical Cycles	503
9.4 Governing the Catchment–Coast Continuum	508
10 Biogeochemical Transformations of Silicon Along the Land–Ocean Continuum and Implications for the Global Carbon Cycle	515
<i>Olivier Ragueneau, Daniel J. Conley, Dave J. DeMaster, Hans H. Dürr and Nicolas Dittert</i>	
10.1 Introduction	515
10.2 Why Do We Need to Quantify Si Fluxes on Continental Margins?	515
10.3 How to Reconstruct Si Fluxes on Continental Margins	518
10.4 What Do We Know About Processes Controlling Si Delivery/Retention Along the LOC?	521
10.5 Anthropogenic Perturbations of Si cycle	525
10.6 Conclusions	526
11 Submarine Groundwater Discharge (SGD) and Associated Nutrient Fluxes to the Coastal Ocean	529
<i>Guebuem Kim and P.W. Swarzenski</i>	
11.1 Introduction	529
11.2 Estimation of SGD Using Geochemical Tracers	531
11.3 Nutrient Fluxes Through SGD	535
11.4 Biogeochemical and Ecological Influences of SGD in the Coastal Ocean	537
11.5 Conclusions and Recommendations	537
12 Coupled Circulation/Biogeochemical Models to Estimate Carbon Flux	539
<i>John R. Moisan</i>	
12.1 Introduction	539
12.2 Box Models	540
12.3 One-Dimensional (Vertical) Models	541
12.4 Three-Dimensional-Coupled Circulation/Biogeochemical Models	544
12.5 Specific 3D-Coupled Model Implementations	550
12.6 Future Directions	554
Part III Cross-Boundary Fluxes and Global Synthesis	559
13 Cross-Boundary Exchanges of Carbon and Nitrogen in Continental Margins	561
<i>Chen-Tung Arthur Chen</i>	
13.1 Introduction	561
13.2 A Net Source or Sink of Atmospheric CO ₂ ?	562
13.3 The Mass Balances	566

13.4	Production and Regeneration of Organic Matter	567
13.5	The pCO ₂ of the Continental Margins	571
13.6	Response of the Global Continental Margins	572
13.7	Conclusions	573
14	Carbon–Nitrogen–Phosphorus Fluxes in the Coastal Zone: The LOICZ Approach to Global Assessment	575
	<i>Stephen V. Smith, Dennis P. Swaney and Liana Talaue-McManus</i>	
14.1	Background	575
14.2	Analytical Methods and a Strategy for Progress	575
14.3	Beginning to Synthesize the Results	577
14.4	Concluding Remarks	586
15	Sediment and Carbon Accumulation on Continental Shelves	587
	<i>Shu Gao</i>	
15.1	Introduction	587
15.2	Processes of Material Supply, Transport, and Deposition	588
15.3	Patterns of Continental Shelf Sedimentation	591
15.4	Carbon Burial in Relation to Sedimentary Processes	594
16	Global Synthesis	597
	<i>Richard A. Jahnke</i>	
16.1	Introduction	597
16.2	The Continental Margin Environment and Definition	597
16.3	Summary of Fluxes	600
16.4	Synthesis of Margin Classifications and Summary of Global Margin Fluxes	611
16.5	Summary and Concluding Remarks	615
A	Technical Supports to the CMTT Synthesis	617
A.1	Information and Data Management for the CMTT Synthesis	617
	<i>Nicolas Dittert, Michael Diepenbroek and Hannes Grobe</i>	
A.2	Introduction to SeaWiFS/MODIS Chlorophyll Data Products and Data Analysis Tools	620
	<i>Chuanmin Hu, I.-I. Lin and Chun-Chi Lien</i>	
B	A Guide to Future Research on Continental Margin Biogeochemistry	625
	<i>Kon-Kee Liu, Nancy N. Rabalais and Jack Middelburg</i>	
C	Web-Based Electronic Supplements	627
	<i>Kon-Kee Liu and Nicolas Dittert</i>	
C.1	Electronic Reference Libraries	627
C.2	Electronic Glossary: Acronyms, Abbreviations, and Terminology	627
C.3	Colored Version of Some Figures	627
C.4	Bathymetric Maps of Continental Margins	627
C.5	Errata	627
C.6	Additional Electronic Resources	628
C.7	Feedback Channel	628
	References	629
	Index	721

Carbon and Nutrient Fluxes in Continental Margins

A Global Synthesis

Liu, K.-K.; Atkinson, L.; Quinones, R.; Talaue-McManus, L.

(Eds.)

2010, XXVIII, 741 p., Hardcover

ISBN: 978-3-540-92734-1
