1	Introduction	1
	References	10
Part I Transmitters and Receivers		
2	Transmitter Design	15
2.1	Transmitter Components	15
2.1.1	Lasers	15
2.1.2	External Optical Modulators	18
2.1.3	Pulse Carvers and Impulse Shapers	21
2.2	Multi-Level Signaling	23
2.3	ASK Transmitters	23
2.4	DPSK Transmitters	25
2.4.1	Serial DPSK Transmitter	26
2.4.2	Parallel DPSK Transmitter	27
2.4.3	Differential Encoding	28
2.4.4	Signal Properties	32
2.5	Star QAM Transmitters	34
2.6	Square QAM Transmitters	37
2.6.1	Differential Quadrant Encoding	37
2.6.2	Serial Square QAM Transmitter	38
2.6.3	Conventional IQ Transmitter	42
2.6.4	Enhanced IQ Transmitter	47
2.6.5	Tandem-QPSK Transmitter	51
2.6.6	Multi-Parallel MZM Transmitter	52
2.6.7	Signal Properties	54
	References	56
3	Receiver Configurations	59
3.1	Receiver Components	59
3.1.1	Optical and Electrical Filters	59

3.1.2	Delay Line Interferometer	61
3.1.3	2×4 90° Hybrid	62
3.1.4	3×3 Coupler	65
3.2	Direct Detection Receivers	66
3.2.1	Direct Detection Receiver with DLIs	67
3.2.2	Direct Detection IQ Receiver with 2×4 90° Hybrid	71
3.2.3	Data Recovery for Differential Detection	73
3.3	Fundamentals of Coherent Detection	79
3.3.1	Coherent Detection Principle	79
3.3.2	Coherent Detection with Amplifier Noise	82
3.3.3	Optical Quadrature Frontend	84
3.3.4	Polarization Diversity	85
3.4	Homodyne Receivers with Differential Detection	86
3.4.1	Phase Diversity Receivers	86
3.4.2	Digital Differential Demodulation	91
3.5	Homodyne Receivers with Synchronous Detection	93
3.5.1	Carrier Synchronization Techniques	94
3.5.2	Optical Phase Locked Loop	95
3.5.3	Digital Phase Estimation	99
3.5.4	Data Recovery for Synchronous Detection	111
	References	116
4	Effort Comparison	119
4.1	Transmitter Complexity and Feasibility	119
4.2	Receiver Complexity and Feasibility	122
Part II System Performance		
5	System Simulation Aspects	127
5.1	Data Sequences	127
5.2	Eye Opening Penalty for Multi-Level Eyes	131
5.3	Monte Carlo Simulations	132
5.4	Semi-Analytical BER Estimation	133
5.4.1	DBPSK Direct Detection	133
5.4.2	Extension to Higher-Order DPSK and Star QAM	138
	References	140
6	Fiber Propagation Effects	143
6.1	Fiber Attenuation	144
6.2	Chromatic Dispersion	145
6.3	Kerr Nonlinearities	147
6.4	Other Propagation Effects	150
6.4.1	Nonlinear Scattering Effects	151
6.4.2	Polarization Mode Dispersion	151
6.4.3	Nonlinear Phase Noise	152
	References	154
