Contents

1 Soft Computing Methods for Global, Local and Personalized Modeling and Applications in Bioinformatics
Nikola Kasabov ........................................................... 1

2 Orthosymmetry Aspects of Aggregation Functions
Koen C. Maes, Bernard De Baets ................................. 19

3 MOGA Design of Neural Network Predictors of Inside Temperature in Public Buildings
A.E. Ruano, E.M. Crispim, P.M. Frazão ................................. 35

4 Model Based Anytime Soft Computing Approaches in Engineering Applications
Annamária R. Várkonyi-Kóczy ........................................... 63

5 A Multi-structure Modeling Methodology
Nathalie Pessel, Jean Duplaix, Jean-François Balmat, Frédéric Lafont ................................. 93

6 The Generalized Dombi Operator Family and the Multiplicative Utility Function
József Dombi ................................................................. 115

7 Multi-channel Representations of Max-Plus Algebra Based Wavelet Transform and Their Application to Video Coding
Hajime Nobuhara, Barnabás Bede .................................... 133

8 The Fuzzy-Interpolative Methodology
Marius M. Balas ............................................................. 145

9 Interpolative-Type Control Solutions
Sanda Dale, Toma-Leonida Dragomir .................................. 169

Author Index ................................................................. 205
Soft Computing Based Modeling in Intelligent Systems
Balas, V.E.; Fodor, J.; Várkonyi-Kóczy, A.R. (Eds.)
2009, IX, 205 p., Hardcover
ISBN: 978-3-642-00447-6
