

Contents

Some Canonical Structures of Cartan Planes in Jet Spaces and Applications	1
Ricardo J. Alonso, Sonia Jiménez, and Jesús Rodríguez	
Transformations of Darboux Integrable Systems	21
Ian M. Anderson and Mark E. Fels	
Differential Geometric Heuristics for Riemannian Optimal Mass Transportation	49
Philippe Delanoë	
On Rank Problems for Planar Webs and Projective Structures	75
Vladislav V. Goldberg and Valentin V. Lychagin	
Niceness Theorems	107
Michiel Hazewinkel	
The Polynomial Algebra and Quantizations of Electromagnetic Fields	151
Hilja L. Huru	
A Bridge Between Lie Symmetries and Galois Groups	159
Nail H. Ibragimov	
Focal Systems for Pfaffian Systems with Characteristics	173
Niky Kamran	
Hamiltonian Structures for General PDEs	187
P. Kersten, I.S. Krasil'shchik, A.M. Verbovetsky, and R. Vitolo	
Point Classification of Second Order ODEs: Tresse Classification Revisited and Beyond	199
Boris Kruglikov	
Classification of Monge–Ampère Equations	223
Alexei G. Kushner	

On Nonabelian Theories and Abelian Differentials	257
A. Marshakov	
Geometric Aspects of the Quantization of a Rigid Body	275
M. Modugno, C. Tejero Prieto, and R. Vitolo	
Shooting for the Eight: A Topological Existence Proof for a Figure-Eight Orbit of the Three-Body Problem	287
Richard Moeckel	
Compatible Poisson Brackets, Quadratic Poisson Algebras and Classical r-Matrices	311
V. Roubtsov and T. Skrypnik	
Contact Geometry of Second Order I	335
Keizo Yamaguchi

Differential Equations - Geometry, Symmetries and Integrability

The Abel Symposium 2008

Kruglikov, B.; Lychagin, V.; Straume, E. (Eds.)

2009, XIV, 386 p. 1 illus. in color., Hardcover

ISBN: 978-3-642-00872-6
