

# Contents

<b>Introduction</b> .....	1
<b>1 Key Assumptions Underpinning a Systems Approach to Leadership</b> ...	5
1.1 Introduction .....	5
1.2 High Complexity and Uncertainty in Organisations Today .....	5
1.3 Naturalistic World View .....	6
1.4 The Dynamics of “Actual Practice” .....	7
1.5 Individual Functioning and Cognition .....	8
1.6 Three Levels of Simplicity .....	10
1.7 Holistic Thinking and Systems Methods .....	12
1.8 Optimising An Entity .....	13
1.9 Your Own Practice .....	14
1.10 Conclusion .....	15
<b>2 A Systems Approach to Leadership Overview</b> .....	17
2.1 Introduction .....	17
2.2 A Systems Approach to Leadership Overview .....	18
2.3 Understanding a Systems Approach to Leadership .....	19
2.4 Fundamental Assumptions .....	20
2.5 Systems Models and Methods .....	21
2.6 Adaptive Systems Model .....	22
2.7 Cognition-Systems Model of Organisation Performance .....	22
2.8 Achieving Goals in High Complexity Environments .....	24
2.9 Strategy / Approach .....	25
2.9.1 Performance .....	25
2.9.2 Whole System Development .....	26
2.9.3 Leaders as System Builders .....	26
2.9.4 Continuous Development .....	26
2.9.5 Multiple Methods .....	27
2.10 The Cognition-Systems Method .....	27

- 2.11 Individual and Organisational Actions Strategies, Processes and Skills ..... 28
  - 2.11.1 Preparing Yourself for the Journey ..... 29
  - 2.11.2 Naturalistic Enquiry ..... 29
  - 2.11.3 Critical Reflection and Learning ..... 29
  - 2.11.4 Whole System Diagnosis and Adaptive System Organisation Design ..... 29
- 2.12 A Systems Approach to Leadership Outcomes ..... 29
  - 2.12.1 Competitive Advantage ..... 30
  - 2.12.2 In Depth (Not a Quick Fix) ..... 30
- 2.13 Conclusion ..... 30
- 3 Two Different Worlds ..... 33**
  - 3.1 Introduction ..... 33
  - 3.2 A Naturalistic Environment ..... 34
  - 3.3 A Deterministic Environment ..... 36
  - 3.4 Underpinning Assumptions ..... 38
  - 3.5 Using Both World Views ..... 41
  - 3.6 Conclusion ..... 42
- 4 Holistic and Reductionist Approaches ..... 43**
  - 4.1 Introduction ..... 43
  - 4.2 Reductionist Approaches and Organisations ..... 44
  - 4.3 Mismatching Situation and Approach ..... 44
    - 4.3.1 Holistic Approaches in a Naturalistic Situation ..... 45
    - 4.3.2 Holistic Approaches in a Deterministic Situation ..... 45
    - 4.3.3 Reductionist Approaches in a Deterministic Situation ..... 45
    - 4.3.4 Reductionist Approaches in a Naturalistic Situation ..... 46
  - 4.4 Optimising Complex Systems ..... 48
  - 4.5 A Low Performance Dynamic ..... 49
  - 4.6 A High Performance Dynamic ..... 51
  - 4.7 Conclusion ..... 51
- 5 Features of a Naturalistic Environment ..... 53**
  - 5.1 Introduction ..... 53
  - 5.2 Inherently Unknowable ..... 53
  - 5.3 Probabilistic ..... 54
  - 5.4 Highly Interconnected ..... 56
  - 5.5 Related to Consciousness and Mind ..... 58
  - 5.6 Various Forms of Human System ..... 59
  - 5.7 Dynamics and Emergence ..... 60
  - 5.8 Conclusion ..... 61
- 6 Systems Methods ..... 63**
  - 6.1 Introduction ..... 63
  - 6.2 Order and Organisation in the Natural World ..... 63

- 6.3 Systems and Related Methods ..... 64
- 6.4 General Systems Theory ..... 65
- 6.5 Systems Concepts and Principles ..... 66
  - 6.5.1 Outcomes Result From System and Environment ..... 67
  - 6.5.2 Adaptive Systems Model ..... 68
  - 6.5.3 Optimisation ..... 68
  - 6.5.4 Emergence ..... 68
  - 6.5.5 Requisite Variety ..... 69
  - 6.5.6 Redundancy ..... 69
  - 6.5.7 Recursion ..... 69
  - 6.5.8 Equifinality ..... 69
  - 6.5.9 System Evolution ..... 70
  - 6.5.10 Natural Limits ..... 70
  - 6.5.11 Far From Equilibrium Systems ..... 70
- 6.6 Conclusion ..... 73
  
- 7 An Adaptive Systems Model ..... 75**
  - 7.1 Introduction ..... 75
  - 7.2 Adaptive Systems Model Overview ..... 75
    - 7.2.1 Essential Functions (Operations) ..... 76
    - 7.2.2 Regulation ..... 78
    - 7.2.3 Coordination ..... 79
    - 7.2.4 Strategy ..... 80
    - 7.2.5 Purpose ..... 81
    - 7.2.6 Natural Tendencies ..... 81
    - 7.2.7 Knowledge, Learning and Adaptation ..... 82
  - 7.3 Integrating the Parts into a Whole ..... 82
  - 7.4 System Dysfunction ..... 83
  - 7.5 Recursion ..... 83
  - 7.6 Limitations ..... 84
  - 7.7 Conclusion ..... 84
  
- 8 The Cognition-Systems Model of Organisation Performance ..... 85**
  - 8.1 Introduction ..... 85
  - 8.2 Layers Influencing Performance ..... 85
  - 8.3 Organisation Performance Defined ..... 86
    - 8.3.1 Stakeholders ..... 86
    - 8.3.2 Time ..... 87
  - 8.4 Dynamics of an Organisation (as a System) “In Action” ..... 88
    - 8.4.1 As a “Whole System” ..... 88
    - 8.4.2 External Strategy ..... 89
  - 8.5 Individual Leader Functioning ..... 89
    - 8.5.1 Leader-Organisation Interaction ..... 90
    - 8.5.2 Leader Cognition and Knowledge-in-action ..... 90

- 8.6 Discussion ..... 93
- 8.7 A Definition of Organisational Leadership ..... 93
- 8.8 Conclusion ..... 94
  
- 9 EGA Emergent Goal Achievement ..... 95**
  - 9.1 Introduction ..... 95
  - 9.2 Like Early Explorers and Pioneers ..... 95
  - 9.3 Expand the Margin Through Cycles of Action  
and Understanding ..... 96
  - 9.4 An Everyday Example ..... 97
  - 9.5 A General Method ..... 98
  - 9.6 A Four Part Cycle ..... 99
  - 9.7 Using EGA Emergent Goal Achievement Effectively ..... 100
    - 9.7.1 Start Now (Wherever That Happens to Be) ..... 101
    - 9.7.2 Head in the General Direction of Goals ..... 101
    - 9.7.3 Target Points of Highest Leverage ..... 101
    - 9.7.4 Take Action on Multiple Fronts ..... 102
    - 9.7.5 Actively Pursue Cycles at Every Opportunity ..... 102
    - 9.7.6 Stretch Understanding ..... 104
    - 9.7.7 Stretch Action ..... 105
    - 9.7.8 Creatively Generate Ideas for Action ..... 106
    - 9.7.9 Evaluate and Undertake Another Cycle ..... 107
  - 9.8 Goal Achievement in a Deterministic Environment ..... 107
  - 9.9 Comparison of Approaches to Goal Achievement ..... 108
  - 9.10 Adaptive Strategic Planning ..... 109
  - 9.11 Conclusion ..... 109
    - 9.11.1 Exercise ..... 110
  
- 10 CSM The Cognition-Systems Method ..... 111**
  - 10.1 Introduction ..... 111
  - 10.2 The Cognition-Systems Method Overview ..... 111
    - 10.2.1 Continuous Learning and Improvement ..... 112
    - 10.2.2 Start with Yourself ..... 114
    - 10.2.3 Develop All Forms of Organisational Entity ..... 115
  - 10.3 The Cognition-Systems Method Steps ..... 115
    - 10.3.1 Prepare Yourself for the Journey ..... 117
    - 10.3.2 Select a Problem, Issue or Situation ..... 118
    - 10.3.3 Assemble an Account of the Situation ..... 118
    - 10.3.4 Critical Reflection and Learning ..... 120
    - 10.3.5 Design Creative New Action ..... 122
    - 10.3.6 Take Action ..... 123
    - 10.3.7 Evaluation ..... 123
  - 10.4 Discussion ..... 123
  - 10.5 Influencing Others ..... 124
  - 10.6 Method Overview and Pointers ..... 124

- 10.6.1 Externally ..... 124
- 10.6.2 Internally ..... 124
- 10.7 Conclusion ..... 125
- 11 Preparing Yourself for the Journey ..... 127**
  - 11.1 Introduction ..... 127
  - 11.2 Emotions ..... 128
  - 11.3 Thinking for Optimum Performance and Emotions ..... 130
    - 11.3.1 Thinking and Talking in Ways That Embrace  
(Rather Than Ignore) Complexity ..... 131
    - 11.3.2 Recognising the Probability of Long Term Goal  
Achievement ..... 132
    - 11.3.3 Defining Success and Satisfaction More Locally ..... 133
    - 11.3.4 Thinking in Terms of Preferences Rather Than  
Demands ..... 134
    - 11.3.5 Maintaining Yourself ..... 136
    - 11.3.6 Building New Habits ..... 137
  - 11.4 Conclusion ..... 137
- 12 Naturalistic Enquiry ..... 139**
  - 12.1 Introduction ..... 139
    - 12.1.1 Using the Cognition-Systems Model of Organisation  
Performance as a Guide ..... 139
    - 12.1.2 Valuing Local Understanding ..... 140
    - 12.1.3 Different to Deterministic Enquiry ..... 140
    - 12.1.4 Largely Subjective ..... 141
  - 12.2 Some Everyday Examples ..... 142
  - 12.3 The Process of Naturalistic Enquiry ..... 143
    - 12.3.1 Assembling Currently Available Data ..... 143
    - 12.3.2 Collecting Data ..... 144
    - 12.3.3 Interpreting Data ..... 145
    - 12.3.4 The Role of a Knowledge Base ..... 146
  - 12.4 Making Enquiry Rapid, Effective and Robust ..... 147
    - 12.4.1 Asking Questions ..... 147
    - 12.4.2 Listening ..... 148
    - 12.4.3 The Influence of Context ..... 148
    - 12.4.4 Your Own Motivation, Assumptions and Attitude ..... 149
    - 12.4.5 Recognise the Limits of Individual Perception ..... 150
    - 12.4.6 Valuing Diversity ..... 150
    - 12.4.7 Actively Seeking Disconfirming Data ..... 151
    - 12.4.8 Distinguish Data from Interpretation ..... 151
    - 12.4.9 Being “Data Driven” ..... 151
    - 12.4.10 Pursuing Greater Precision ..... 152
    - 12.4.11 Using Short Cycles to Test Data and Interpretation ..... 152

- 12.4.12 Using Different Processes ..... 153
- 12.4.13 Collaboration and Engagement ..... 154
- 12.5 Conclusion ..... 154
- 13 Critical Reflection and Learning ..... 155**
  - 13.1 Introduction ..... 155
  - 13.2 Learning From Experience ..... 156
  - 13.3 Critical Reflection and Learning Overview ..... 157
  - 13.4 A Method of Critical Reflection and Learning ..... 158
    - 13.4.1 Step A. Creating a Learning Environment ..... 160
    - 13.4.2 Step B. Assemble an Account of the Situation  
and Map of Learner’s Knowledge-in-action ..... 160
    - 13.4.3 Step C. Critical Examination ..... 162
    - 13.4.4 Step D. Select an Alternative Perspective ..... 163
    - 13.4.5 Step E. Dialectic (A Learning Conversation) ..... 164
    - 13.4.6 Step F. Make Learning Explicit ..... 166
    - 13.4.7 Step G. Test and Reinforce New Insights ..... 166
    - 13.4.8 Step H. Joint Evaluation ..... 166
  - 13.5 Accelerating Learning ..... 167
  - 13.6 Conclusion ..... 167
- 14 Whole System Diagnosis ..... 169**
  - 14.1 Introduction ..... 169
  - 14.2 Concepts for Describing Whole Systems ..... 170
    - 14.2.1 Elegance ..... 170
    - 14.2.2 Optimisation ..... 170
    - 14.2.3 Dysfunction ..... 171
    - 14.2.4 Naturalistic and Inherently Unknowable ..... 171
    - 14.2.5 Evolving Not Static ..... 171
    - 14.2.6 Whole System “In Action” ..... 171
    - 14.2.7 Connections and Dynamics ..... 172
    - 14.2.8 Drawing Lines Between Parts ..... 172
    - 14.2.9 The Process of Enquiry Will Disturb the System to  
Some Extent ..... 172
  - 14.3 The Steps of Whole System Diagnosis ..... 172
    - 14.3.1 Identify the System of Interest ..... 173
    - 14.3.2 Describe the Characteristics of the External Environment . 173
    - 14.3.3 Describe the System in Overview ..... 174
    - 14.3.4 Describe the System’s Internal Functioning ..... 175
    - 14.3.5 Project the Dynamics of System and Environment  
into the Future ..... 176
    - 14.3.6 Identify Development Fronts to Move  
the System Closer to Optimisation ..... 177
  - 14.4 Whole System Diagnosis Worksheet ..... 177
  - 14.5 Conclusion ..... 179

<b>15</b>	<b>Adaptive System Organisation Design</b>	181
15.1	Introduction	181
15.2	Adaptive System Organisation Design	181
15.3	Individual Level	182
15.3.1	Task Related Factors	183
15.3.2	Social Factors	184
15.3.3	The Impact of Poorly Designed Individual Work	184
15.3.4	Individual Level Design Check Questions	186
15.4	Work Unit Level	186
15.4.1	Boundary Location	187
15.4.2	Task Processes	188
15.4.3	Standards and Procedures	189
15.4.4	Indicators and Feedback	189
15.4.5	Coordination	189
15.4.6	Goals and Planning	190
15.4.7	Knowledge, Learning and Adaptation	190
15.4.8	Improvement and Learning	190
15.4.9	Creating Alignment and Resolving Conflict	191
15.4.10	Natural Tendencies	191
15.4.11	Work Unit Roles	191
15.4.12	Boundary Conditions	192
15.4.13	External Support	192
15.4.14	Training	192
15.4.15	Recruiting and Selection	193
15.4.16	Reward System	193
15.4.17	Work Unit Design Check Questions	193
15.5	Whole Organisation / Business Unit Level	193
15.5.1	Strategy Development and Refinement	194
15.5.2	Adaptive Strategic Planning	195
15.5.3	Strategy Implementation Through Integrating Work Units	195
15.5.4	Ongoing Whole System Optimisation	196
15.5.5	Internal Culture and Alignment	197
15.5.6	Meeting External Corporate Requirements	197
15.5.7	Whole Organisation Design Check Questions	197
15.6	Undertaking a (Re)design	198
15.7	Conclusion	198
<b>16</b>	<b>Applications of a Systems Approach to Leadership</b>	199
16.1	Introduction	199
16.2	Common Process Features	199
16.2.1	Focus on Real and Pressing Issues	199
16.2.2	Counteract a High Action Orientation	200
16.2.3	Use Data From Actual Practice	200
16.2.4	Acknowledge and Promote Different Perspectives	201

- 16.2.5 Focus on Participant Learning and Shared Understanding ..... 201
- 16.2.6 Adapt the Process Emergently ..... 202
- 16.3 Four Applications of a Systems Approach to Leadership ..... 202
  - 16.3.1 Ongoing Whole System Optimisation ..... 203
  - 16.3.2 Complex Problem Solving ..... 203
  - 16.3.3 Individual Leadership Development ..... 204
  - 16.3.4 Undertaking Organisation (Re)Design ..... 204
- 16.4 Conclusion ..... 205
  
- 17 Conclusion ..... 207**
  - 17.1 Forward into Action ..... 207
  
- Appendix A: The Theory and Philosophy of a Systems Approach to Leadership ..... 209**
  
- Appendix B: Learning Journals ..... 215**
  
- References ..... 217**
  
- Index ..... 219**

A Systems Approach to Leadership  
How to Create Sustained High Performance in a  
Complex and Uncertain Environment

Coffey, G.

2010, XIV, 223 p., Hardcover

ISBN: 978-3-642-01193-1
