Contents

Part I Soil Tillage

1 Draught Requirement During Tillage ............................................. 3
   Johan Arvidsson and Thomas Keller

2 Influence of Soil Tillage on Soil Compaction ................................. 19
   Barbora Badalíková

3 Vibrated Tillage Tools ................................................................. 31
   László Fenyvesi and Zoltán Hudoba

4 Soil Disturbance and Soil Fragmentation During Tillage .............. 51
   Thomas Keller and Johan Arvidsson

Part II Soil Dynamics Traffic and Traction

5 Robotics and Sustainability in Soil Engineering ......................... 69
   S. Fountas, T.A. Gemtos, and S. Blackmore

6 Soil Density Increases resulting from Alternative Tire and Rubber Track Configurations in Laboratory and Field Conditions ................................................................. 81
   Dirk Ansorge and Richard John Godwin

7 Effects of Heavy Agricultural Machines for Sugar Beet Harvesting on Physical Soil Properties ............................ 91
   Rupert Geischeder, Markus Demmel, and Robert Brandhuber

8 Controlled Traffic Farming ............................................................. 101
   G.D. Vermeulen, J.N. Tullberg, and W.C.T. Chamen
9 Subsoil Compaction - Cause, Impact, Detection, and Prevention ........................................................... 121
  Gunner Halfer and Karl Heinrich Hartge

10 Testing of Soil Tillage Machinery .................................................. 147
  Daniele Pochi and Roberto Fanigliulo

Part III  Soil Management and Mechanical Weed Control

11 Mechanical Weed Control .......................................................... 171
  Hans W. Griepentrog and Athanasios P. Dedousis

12 Characterisation of Soil Variability with Depth Using Vis–NIR Spectra and Chemometric Tools ........................................ 181
  A.M. Mouazen, R. Karoui, J. De Baerdemaeker, and H. Ramon

13 Considerations for Recycling of Compost and Biosolids in Agricultural Soil .......................................................... 195
  Maria I. Kokkora, Diogenes L. Antille, and Sean F. Tyrrel

Index .......................................................................................... 217
Soil Engineering
Dedousis, A.P.; Bartzanas, Th. (Eds.)
2010, XII, 230 p. 93 illus., Hardcover
