Contents

Possible Climate Change Scenarios with Specific Reference to Mediterranean Regions ........................................... 1
Josep Calbó

Effects of Hydrologic Alterations on the Ecological Quality of River Ecosystems .............................................. 15
Sergi Sabater and Klement Tockner

Metal Ecotoxicology in Fluvial Biofilms: Potential Influence of Water Scarcity .................................................. 41
Helena Guasch, Alexandra Serra, Natàlia Corcoll, Berta Bonet, and Manel Leira

Consequences of Climate Variability and Human Water Demand on Freshwater Ecosystems: A Mediterranean Perspective from the United States .................................................. 55
Clifford N. Dahm

Water Quality in Reservoirs Under a Changing Climate .............. 73
Rafael Marcé and Joan Armengol

Technologies for Water Regeneration and Integrated Management of Water Resources ........................................ 95
François Brissaud

Reuse of Regenerated Waters Under Water Scarcity .................. 107
Inma Ortiz, Raquel Ibáñez, Ane Miren Urtiaga, and Pedro Gómez

Joaquim Comas and Manel Poch

Water-Borne Infectious Disease Outbreaks Associated with Water Scarcity and Rainfall Events ............................ 147
Juan Jofre, Anicet R. Blanch, and Francisco Lucena
Implications of Water Quality on Irrigation Practices Under Water Scarcity ................................................................. 161 Faycel Chenini

Effects of Wastewater Treatment Plants on Stream Nutrient Dynamics Under Water Scarcity Conditions ............................. 173 Eugènia Martí, Joan Lluís Riera, and Francesc Sabater

Occurrence and Fate of Pharmaceuticals and Illicit Drugs Under Water Scarcity ............................................................... 197 Mira Petrovic, Cristina Postigo, Miren Lopez de Alda, Antoni Ginebreda, Meritxell Gros, Jelena Radjenovic, and Damià Barceló

Index ............................................................................................................ 229
Water Scarcity in the Mediterranean Perspectives Under Global Change
Sabater, S.; Barceló, D. (Eds.)
2010, XVI, 234 p. 46 illus., Hardcover
ISBN: 978-3-642-03970-6
