Contents

Multi-Objective Stochastic Programming Approaches for Supply Chain Management ................................................................. 1
Amir Azaron, Kai Furmans, and Mohammad Modarres

A Review of Goal Programming for Portfolio Selection ....................... 15
Rania Azmi and Mehrdad Tamiz

A Hypervolume-Based Optimizer for High-Dimensional Objective Spaces ............................................................................ 35
Johannes Bader and Eckart Zitzler

Minimizing Vector Risk Measures ..................................................... 55
Alejandro Balbás, Beatriz Balbás, and Raquel Balbás

Multicriteria Programming Approach to Development Project Design with an Output Goal and a Sustainability Goal .................. 71
Enrique Ballestero

Automated Aggregation and Omission of Objectives for Tackling Many-Objective Problems ..................................................... 81
Dimo Brockhoff and Eckart Zitzler

Trade-Off Analysis in Discrete Decision Making Problems Under Risk .................................................................................. 103
Maciej Nowak

Interactive Multiobjective Optimization for 3D HDR Brachytherapy Applying IND-NIMBUS ......................................................... 117
Henri Ruotsalainen, Kaisa Miettinen, and Jan-Erik Palmgren

Multicriteria Ranking Using Weights Which Minimize the Score Range .................................................................................... 133
Chris Tofallis
In Search of a European Paper Industry Ranking in Terms of Sustainability by Using Binary Goal Programming ......................... 141
Roberto Voces, Luis Diaz-Balteiro, and Carlos Romero

Nurse Scheduling by Fuzzy Goal Programming .......................... 151
Mehrdad Tamiz and Mohammed Ali Yaghoobi
New Developments in Multiple Objective and Goal Programming
Jones, D.; Tamiz, M.; Ries, J. (Eds.)
2010, X, 163 p. 23 illus., Softcover
ISBN: 978-3-642-10353-7
