

Contents

1	General Framework: Policy Making as a Problem with Multiple Criteria	1
1.1	Introduction	1
1.2	Methodological Proposal	3
1.3	Elements of the Proposal and Structure of the Book	5
	References	7
2	Economic Policy Using Applied General Equilibrium Models: An Overview	9
2.1	Introduction	9
2.2	An Overview of General Equilibrium Modelling	10
2.3	From General Equilibrium Theory to Applied General Equilibrium	13
2.4	What Is an Applied General Equilibrium Model?	14
2.5	Main Elements of an Applied General Equilibrium Model	15
2.6	Parameter Specification	19
2.6.1	Calibration Processes or Numeric Instrumentation	19
2.6.2	Econometric Estimates	21
2.7	Benchmark Equilibrium	21
2.8	Main Applications of Applied General Equilibrium Models	23
2.9	Conclusions: Advantages and Disadvantages of Applied General Equilibrium Models	25
	References	27
3	Basic Aspects of the Multiple Criteria Decision Making Paradigm	33
3.1	Introduction	33
3.2	The Traditional Decision Paradigm and the MCDM Approach	34
3.3	Some Basic Concepts and Definitions	35
3.3.1	Attributes	36

- 3.3.2 Objectives 36
- 3.3.3 Aspiration Levels or Targets 36
- 3.3.4 Goals 36
- 3.3.5 Criterion 37
- 3.3.6 Pareto Optimality 37
- 3.3.7 Trade-Offs Among Criteria 38
- 3.3.8 Payoff Matrix 38
- 3.4 A General Distance Function Based Upon
a Family of p -Metrics 38
- 3.5 Multiobjective Programming: The Generation
of the Pareto Frontier 40
- 3.6 Compromise Programming: Approximation
to an Ideal Solution 42
- 3.7 Satisficing Logic and Goal Programming 44
- 3.8 Is There a Best MCDM Method for Economic Policy Design? 48
- 3.9 A Historical Summary: The “Pioneers of South Carolina”
or the Influence of the “Young Turks” 49
- 3.10 Some Final Remarks 51
- References 52

4 Multicriteria Economic Policies: General Ideas

- and Some Previous Experiences** 55
- 4.1 Introduction 55
- 4.2 General Setting 56
- 4.3 Building Efficient Policies in Terms of Growth and Inflation 59
 - 4.3.1 Preliminaries 59
 - 4.3.2 Identifying the Set of Efficient Policies 60
 - 4.3.3 Testing the Efficiency of Observed Policies 62
 - 4.3.4 Policy Recommendations 62
- 4.4 Towards the Ideal Point: Building Compromise Policies 64
 - 4.4.1 Preliminaries and Setting 64
 - 4.4.2 Obtaining the Compromise Set 65
 - 4.4.3 Reducing the Size of the Compromise Set 66
 - 4.4.4 Evaluating the Observed Policy 67
- 4.5 Designing Efficient Subsidy Policies in a Regional Economy 68
 - 4.5.1 Preliminaries 69
 - 4.5.2 Stating the Policy Design Problem 70
 - 4.5.3 A Bi-Criteria Problem: Output Variations
Versus Agricultural Profit 71
 - 4.5.4 A Problem with more than Two Criteria 73
- 4.6 Concluding Remarks 77
- References 78

5	Building a CGE Model for Economic and Environmental Policies ...	79
5.1	Introduction	79
5.2	Technology and Producer Behaviour	80
5.3	Demand, Preferences and Consumer Behaviour	82
5.4	Modelling Pollution Emissions and Emissions Charges	83
5.5	The Public Sector: Taxes and Expenditures	84
5.6	Markets for Production Inputs	85
5.7	Foreign Sector and Closure Rule	86
5.8	Databases and Calibration	86
	References	87
6	Designing Efficient Policies in Terms of Economic and Environmental Objectives	89
6.1	Introduction	89
6.2	Setting the Policy Design Exercise	90
6.2.1	Policy Instruments	90
6.3	Efficient Policies Regarding Growth and Emissions	92
6.4	Efficient Policies with more than Two Criteria	94
6.5	Conclusions	98
	References	99
7	Compromise Policies: An Integration of Economic and Environmental Criteria	101
7.1	Introduction	101
7.2	Preliminaries	102
7.3	Obtaining the Compromise Set with Two Objectives	103
7.4	Interpreting the Compromise Set	104
7.5	Constructing the Compromise Set with more than Two Policy Objectives	106
7.6	Evaluating the Observed Policy	109
7.7	Concluding Remarks	110
	References	110
8	Joint Design of Economic and Environmental Policies: A Simonian Satisficing Approach	113
8.1	Introduction	113
8.2	Policy Setting: Objectives and Instruments. The Payoff Matrix	115
8.3	Searching for a Satisficing Joint Policy	116
8.4	Balanced Satisficing Policies	119
8.5	Establishing a Hierarchy for the Policy Goals	120
8.6	Concluding Remarks	122
	References	122

- 9 Proposal for an Alternative Multicriteria Policy Approach**
- Based on Welfare Functions** 125
- 9.1 Introduction 125
- 9.2 Basic Concepts and Notation 126
- 9.3 Two Classical Approaches for Social Policy Making 127
- 9.4 An Alternative Proposal Based on Compromise Programming 128
- 9.5 A Computable Version 130
- 9.6 Conclusions and Discussion 132
- References 132

- 10 Conclusions and Further Research** 135
- 10.1 Conclusion 135
- 10.2 Discussion and Guidelines for Future Research 137
- References 139

Designing Public Policies
An Approach Based on Multi-Criteria Analysis and
Computable General Equilibrium Modeling
Andre, F.; Cardenete, M.A.; Romero, C.
2010, XVIII, 180 p. 15 illus., Softcover
ISBN: 978-3-642-12182-1
