

Contents

1	The Perfect Human Machine	1
1.1	Biomaterials: Philosophical Background	1
1.2	Staying Alive Despite the Second Law	4
1.3	Scaling of Plants and Animals	4
1.4	Definitions	12
2	The Failing Human Machine	19
2.1	A Total Hip Replacement	19
2.2	Strength and Response to Load	25
2.2.1	Stainless Steel	27
2.2.2	Cobalt–Chrome alloys	30
2.2.3	Titanium Alloys	32
2.3	Skeletal Tissue	37
2.3.1	Cartilage	38
2.4	Total Hip Replacement Register	45
2.5	Homage to a Pioneer: Sir John Charnley	49
3	Corrosion	51
3.1	It Should not Have Happened	51
3.2	Water Does not Flow Uphill	53
3.2.1	Electrochemical Series	55
3.2.2	Pourbaix Diagram	56
3.2.3	Corrosion Rate	58
3.2.4	Styles in Corrosion	62
3.3	Does It All Fit the Practice of Implants?	68
3.4	A Conclusion	69
4	Intoxicated by Implants?	71
4.1	Trace and Essential Trace Elements	72
4.2	Toxicity	73
4.2.1	Complex Formation	74
4.2.2	Metallothionein	75
4.2.3	Multiple Interactions	76

4.3	Immunotoxicology	79
4.4	Gulliver and the Lilliputians	81
4.5	Sensitivity to Metal Implants	85
4.5.1	Stainless Steels	86
4.5.2	Cobalt–Chromium Alloys	88
4.5.3	Titanium Alloys	91
4.6	Wear Debris	94
4.7	And the Answer Is?	95
4.8	Postscript	96
5	Zirconium and Other Newcomers	99
5.1	Excellent But Just not Enough?	99
5.2	Zirconium, a Newcomer?	101
5.3	Tantalum and Niobium	109
5.4	Alloys with a Future?	118
5.5	Postscript	120
6	Long Bones	121
6.1	Plaster of Paris	121
6.2	Corollary Between Mineral and Biological Evolution: An Excursion in the Dark Ages	122
6.3	Thermoplastic Polymers	125
6.4	External Fixators	125
6.5	Exploring the Future	129
6.6	Osteosynthesis	133
6.7	G.A. Ilizarov	135
7	Layer by Layer	137
7.1	Computer-Aided Design	137
7.2	Electron Beam Melting	139
7.3	Selective Laser Melting of Metal Powder	142
7.4	Stereolithography of Polymers	144
7.5	Characterization of Porous Structures	147
7.6	Conclusion	148
8	Metal Implants Bound to Disappear	151
8.1	Soluble Metals?	152
8.2	Prospecting for the Best	156
8.3	Hope?	157
8.4	Mg Foams	160
8.5	In Vitro and In Vivo	161
8.6	Conclusion	162
9	A 7,000 Year Old Story: Ceramics	165
9.1	Greek Pottery, a Useful Intermezzo?	165
9.2	Ceramics, Impossible to Define?	167

9.3	Ceramics.....	168
9.3.1	High Performance	168
9.3.2	Low Performance	182
9.4	Glass and Glass–Ceramics	182
9.4.1	Bioactive Glasses	183
9.4.2	Glass–Ceramics	185
9.5	Coatings	186
9.6	General Conclusion	188
10	Dental Materials	191
10.1	Difficulties to “Bridge”	192
10.2	Amalgam	193
10.3	Composite Alternatives	196
10.3.1	Adhesives	199
10.3.2	Restorative Composites	203
10.4	Orthodontics.....	205
10.5	Implants	211
10.6	Ceramics.....	211
10.7	Calcium Phosphates	213
10.8	Postscript	217
11	The Perfect Prosthesis?	219
11.1	The Isoelastic Prosthesis.....	219
11.2	Polymers for Implants	221
11.3	Why Is a Polymer Like PMMA Transparent to Visible Light?	229
11.4	Polyethyleneterephthalate.....	230
11.5	Polyamide	231
11.6	Was the Isoelastic Concept a Good Idea?.....	231
11.7	Heraclitus, 2500 Years Old and Still Alive	233
11.8	We Shall Overcome... Do We?.....	235
11.9	Thermoplastic Elastomers	238
11.9.1	Polyurethane.....	238
11.9.2	Thermoplastic Polyolefins	238
11.10	Conclusion	242
12	Heart Valve Substitutes	243
12.1	Introduction: Valve Explants	243
12.2	The Natural Heart Valves	244
12.2.1	The Aortic Valve	245
12.2.2	Aortic Valve Substitutes	247
12.3	Soft Tissue Biomechanics	254
12.4	Blood-Material Interactions	255
12.5	Anticoagulants	262
12.6	Blood Flow Through the Heart Valves	264
12.7	Epilogue-Future	266

13 Tissue Engineering: Regenerative Medicine	269
13.1 It Has Been Described Before!	269
13.2 Basic Scheme of Tissue Engineering	270
13.3 Scaffolds.....	272
13.3.1 Materials	272
13.3.2 Porosity and Architecture	273
13.3.3 Scaffold Surface Chemistry and Topography	274
13.3.4 Mechanical Properties	275
13.3.5 Degradation Kinetics.....	276
13.3.6 Fabrication Techniques	277
13.4 Biomolecules and Cells.....	279
13.4.1 Biomolecules	279
13.4.2 Cells.....	280
13.5 Tissue Engineered Heart Valves.....	281
13.6 Vascular Grafts	282
13.6.1 Synthetic Vascular Grafts	283
13.6.2 Stents	285
13.6.3 Tissue Engineered Blood Vessels.....	287
14 Water	291
14.1 Origin of Life	292
14.2 The Water Molecule	293
14.3 Conclusion	299
15 Closing Dinner Speech	301
A Physical Data	303
B Crystallographic Structures	307
B.1 Crystal Systems	307
B.1.1 Unit Cells	307
B.1.2 Slip Planes	309
B.1.3 Dislocations	309
B.1.4 Diffusionless or Displacive Transformation	310
B.2 Ceramics.....	310
C Electrochemical Series	313
C.1 Equilibrium Electrochemical Series	313
C.2 Pitting Potentials and Re-passivating Time	316
D Simulated Body Fluids	317
References	319
Index	333

Biomaterials

A Tantalus Experience

Helsen, J.A.; Missirlis, Y.

2010, XVI, 340 p., Hardcover

ISBN: 978-3-642-12531-7
