

# Table of Contents

## Part I Introduction

<b>1</b>	<b>Principal–Agent Problem</b>	3
1.1	Problem Formulation	3
1.2	Further Reading	6
	References	6
<b>2</b>	<b>Single-Period Examples</b>	7
2.1	Risk Sharing	7
2.2	Hidden Action	8
2.3	Hidden Type	10
2.4	Further Reading	14
	References	14

## Part II First Best: Risk Sharing Under Full Information

<b>3</b>	<b>Linear Models with Project Selection, and Preview of Results</b>	17
3.1	Linear Dynamics and Control of Volatility	17
3.1.1	The Model	17
3.1.2	Risk Sharing, First Best Solution	18
3.1.3	Implementing the First Best Solution	20
3.1.4	Optimal Contract as a Function of Output	21
3.1.5	Examples	22
3.2	Further Reading	24
	References	24
<b>4</b>	<b>The General Risk Sharing Problem</b>	25
4.1	The Model and the PA Problem	25
4.2	Necessary Conditions for Optimality	26
4.2.1	FBSDE Formulation	27
4.2.2	Adjoint Processes	28
4.2.3	Main Result	28

- 4.3 Sufficient Conditions for Optimality . . . . . 30
- 4.4 Optimal Contracts . . . . . 31
  - 4.4.1 Implementing the First Best Solution . . . . . 31
  - 4.4.2 On Uniqueness of Optimal Contracts . . . . . 32
- 4.5 Examples . . . . . 34
  - 4.5.1 Linear Dynamics . . . . . 34
  - 4.5.2 Nonlinear Volatility Selection with Exponential Utilities . . . . . 35
  - 4.5.3 Linear Contracts . . . . . 37
- 4.6 Dual Problem . . . . . 38
- 4.7 A More General Model with Consumption and Recursive Utilities . . . . . 40
- 4.8 Further Reading . . . . . 43
- References . . . . . 43

**Part III Second Best: Contracting Under Hidden Action—The Case of Moral Hazard**

- 5 Mathematical Theory for General Moral Hazard Problems . . . . . 47**
  - 5.1 The Model and the PA Problem . . . . . 47
  - 5.2 Lipschitz Case . . . . . 51
    - 5.2.1 Agent’s Problem . . . . . 51
    - 5.2.2 Principal’s Problem . . . . . 54
    - 5.2.3 Principal’s Problem Based on Principal’s Target Actions . . . . . 57
    - 5.2.4 Principal’s Problem Based on Principal’s Target Actions: Another Formulation . . . . . 60
  - 5.3 Quadratic Case . . . . . 64
    - 5.3.1 Agent’s Problem . . . . . 64
    - 5.3.2 Principal’s Problem . . . . . 67
  - 5.4 Special Cases . . . . . 69
    - 5.4.1 Participation Constraint at Time Zero . . . . . 69
    - 5.4.2 Separable Utility and Participation Constraint at Time Zero . . . . . 72
    - 5.4.3 Infinite Horizon . . . . . 74
    - 5.4.4 HJB Approach in Markovian Case . . . . . 76
  - 5.5 A More General Model with Consumption and Recursive Utilities . . . . . 77
  - 5.6 Further Reading . . . . . 83
  - References . . . . . 84
- 6 Special Cases and Applications . . . . . 85**
  - 6.1 Exponential Utilities and Lump-Sum Payment . . . . . 85
    - 6.1.1 The Model . . . . . 85
    - 6.1.2 Necessary Conditions Derived from the General Theory . . . . . 86
    - 6.1.3 A Direct Approach . . . . . 90
    - 6.1.4 A Solvable Special Case with Quadratic Cost . . . . . 93
  - 6.2 General Risk Preferences, Quadratic Cost, and Lump-Sum Payment . . . . . 94
    - 6.2.1 The Model . . . . . 94

- 6.2.2 Necessary Conditions Derived from the General Theory . . . 94
- 6.2.3 A Direct Approach . . . . . 98
- 6.2.4 Example: Risk-Neutral Principal and Log-Utility Agent . . . 100
- 6.3 Risk-Neutral Principal and Infinite Horizon . . . . . 103
  - 6.3.1 The Model . . . . . 103
  - 6.3.2 Necessary Conditions Derived from the General Theory . . . 103
  - 6.3.3 A Direct Approach . . . . . 106
  - 6.3.4 Interpretation and Discussion . . . . . 109
  - 6.3.5 Further Economic Conclusions and Extensions . . . . . 110
- 6.4 Further Reading . . . . . 112
- References . . . . . 113
  
- 7 An Application to Capital Structure Problems: Optimal Financing of a Company . . . . . 115**
  - 7.1 The Model . . . . . 115
  - 7.2 Agent’s Problem . . . . . 117
  - 7.3 Principal’s Problem . . . . . 121
    - 7.3.1 Principal’s Problem Under Participation Constraint . . . . . 121
    - 7.3.2 Properties of the Principal’s Value Function . . . . . 125
    - 7.3.3 Optimal Contract . . . . . 126
  - 7.4 Implementation Using Standard Securities . . . . . 129
  - 7.5 Comparative Statics . . . . . 130
    - 7.5.1 Example: Agent Owns the Firm . . . . . 131
    - 7.5.2 Computing Parameter Sensitivities . . . . . 131
    - 7.5.3 Some Comparative Statics . . . . . 133
  - 7.6 Further Reading . . . . . 134
  - References . . . . . 134
  
- Part IV Third Best: Contracting Under Hidden Action and Hidden Type—The Case of Moral Hazard and Adverse Selection**
  
- 8 Adverse Selection . . . . . 137**
  - 8.1 The Model and the PA Problem . . . . . 137
    - 8.1.1 Constraints Faced by the Principal . . . . . 138
  - 8.2 Quadratic Cost and Lump-Sum Payment . . . . . 138
    - 8.2.1 Technical Assumptions . . . . . 139
    - 8.2.2 Solution to the Agent’s Problem . . . . . 140
    - 8.2.3 Principal’s Relaxed Problem . . . . . 143
    - 8.2.4 Properties of the Candidate Optimal Contract . . . . . 144
  - 8.3 Risk-Neutral Agent and Principal . . . . . 145
  - 8.4 Controlling Volatility . . . . . 149
    - 8.4.1 The Model . . . . . 149
    - 8.4.2 Main Result: Solving the Relaxed Problem . . . . . 150
    - 8.4.3 Comparison with the First Best . . . . . 152
  - 8.5 Further Reading . . . . . 153
  - References . . . . . 153

**Part V Backward SDEs and Forward-Backward SDEs**

**9 Backward SDEs** . . . . . 157

9.1 Introduction . . . . . 157

9.1.1 Example: Option Pricing and Hedging . . . . . 158

9.2 Linear Backward SDEs . . . . . 159

9.3 Well-Posedness of BSDEs . . . . . 160

9.4 Comparison Theorem and Stability Properties of BSDEs . . . . . 165

9.5 Markovian BSDEs and PDEs . . . . . 170

9.5.1 Numerical Methods . . . . . 172

9.6 BSDEs with Quadratic Growth . . . . . 173

9.7 Further Reading . . . . . 181

References . . . . . 181

**10 Stochastic Maximum Principle** . . . . . 183

10.1 Stochastic Control of BSDEs . . . . . 183

10.2 Stochastic Control of FBSDEs . . . . . 188

10.3 Stochastic Control of High-Dimensional BSDEs . . . . . 195

10.4 Stochastic Optimization in Weak Formulation . . . . . 203

10.4.1 Weak Formulation Versus Strong Formulation . . . . . 203

10.4.2 Sufficient Conditions in Weak Formulation . . . . . 205

10.4.3 Necessary Conditions in Weak Formulation . . . . . 211

10.4.4 Stochastic Optimization for High-Dimensional BSDEs . . . . . 215

10.4.5 Stochastic Optimization for FBSDEs . . . . . 218

10.5 Some Technical Proofs . . . . . 221

10.5.1 Heuristic Derivation of the Results of Sect. 4.7 . . . . . 221

10.5.2 Heuristic Derivation of the Results of Sect. 5.5 . . . . . 222

10.5.3 Sketch of Proof for Theorem 5.2.12 . . . . . 224

10.6 Further Reading . . . . . 226

References . . . . . 227

**11 Forward-Backward SDEs** . . . . . 229

11.1 FBSDE Definition . . . . . 229

11.2 Fixed Point Approach . . . . . 230

11.3 Four-Step Scheme—The Decoupling Approach . . . . . 236

11.4 Method of Continuation . . . . . 243

11.5 Further Reading . . . . . 247

References . . . . . 248

**References** . . . . . 249

**Index** . . . . . 253
