## Contents

### Part I  Introduction

1  Motivation ................................................................. 3

2  Goals ........................................................................ 7
   Reference ................................................................. 9

3  Setting the Stage and Outline ................................. 11

### Part II  Cosmic Radiation

4  Introduction to Cosmic Radiation ..................................... 17

5  The Cosmic Radiation Near Earth ............................... 19
   5.1 Introduction and History of Cosmic Ray Research .......... 19
   5.2 The “Rosetta Stone” of Paleocosmic Ray Studies .......... 21
   5.3 Some Important Definitions .................................. 22
   5.4 The Origin and Properties of the Galactic Cosmic Radiation .... 27
   5.5 Our Variable Sun ................................................. 33
   5.6 The Heliosphere, the Termination Shock, and the Current Sheet .... 41
   5.7 Modulation of the Cosmic Radiation in the Heliosphere .......... 44
      5.7.1 The Cosmic Ray Propagation Equation ...................... 45
      5.7.2 The Local Interstellar Spectrum .......................... 48
      5.7.3 The Cosmic Ray Modulation Function and Potential ...... 51
      5.7.4 Practical Applications of the Modulation Function .......... 59
      5.7.5 Drift Effects (qA Positive and qA Negative Effects) .......... 60
      5.7.6 Shock Wave Effects (The Forbush Decrease and GMIRs) .... 62
