Table of Contents

Some Future Software Engineering Opportunities and Challenges .......... 1
  Barry Boehm

Seamless Method- and Model-based Software and Systems Engineering . 33
  Manfred Broy

Logical Abstract Domains and Interpretations ................................. 48
  Patrick Cousot, Radhia Cousot, and Laurent Mauborgne

Design Patterns – Past, Present & Future (Abstract) .......................... 72
  Erich Gamma

Evidential Authorization ..................................................................... 73
  Andreas Blass, Yuri Gurevich, Michał Moskal and Itay Neeman

Engineering and Software Engineering ............................................. 100
  Michael Jackson

Tools and Behavioral Abstraction: A Direction for Software Engineering . 115
  K. Rustan M. Leino

Precise Documentation: The Key to Better Software ............................. 125
  David Lorge Parnas

Empirically Driven Software Engineering Research (Abstract) ............... 149
  Dieter Rombach

Component-based Construction of Heterogeneous Real-time Systems in BIP (Abstract) ................................................................. 150
  Joseph Sifakis

Computer Science: A Historical Perspective and a Current Assessment (Abstract) ................................................................. 151
  Niklaus Wirth

Internet Evolution and the Role of Software Engineering ....................... 152
  Pamela Zave

Mining Specifications: A Roadmap ....................................................... 173
  Andreas Zeller

Afterword

Greetings to Bertrand on the Occasion of his Sixtieth Birthday ............... 183
  Tony Hoare
