Contents

1 The Regional Dimension of Globalization: Past Trends and Future Scenarios ................................................................. 1
  1.1 The Need for a Regional Dimension .................................. 1
  1.2 The Conceptual Approach Behind the Study ......................... 4
  1.3 Methodological Requirements: Identification of Open Regions ...... 8
  1.4 The Need for a Scenario Exercise ................................... 10
  1.5 Structure of the Book ................................................... 12

Part I National and Regional Globalization Processes

2 The EU in the Global Economy ............................................. 17
  2.1 The EU Between Globalization and Integration Processes .......... 17
  2.2 International Trade Patterns .......................................... 19
   2.2.1 The International Framework .................................... 19
   2.2.2 The EU in Global Trade Markets: Intra- Vs. Extra-EU Trade .......................................................... 22
   2.2.3 International Trade in Services .................................. 27
  2.3 Spatial Patterns of FDI ................................................... 29
   2.3.1 FDI at World Level .................................................. 29
   2.3.2 Foreign Firms in the EU27: Geographical Patterns ............ 31
   2.3.3 Foreign Firms in the EU27: Sectoral Patterns .................. 32
  2.4 Conclusions .................................................................... 33
Annex 2.1 FDIRegio Dataset: Its Structure and Its Consistency with Official Data ......................................................... 35

3 Globalization and the Reshaping of Regional Economies: Favored Territories ............................................................ 39
  3.1 Globalization and New Opportunities for Regional Economies ..... 39
  3.2 Globalization of Tasks .................................................... 41
  3.3 Off-Shoring and Outsourcing of Service Functions .................. 45
3.4 Deindustrialization and the Rising of Service Economy .......... 47
3.5 Decentralization of Intertwined Functions .......................... 48
3.6 Conclusions ....................................................................... 49

Part II Globalization and Regional Economic Growth Patterns

4 Global Regions in Europe .................................................. 53
  4.1 Measuring Globalization at Regional Level ...................... 53
  4.2 Measuring Globalization: Two Logical Dimensions .......... 54
  4.3 Gateways for Globalization ........................................... 55
  4.4 Openness to Globalization ............................................ 57
    4.4.1 The Elements of a Globalization Indicator ................. 57
    4.4.2 A Synthetic Globalization Indicator ......................... 59
  4.5 Sectoral Specialization and Globalization ....................... 60
    4.5.1 The Reasons to Define Open Growing Sectors ............. 60
    4.5.2 The Identification of Open Growing Sectors .............. 65
  4.6 Global Regions in Europe: Empirical Results ................. 69
  4.7 A Structural Profile of European Global Regions ............ 72
  4.8 Conclusions: Toward an Interpretation of the Performance 
    of Global Regions .................................................. 83
Annex 4.1 The IGEAT Matrix of Sectoral/Regional Employment 
    and GVA Data .................................................. 84
Annex 4.2 Data Sources .................................................... 84

5 Spatial Patterns of Globalization Trends ......................... 87
  5.1 Describing Spatial Globalization Patterns: A Challenging Task .. 87
  5.2 Spatial FDI Patterns ................................................ 89
    5.2.1 The Origin of FDI .......................................... 89
    5.2.2 Did Globalization Drive FDI Patterns of Location? ....... 97
    5.2.3 FDI Patterns by Typology of Economic Activity: 
      Industry Versus Services ..................................... 99
  5.3 New Forms of Globalization Trends ............................ 107
    5.3.1 Relocation of Functions and Tasks ........................ 107
    5.3.2 Deindustrialization and the Rising of the Service 
      Economy ......................................................... 110
    5.3.3 Decentralization of Intertwined Functions ............... 116
  5.4 Globalization Challenges for Local Economies ............. 122
    5.4.1 Some Methodological Aspects .............................. 122
    5.4.2 Relocation of Functions/Tasks and Productivity Growth ... 123
    5.4.3 Deindustrialization, the Rise of the Service Economy 
      and Productivity Growth ..................................... 130
6 European Regional Performance in a Globalized World

6.1 Regional Endogenous Growth: The Role of Territorial Capital

6.2 Regions Benefiting from Globalization

6.2.1 Regional Performances in Europe in Recent Years

6.2.2 Identification of Benefiting Regions

6.3 Structural Features of Benefiting Regions

6.3.1 Structural Features of Benefiting Global Players

6.3.2 Structural Features of Benefiting Regional Players

6.4 Common Behaviours Among Regions

6.4.1 Winning Behaviours for Global Players

6.4.2 Winning Behaviours for Regional Players

6.5 Success Factors for Regional Growth: An Interpretative Approach

6.5.1 Methodological Aspects: Spatial Heterogeneity

6.5.2 The Choice of Success Factors and the Basic Regional Growth Model

6.5.3 Success Factors for European Regions

6.5.4 Spatial Heterogeneity of Success Factors

6.5.5 Regional Endowment of Success Factors

6.6 Globalization and Regional Disparities

6.7 Conclusions

Annex 6.1 Regional Variables

7 Regional Attractiveness and Its Determinants

7.1 Regional Attractiveness and FDI Determinants

7.2 Factors Affecting Regional Attractiveness

7.2.1 The Traditional Factors

7.2.2 Empirical Results

7.3 The Role of Globalization and the Country Effect

7.3.1 Spatial Heterogeneity

7.3.2 Global Vs. Non-Global Regions

7.3.3 Region Vs. Country Dynamics

7.3.4 Sector and Firm Heterogeneity

7.4 Conclusions

Annex 7.1 Regional Database
Part III  Globalization Scenarios for European Regions

8  Scenario Methodology: A New MASST Model  ...................... 217
8.1 Quantitative Foresights .............................................. 217
8.2 A New Version of the MASST Model  ......................... 220
8.3 Characteristics and Structure of the New MASST Model ........ 221
8.4 The National Component of the MASST Model ............... 227
8.5 The Regional Component of the MASST Model ............... 230
  8.5.1 The Differential Component ................................. 230
  8.5.2 The Sectoral Component .................................... 233
8.6 The Demographic Subcomponent .................................. 238
8.7 The Generative and Distributive Nature of the MASST Model:
  The Simulation Algorithm .......................................... 241
8.8 Conclusions ...................................................... 243
Annex 8.1 National and Regional Database .......................... 244

9  Globalization and European Strategies: Alternative Scenarios ..... 249
9.1 Introduction .................................................... 249
9.2 Present Challenges for the World’s Economies .................. 251
  9.2.1 Challenges in Globalization Trends ......................... 251
  9.2.2 Challenges for European Economies .......................... 252
  9.2.3 The Economic Crisis ...................................... 253
  9.2.4 Demographic Trends and Challenges ....................... 254
  9.2.5 European Transport Infrastructure Policy Choices .......... 255
  9.2.6 Energy Source Policy Choices .............................. 255
9.3 Present Trends: The Baseline Scenario ............................. 256
9.4 Globalization, European Strategies, and the Economic
  Crisis: Logical Combination of the Driving Forces .............. 257
9.5 The Main Features of Two Alternative Scenarios ............... 260
  9.5.1 A Proactive Europe in a High-Quality Competitive World
  and in a Rapid Economic Crisis Recovery Framework ......... 260
  9.5.2 A Defensive Europe in a Price-Competitive World
  and in a Slow Recovery from Economic
  Crisis Framework .................................................. 266
9.6 From Qualitative to Quantitative Assumptions: The Levers
  of the MASST Model .............................................. 267
9.7 Conclusions ...................................................... 269
Annex 9.1 Quantitative Assumptions .................................. 271

10 The European Territory in 2020: Winners and Losers
  in a Globalized World ............................................. 275
10.1 Introduction .................................................... 275
10.2 An Aggregate Perspective ....................................... 276
10.3 Regional Performance: A Perspective by Types of Regions .... 277
  10.3.1 Results for Global, Regional, and Local Players ........... 277
  10.3.2 Who Gains from an Aggressive Scenario? .................... 281
  10.3.3 Winners and Losers in the Past and in 2020 ............... 284
10.4 Regional Performance in the Three Scenarios ................. 287
  10.4.1 Regional Performance in the Baseline Scenario ............. 287
  10.4.2 Regional Performance in the Proactive Scenario .......... 291
  10.4.3 Regional Performance in the Defensive Scenario .......... 295
10.5 Regional Disparities in the Three Scenarios .................. 299
  10.5.1 The Evolution of Regional Disparities in the Three
          Scenarios .................................................. 299
  10.5.2 Disparities Between and Within Types of Regions ...... 300
10.6 Conclusions ...................................................... 302

11 Towards a Conclusion: Policy Implications ..................... 305
  11.1 Introduction .................................................. 305
  11.2 The Role of National Policies in a Period of Globalization ... 306
  11.3 The Role of Regional Policies in a Period of Globalization ... 308
    11.3.1 Territorial Capital: The Need for Regional
          Tailor-Made Policies ......................................... 308
    11.3.2 Regional Policy Style ................................... 312
    11.3.3 The Rationale for Regional Policy ....................... 315
  11.4 The Rationale for Structural Policies in a Period
          of Economic Crisis .......................................... 317
  11.5 Conclusions ...................................................... 321

References ........................................................... 325
