Contents

Part I  Adenovirus Epithelial Keratitis

1  The Morphology of Adenovirus Epithelial Keratitis  
   Adenovirus Cytopathic Effect in Cell Cultures  
   Rounded/Abnormal Cells in Human Adenovirus Epithelial Keratitis  
   Cyst-Like Structures; Fluorescein Staining  
   Fluorescein and Rose Bengal Staining  
   Epithelial Infiltrates 1  
   Epithelial Infiltrates 2  
   Addendum 1. Toxic Effect of Rose Bengal Dye  
   Addendum 2. Conjunctival Changes  

2  Adenovirus Type 8 Epithelial Keratitis: The Development, 
   Accompanying Signs, and Sequelae  
   Case 1: EKC: An Occupational Hazard  
   Case 2: A Sequel of a Friendly Visit  
   Case 3: Anterior Uveitis and Nosocomial Infection  
   Case 4: A Case of a Caring Wife  
   Case 5: Nosocomial Infection After Suture Removal  
   Case 6: Nosocomial Infection After Applanation Tonometry  
   Case 7: A Woman Infected by a Caring Relative  
   Case 8: A Potential Source of a Nosocomial Outbreak  
   Case 9: Nosocomial Infection in a Contact Lens Wearer  
   Case 10: Nosocomial Infection in Corneal Erosion  

3  Adenovirus Epithelial Keratitis Caused by Various Serotypes  
   (Ad3, 4, and 7)  
   Case 1: Adenovirus: Which Serotype?  
   Case 2: Pharyngoconjunctival Fever  
   Case 3: Adenovirus Type 7 in a Contact Lens Wearer and Her Family  
   Case 4: Red Eye: A Diagnostic Clue  
   Case 5: Adenovirus or Thygeson’s Keratitis?  
   Case 6: Adenovirus or HSV Epithelial Keratitis?  
   Case 7: Adenovirus Infection: A Clinical Diagnosis
4 The Development of Subepithelial Infiltrates:  
A Sequence of Events ........................................ 55
Survey 1 ..................................................... 56
Survey 2 ..................................................... 57
3 Weeks After Onset ........................................ 58
4 Weeks After Onset ........................................ 59
5 Weeks After Onset ........................................ 60
7 Weeks After Onset ........................................ 61
11 Weeks After Onset ...................................... 62
13 Weeks After Onset ...................................... 63
16 Weeks After Onset ...................................... 64
18 Weeks After Onset ...................................... 65
5 Months After Onset ...................................... 66
6 Months After Onset ...................................... 67
7.5 Months After Onset .................................... 68
8.5 Months After Onset .................................... 69
9.5 and 11.5 Months After Onset ....................... 70
13 and 15 Months After Onset ............................ 71
1 Year and 6 Months After Onset ....................... 72
2 Years and 5 Months After Onset ....................... 73
2 Years and 8.5 Months, and 3 Years After Onset .... 75

Part II Thygeson’s Superficial Punctate Keratitis

5 The Morphology of Thygeson’s Superficial Punctate Keratitis (TSPK) .................. 79
Shapes and Sizes of TSPK Epithelial Lesions .......... 80
Rounded/Abnormal Cells in TSPK ...................... 81
Fluorescein Sodium Staining of TSPK Epithelial Lesions ........ 82
Rose Bengal Staining of TSPK Epithelial Lesions .... 83
The In-between Areas in TSPK (1) ....................... 84
The In-between Areas in TSPK (2) ....................... 85

6 Typical Cases of Thygeson’s Punctate Epithelial Keratitis (TSPK) .................. 87
Case 1: A 24-Year History of TSPK ..................... 88
Case 2: A 27-Year History of TSPK with Remissions and Exacerbations .... 90
Case 3: A Happy End (?) After 25 Years of TSPK ........ 92
Case 4: A 20-Year History of TSPK ..................... 94

7 Three Atypical Cases of Thygeson’s Superficial Punctate Keratitis (TSPK) .......... 97
Case 1: A Recurrence of an HSV Dendrite? ............. 98
Case 2: Who Dares to Operate the Cataract? ............ 104
Case 3: A Peculiar Epithelial Keratitis .................. 112

Final Remark .................................................. 127

Bibliography .................................................. 129

Index ........................................................... 131
Adenovirus Epithelial Keratitis and Thygeson's Superficial Punctate Keratitis
In Vivo Morphology in the Human Cornea
