## Contents

### Part I  Primer to Modeling with MATLAB®

1 **Introduction**  
   1.1 Environmental Modeling Using MATLAB®  
   1.2 Introduction to MATLAB®  
      1.2.1 Getting Started with MATLAB®  
      1.2.2 Matrices in MATLAB®  
      1.2.3 Basic Matrix Operations  
   1.3 A Simple Environmental Model  
   1.4 MATLAB® Graphics – The Figure Editor  
   1.5 MATLAB® Help System  
   References

2 **Fundamentals of Modeling, Principles and MATLAB®**  
   2.1 Model Types  
   2.2 Modeling Steps  
   2.3 Fundamental Laws  
      2.3.1 Conservation of Mass  
      2.3.2 Conservation of Momentum  
      2.3.3 Conservation of Energy  
   2.4 Continuity Equation for Mass  
   2.5 MATLAB® M-files  
   2.6 Ifs and Loops in MATLAB®  
   2.7 Debugging of M-files  
   Reference

3 **Transport**  
   3.1 The Conservation Principle  
   3.2 Fick’s Law and Generalizations  
      3.2.1 Diffusion  
      3.2.2 Dispersion  
   References

References
9 Ordinary Differential Equations: Dynamical Systems
9.1 Streeter-Phelps Model for River Purification
9.2 Details of Michaelis–Menten or Monod Kinetics
9.3 1D Steady State Analytical Solution
9.4 Redox Sequences
References

10 Parameter Estimation
10.1 Introduction
10.2 Polynomial Curve Fitting
10.3 Exponential Curve Fitting
10.4 Parameter Estimation with Derivatives
10.5 Transport Parameter Fitting
10.6 General Procedure
References

Part II Advanced Modeling Using MATLAB®

11 Flow Modeling
11.1 The Navier-Stokes Equations for Free Fluids
11.2 The Euler Equations and the Bernoulli Theorem
11.3 Darcy’s Law for Flow in Porous Media
11.4 Flow in Unsaturated Porous Media
References

12 Groundwater Drawdown by Pumping
12.1 Confined Aquifer
12.2 Unconfined Aquifer
12.3 Half-confined Aquifer
12.4 Unsteady Drawdown and Well Function
12.5 Automatic Transmissivity Estimation
References

13 Aquifer Baseflow and 2D Meshing
13.1 1D Analysis
13.2 1D Implementation
13.3 2D Implementation
13.4 Meshs and Grids
Reference

14 Potential and Flow Visualization
14.1 Definition and First Examples
14.2 Potential and Real World Variables
14.3 Example: Groundwater Baseflow and Well
14.4 MATLAB® 2D Graphics
14.5 MATLAB® 3D Graphics
