Contents

Part I  Lab Methods

1 Higher Plants: Structural Diversity of Roots  ....................... 3
   Lyudmila G. Tarshis and Galina I. Tarshis

2 Electrical Impedance Spectroscopy and Roots  ..................... 25
   Tapani Repo, Yang Cao, Raimo Silvennoinen, and Harry Ozier-Lafontaine

3 Multi Electrode Arrays (MEAs) and the Electrical Network of the Roots  .................................................. 51
   Elisa Masi, Elisa Azzarello, Camilla Pandolfi, Susanna Pollastri, Sergio Mugnai, and Stefano Mancuso

4 The Vibrating Probe Technique in the Study of Root Physiology Under Stress  ..................................................... 67
   Camilla Pandolfi, Sergio Mugnai, Elisa Azzarello, Elisa Masi, Susanna Pollastri, and Stefano Mancuso

5 The Use of Planar Optodes in Root Studies for Quantitative Imaging  .............................................................. 83
   Stephan Blossfeld and Dirk Gansert

6 Applications of Confocal Microscopy in the Study of Root Apparatus  ............................................................... 93
   Susanna Pollastri, Elisa Azzarello, Elisa Masi, Camilla Pandolfi, Sergio Mugnai, and Stefano Mancuso

7 High-Throughput Quantification of Root Growth  .................. 109
   Andrew French, Darren Wells, Nicola Everitt, and Tony Pridmore
8 Flat Optical Scanner Method and Root Dynamics .......................... 127
Masako Dannoura, Yuji Kominami, Naoki Makita, and Hiroyuki Oguma

9 3D Quantification of Plant Root Architecture In Situ .................. 135
Suqin Fang, Randy Clark, and Hong Liao

Part II  Field Methods

10 Geophysical Imaging Techniques ................................................ 151
Said Attia al Hagrey

11 Multi-electrode Resistivity Imaging ............................................. 189
Mariana Amato, Vincenzo Lapenna, Roberta Rossi, and Giovanni Bitella

12 Using Ground-Penetrating Radar to Detect Tree Roots and Estimate Biomass ................................................................. 213
John R. Butnor, Craig Barton, Frank P. Day, Kurt H. Johnsen, Anthony N. Mucciardi, Rachel Schroeder, and Daniel B. Stover

13 Root Structure: In Situ Studies Through Sap Flow Research ...... 247
Nadezhda Nadezhdina, Teresa S. David, Jorge S. David, Valeriy Nadezhdin, Jan Cermak, Roman Gebauer, and Alexia Stokes

14 Root Function: In Situ Studies Through Sap Flow Research ...... 267
Nadezhda Nadezhdina, Teresa S. David, Jorge S. David, Valeriy Nadezhdin, Jan Cermak, Roman Gebauer, Maria Isabel Ferreira, Nuno Conceicao, Michal Dohnal, Miroslav Tesař, Karl Gartner, and Reinhart Ceulemans

15 Fine Root Dynamics and Root Respiration ................................. 291
Karibu Fukuzawa, Masako Dannoura, and Hideaki Shibata

16 Biases and Errors Associated with Different Root Production Methods and Their Effects on Field Estimates of Belowground Net Primary Production ................................................. 303
Daniel G. Milchunas

17 Minirhizotrons in Modern Root Studies ................................. 341
Teofilo Vamerali, Marianna Bandiera, and Giuliano Mosca

18 Fine Root Turnover ............................................................... 363
Martin Lukac

Index ............................................................... 375
Measuring Roots
An Updated Approach
Mancuso, S. (Ed.)
2012, XIV, 382 p., Hardcover
ISBN: 978-3-642-22066-1
