Chapter 1: Challenge: Climate change as the starting situation 1
I. Global climate change 1
   1. IPCC—global reference for a global problem 1
   2. The IPCC as the initial spark for the UNFCCC and the Kyoto Protocol 2
   3. The results of the Copenhagen “climate summit” 3
   4. What awaits us worldwide 7
      A. The prognoses 7
      B. Adaption to and mitigation of climate change as a way out? 13
II. Climate change in Switzerland 16
   1. The prognoses for Switzerland until 2050 16
   2. The ramifications 17
III. Consequences for insurance against natural hazards 18
   1. Effects on insurance against natural hazards 18
      A. Climate change—no surprise for the insurance sector 18
      B. The effects on insurance against natural hazards in detail 21
         a) Current loss trends 21
         b) The change in actuarial benchmark figures 23
      C. The increasing significance of insurance against natural hazards 25
   2. Future demands on protection against natural hazards and insurance of buildings against natural hazards 25

Chapter 2: Insurance systems today 29
I. Types of insurance systems 29
   1. General information 29
   2. Type 1: Statutory insurance 29
   3. Type 2: Compulsory insurance (obligatory insurance) 29
   4. Type 3: State aid and optional insurance according to market supply 30
II. Germany
1. State aid and insurance option according to market supply
   A. Market supply in residential buildings as well as supplementary insurance according to the ZÜRS
   B. Ad hoc state aid
2. Comparison with the situation of the German statutory insurances until 1994 and the Swiss statutory insurances
   A. Comparison with the situation of the German statutory insurances until 1994
   B. Comparison with Swiss statutory insurances
      a) Loss coverage and insurance density
      b) Promptness of claim settlement
      c) Conclusion

III. France
1. Compulsory insurance in the sense of obligatory extension of coverage
2. Effective defrayment of loss in the natural disasters sector by the state reinsurance Caisse Centrale de Réassurance (CCR)
3. Adaption of the French system due to moral hazard and negative selection
4. Differences to the German and the Swiss as well as the Spanish system

IV. Spain
1. Statutory insurance for extraordinary risks
   A. State-owned enterprise Consorcio de Compensación de Seguros as risk carrier
   B. Statutory insurance due to statutory coverage clause and statutory surcharge
2. Prevention of negative selection and maximum solidarity

V. Switzerland
1. Overview—Coexistence of statutory insurance with integrated loss prevention/abatement and compulsory insurance
2. The system of statutory insurance with integrated damage prevention and damage abatement
   A. The Kantonale Gebäudeversicherungen (KGV) as solidarity insurances
   B. The Interkantonale Rückversicherungsverband (IRV) as an enhancement to the protection policy
   C. The Interkantonale Risikogemeinschaft Elementar (IRG)—solidary defrayment of losses in the event of natural disasters

2. Type 2: Compulsory insurance 80
3. Type 1: Statutory insurance 81

Chapter 4: Legitimacy of statutory insurance against natural hazards using the example of the KGV 83

I. Admissibility under Swiss law 83
   1. Starting situation—cantonal legal monopoly 83
   2. Compatibility with economic freedom 84
      A. Economic freedom as part of a socially and environmentally committed economic system 84
      B. No right to protection from government competition or subsidiarity of government economic activity 88
      C. Statutory insurance as a monopoly that is justified in socio-political and police terms 89
         a) Legal requirements for compatibility with economic freedom 89
         b) Socio-political and police reasons and hence public interest exist 90
         c) Sufficient legal basis 93
         d) Proportionality 93
         e) Conclusion 96
   3. Compatibility with the antitrust law 96
   4. Statutory insurance as a basic service provision within the meaning of art. 43a par. 4 BV? 97
   5. The SUVA as a comparable example of public service 98
   6. Conclusion 102
   7. Excursus: system competition as the third method? 102
      A. System competition between the KGV and private insurances 102
      B. Positive effect of system competition 103

II. EU compatibility of the KGV statutory insurance system 104
   1. EU compatibility as a permanent issue for the Swiss legislature 104
   2. Conflicting priorities: internal market—competition—common good 105
   3. Basis for EU compatibility of the statutory insurance system—an overview 106
   4. Statutory insurance as the exercise of official authority 107
      A. Starting situation: neither a substantive privatisation obligation nor a monopoly ban based on EU law 107
      B. No application of the free movement of services in the exercise of official authority 108
C. The Consorcio de Compensación de Seguros solution—qualification as tax 109

5. Statutory insurance as an expression of overriding public interest 112
   A. The broad term of overriding public interest 112
   B. Considerable threat to the financial equilibrium of a social security system as overriding public interest 113
   C. Statutory insurance against natural hazards as an expression of overriding public interest 115
   D. No exclusion of overriding public interest by harmonisation 116

6. Statutory insurance as a provision of general interest services and as a service of general (economic) interest 118
   A. Terms 118
   B. From Amsterdam and Nice to Lisbon—strengthening of services of general interest 119
   C. Statutory insurance as an undertaking within the meaning of EU competition law? 121
   D. The significance of art. 14 and 106 TFEU 123
     a) The wording of the relevant provisions 123
     b) The significance of art. 14 and 106 TFEU 125
   E. Statutory insurance against natural hazards as a facility for the provision of general interest services and as a service of general economic interest 130
   F. Conclusion—no application of EU competition rules 130
   G. No application of the General Service Directive 130

7. Statutory insurance against natural hazards as a permissible compensation scheme according to the EU law governing State aid 134
   A. Configuration as a facility for the provision of general interest services as state aid? 134
   B. Balancing of risks in a solidary insurance system does not represent aid 135
   C. Conclusion 138

8. Outlook—Protection against natural disasters as a new EU goal 138

9. Final conclusion 139
