Contents

Part I Foundations

1 An Introduction to Modeling Science: Basic Model Types, Key Definitions, and a General Framework for the Comparison of Process Models ........................................... 3
   Katy Börner, Kevin W. Boyack, Staša Milojević, and Steven Morris

2 Mathematical Approaches to Modeling Science from an Algorithmic-Historiography Perspective .................. 23
   Diana Lucio-Arias and Andrea Scharnhorst

Part II Exemplary Model Types

3 Knowledge Epidemics and Population Dynamics Models for Describing Idea Diffusion ........................................... 69
   Nikolay K. Vitanov and Marcel R. Ausloos

4 Agent-Based Models of Science ........................................... 127
   Nicolas Payette

5 Evolutionary Game Theory and Complex Networks of Scientific Information ........................................... 159
   Matthias Hanauske

Part III Exemplary Model Applications

6 Dynamic Scientific Co-Authorship Networks ................................... 195
   Franc Mali, Luka Kronegger, Patrick Doreian, and Anuška Ferligoj

7 Citation Networks ..................................................... 233
   Filippo Radicchi, Santo Fortunato, and Alessandro Vespignani

xxiii
Models of Science Dynamics
Encounters Between Complexity Theory and Information Sciences
Scharnhorst, A.; Börner, K.; van den Besselaar, P.
(Eds.)
2012, XXX, 270 p., Hardcover
ISBN: 978-3-642-23067-7
