Contents

Part I  Environment and Supply Chain Operations

Using Environmental Demands to Improve Supply Chain Performance ........................................ 3
Paul Eric Dossou and Philip Mitchell

Sustainability in the Supply Chain: Analysing the Enablers ............ 25
Katarzyna Grzybowska

Sustainable Transport System Virus: The Conceptual Process Framework of Problems Identification and Analysis in Distribution System .................................................. 41
Piotr Cyplik, Łukasz Hadas and Marcin Hajdul

Internet Support of a Reverse Logistics ......................... 57
Karolina Werner and Rafał Mierzwiaik

Part II  Reverse Logistics: Example of Electronic and Electric Equipment Waste Management

Dynamic Recovery Network for WEEE .............................. 75
Paulina Golinska and Arkadiusz Kawa

Optimizing the Recycling Process of Electronic Appliances .......... 91
Arantxa Rentería and Esther Alvarez

Strategic Planning and Operational Planning in Reverse Logistics: A Case Study for Italian WEEE .............................. 107
Riccardo Manzini and Marco Bortolini
Efficient Vehicle Routing Practices for WEEE Collection .......................... 131
Julio Mar-Ortiz, Belarmino Adenso-Díaz and José Luis González-Velarde

Impact of Emerging Environmental Regulations on the Reverse Logistics System for Portable Batteries in Spain ............................. 155
Eva Ponce-Cueto and José A. González-Manteca

Part III Sustainability Issues: Sector Specific Solutions

Logistic Models to Ensure Residual Agroforestry Biomass as a Sustainable Resource ........................................ 173
Borja Velázquez-Martí, Carlos Gracia and Javier Estornell

Energetic Assessment of the Broiler Poultry Supply Chain ............... 197
Jesús Muñuzuri, Rafael Grosso, Pablo Cortés and José Guadix

The Railway as a Key Element of Sustainable Tourist Development in a Rural Area of Difficult Access: Application to a Spanish Mountain Resort .................................................. 223
María-del-Val Segarra-Oña, Ángel Peiró-Signes, Lluis Miret-Pastor and María de-Miguel-Molina

A Proposal of a Business Model in the European Passengers Railway Sector to Reduce its Environmental Impact .............. 237
María de-Miguel-Molina, Kasper-Vilstrup Roldsgaard, María-del-Val Segarra-Oña and Blanca de-Miguel-Molina

Jesús González-Feliu, Bruno Durand and Dina Andriankaja
Environmental Issues in Supply Chain Management
New Trends and Applications
Golinska, P.; Romano, C.A. (Eds.)
