# Contents

1 **Introduction** ........................................ 1  
References .................................................. 5  

2 **Literature Review** .................................... 7  
2.1 Climate Change, Fluctuations in Water Availability and Security ........................................ 7  
2.1.1 Environmental and Water Institutions ............... 11  
2.1.2 International Water Law ............................... 12  
2.1.3 Water Treaty Implementation and Application ........ 16  
2.1.4 Water Treaty Design ................................. 16  
References .................................................. 18  

3 **Hypotheses, Definitions and Explanatory Mechanisms** ........ 23  
3.1 Hypotheses ............................................. 23  
3.1.1 Defining the System ..................................... 24  
3.1.2 Defining Institution .................................... 25  
3.1.3 Defining Institutional Success ....................... 26  
3.1.4 Defining Hydrologic Stress ......................... 27  
3.2 Importance of Treaty Design and Institutional Mechanisms ...... 29  
3.3 Explanatory Mechanisms .................................. 29  
3.3.1 Communications ....................................... 30  
3.3.2 Flexibility ........................................... 33  
3.3.3 Specificity ........................................... 34  
3.3.4 Integrativeness ....................................... 36  
3.3.5 Enforcement .......................................... 37  
3.3.6 Scale ................................................. 38  
3.3.7 Uncertainty Management ............................... 40  
3.8 Hydrohegemony and Power: Impact on Relations ............ 41  
References .................................................. 43
## Data and Methods: Treaties, Power, Scarcity and Conflict

### 4.1 Methodology Overview

### 4.2 Datasets and Measurements

- **4.2.1** Dependent Variables: Conflict/Events Data
- **4.2.2** Independent Variables: Treaty Mechanisms
- **4.2.3** Calculating Treaty Mechanism Independent Variables
- **4.2.4** Independent Variable: Power and Hydrohegemony
- **4.2.5** Independent Variable: Measuring Hydrologic Stress
- **4.2.6** Historical Drought/Scarcity Data

### 4.3 Multiple Linear Regression (MLR)

- **4.3.1** Independent Variables in MLR
- **4.3.2** Dependent Variables in MLR
- **4.3.3** Summary of Dependent and Independent Combinations Used in MLR
- **4.3.4** Projected Drought/Scarcity Data

### References

## Results

### 5.1 Count Models/Summary Statistics

### 5.2 Literature Review Based Mechanism and Treaty Strength Results

### 5.3 Linear Models

### 5.4 Regression Based Treaty Strength Results

### 5.5 Hydrologic Stress, Drought and Conflict

#### 5.5.1 PDSI Summary According to Presence/Absence of Complaints

#### 5.5.2 In-Depth Analysis of PDSI Specific to Basins with Complaints

#### 5.5.3 Power and Conflict

#### 5.5.4 Comparison of Impact of Drought, Power and Treaties on Conflict

### 5.6 Discussion

### References

## Case Studies: Application of the Results

### 6.1 Basin Selection Criteria

### 6.2 Basin Specific Analysis of Treaty Design and Future Hydrologic Stress

#### 6.2.1 Nile River Basin

#### 6.2.2 Helmand River Basin

#### 6.2.3 Indus River Basin

#### 6.2.4 Tigris/Euphrates River Basin

#### 6.2.5 Jordan River Basin
