## Contents

### PART I: VISION AND FUTURE PERSPECTIVES ................................................................. 1

Change in Manufacturing – Research and Industrial Challenges ........................................ 2
   H. ElMaraghy, T. AlGedawy, A. Azab, W. ElMaraghy

Adaptive Job Control in the Cognitive Factory ................................................................. 10
   M. F. Zaeh, M. Ostgathe, F. Geiger, G. Reinhart

Mass Customisation as a Competitive Factor for Sustainability ...................................... 18
   A. Bernard, J. Daaboul, F. Laroche, C. Da Cunha

### PART II: MANUFACTURING SYSTEMS ........................................................................ 27

MANUFACTURING SYSTEM DESIGN, PLANNING, OPERATION, AND CONTROL .................. 28
Linnaean and Cladistic Classifications of Manufacturing Systems .................................. 29
   J. S. Baldwin, C. Rose-Anderssen, K. Ridgway

Integrating Ability Limitations into Assembly System Design ........................................ 35
   G. Reinhart, J. Egbers

Selection Catalogue of Kinematic Configuration for Pick and Place Application .............. 41
   K. Chandrasekaran, A. Djuric, W. H. ElMaraghy

A Transition in Production and Planning for a Changeable Micro Manufacturing System ...... 47
   B. Röhlig, J. P. Wulfberg

Using formal methods to model hybrid manufacturing processes ...................................... 52
   Aydin Nassehi, Stephen Newman, Vimal Dhokia, Zicheng Zhu, Reza Imani Asrai

Considering Reconfigurability Characteristics in Production System Design ..................... 57
   Carin Rösiö

Ontology-driven Requirements Elicitation in Product Configuration Systems ................... 63
   Wicaksano, H.; Schubert, V.; Rogalski, S.; Ait Laydi, Y.; Ovcharova, J.

Early Alert Cockpits for Changeable Manufacturing Systems ......................................... 68

New Methods to Create Variants of 3-D Simulation Models of Manufacturing Systems ........ 74
   R. Wischnewski, J. Rossmann, O. Stern

Product variety, flexibility and energy use in hot rolling mills ........................................... 80
   J. Storck

Lost Value Mapping – A Fast Method to Track Lost Value in a Production Flow ............... 86
   Pawel Pawlewski, Zbigniew J. Pasek

CHANGEABILITY, FLEXIBILITY, RE-CONFIGURABILITY AND THEIR METRICS .................. 92
A survey on changeability of machine tools ....................................................................... 93
   Philip Hollstein; Heiner Lasi; Hans-Georg Kemper

Quantifying the Effect of Enterprise Strategic Flexibility ............................................... 99
   A. Arafo, W.H. ElMaraghy

Decision Making During Design and Reconfiguration of Modular Assembly Lines ............ 105
   K. Tracht, S. Hogreve

Development of manufacturing process chains considering uncertainty ......................... 111
   S.O. Schmitt, J. Avemann, P. Groche

Optimal Sequencing of Machining Operations for Changeable Manufacturing .................. 117
   Ahmed Azab, Attia H. Gomaa

Manufacturing Concepts of the Future – Upcoming Technologies Solving Upcoming Challenges ................................................................. 123
   R. Hadar, A. Bilberg
Contents

PART I: ECONOMIC ASSESSMENT OF PRODUCTION PROCESSES .............................................................. 269

R. G. J. Damgrave, D. Lutters, J. P. Thalen

A Framework Enabling Data Integration for Virtual Production .......................................................... 275

A Foundation for Integrating Hand Held Mobile Devices in a Computer Aided Manufacturing Environment ........ 281
R. Hedrick, J. Urbanic

Parametric Internal Matrix Structures for Components Built by Fused Deposition Modelling ..................... 287
L. Villalpando, J. Urbanic

An Experimental Study to Determine Geometric and Dimensional Accuracy Impact Factors for Fused Deposition .. 293
S. Saqib, J. Urbanic

Flexible Tool-path Generation for Variable Geometry ................................................................................ 299
Sawula, D.A., Lin, Y.P., Fleisig, R.V., Spence, A.D.

A System for Providing Visual Feedback of Machine Faults .................................................................. 305
K. Hughes, G. Szkilnyk, B. Surgenor

An innovative cross wedge rolling preforming operation for warm forging ............................................. 310
H. Käche, R. Nickel, B.-A. Behrens

System Dynamic Models and Real-time Simulation of Complex Material Flow Systems ....................... 316
S. Hoher, P. Schindler, S. Göttlich, V. Schieper, S. Röck

Early identification of manufacturing process influences on product failure behaviour ............................. 322
Stefan Bracke, Stephan Haller

The aspects of energy in the Body in White process regarding product development and production planning ...... 328
M. Schacht, R. Schulte, F. Mantwill

Refining Process Logic From CNC Part Programmes for Integrated STEP-NC Compliant Manufacturing .......... 333
X. Zhang, A. Nassehi, V. G. Dhokia, S. T. Newman

ENABLERS OF CHANGE ......................................................................................................................... 339

Synchronisation of Distributed Configuration Tools using Features Models ............................................. 340
Brecher, C.; Karlberger, A.; Herfs, W.

Change Management as an Enabler of Employee Knowledge Integration into the Design of Planning Procedures... 346
Tracht, K., Welkert, F., Funke, L.

A reconfiguration concept to enable versatile production in the automotive factories ................................ 352
Sarfraz Ul Haque Minhas, Ulrich Berger

Methodology for the Support of Reconfiguration Processes in the Automotive Body Shop ..................... 358
Reinhart, G., Meling, F.

Gripper with Integrated Three-Dimensional Force Detection .................................................................. 364
K. Tracht, S. Hogreve, F. Borchers

Change-Beneficial Process Architectures and the Human as a Change Enabler .......................................... 370
Dennis Gossmann; Carsten Wagner; Tim Klemke; Peter Nyhuis

Adaptive and Selective Assembling of Microscope Objectives .................................................................. 376
K.-P. Zocher

PART II: STRATEGIC ASSESSMENT OF GLOBAL COMPETITIVENESS ................................................. 383

A STRATEGIC VIEW OF THE MANUFACTURING ENVIRONMENT ................................................................. 384

An Asian Perspective on Global Sourcing ................................................................................................. 385
Schneider, C., Finke, G., Sproedt, A., Alard, R., Schönsleben, P.

Strategic Evaluation of Technology Chains for Producing Companies .................................................... 391
Reinhart, G., Schindler, S.

Strategic Impact of Global Production – How to Find the Success Measures ............................................. 397
Heinrich Bürstner

Co-opération as a facilitator of manufacturing competitiveness: opportunities and threats ............................ 403
F. Ehrenmann, M. Reiss

Enabling Competitive Design of Next Generation Reconfigurable Manufacturing Enterprises ................. 409
T. Masood, R.H. Weston

PART III: TECHNOLOGY CHAINS FOR MANUFACTURING CO-OPERATION .............................................. 415

ECONOMIC SUSTAINABILITY FOR MANUFACTURING SYSTEMS AND PRODUCTS ................................. 415

Integrated Environmental and Economic Assessment of Production Systems ............................................ 416
A. Sproedt, J. Plehn, C. Schneider, P. Schönsleben
