
Contents

1	Introduction	1
2	An Overview of General Equilibrium Theory	5
2.1	Agents, Behavior and Markets	5
2.2	Positive Analysis of the Walrasian Equilibrium	8
2.2.1	Walras' Law and the Walrasian Equilibrium: Definitions	8
2.2.2	Existence and Uniqueness of Walrasian Equilibrium	11
2.3	Normative Properties of Walrasian Equilibrium	17
2.4	Summary	19
3	A Simple General Equilibrium Model	21
3.1	Households	21
3.2	Firms	22
3.3	Equilibrium	26
3.4	A Simple Example	29
3.5	The Numerical Solution	32
3.6	Summary	36
	Appendix 3.1: The Detailed Equations of the General Equilibrium Example	37
	Appendix 3.2: GAMS Code for Solving the Simple General Equilibrium Model	39
4	A General Equilibrium Model with a Government Sector	41
4.1	An Indirect Tax on Output with Lump-Sum Transfers	41
4.1.1	The Micro Effects of Output Taxes: An Example	44
4.1.2	The Aggregate Effects of the Output Tax	48
4.2	Factor and Income Taxes	50
4.2.1	The Effects of Factor and Income Taxes: Another Example	51
4.3	Savings, Investment, and the Government Budget Constraint	53
4.3.1	Government Activities with a Balanced Budget	53
4.3.2	Running a Non-balanced Budget	54

4.3.3	Investment and Savings	55
4.3.4	The Equilibrium System	57
4.3.5	Taxes, Expenditure and the Deficit: A Final Example	58
4.4	Summary	59
	Appendix 4.1: GAMS Code for the CGE Model Generating Tables 4.1, 4.2 and 4.3	62
	Appendix 4.2: GAMS Code for the CGE Model Generating Table 4.4	64
5	Further Extensions of the Model: External Sector, Labor Market and Consumption Technology	67
5.1	The External Sector	67
5.1.1	The Armington Assumption	68
5.1.2	Equilibrium and Model Closure	70
5.1.3	Tariffs	71
5.2	The Labor Market	71
5.3	The Consumption Technology	75
6	Data Base and Model Calibration	77
6.1	Social Accounting Matrices	78
6.1.1	A Simple Macroeconomic <i>SAM</i>	78
6.1.2	A Detailed Microeconomic <i>SAM</i>	80
6.1.3	Assembling a <i>SAM</i>	81
6.2	Calibration	83
6.2.1	Calibration of Cobb–Douglas Utility Functions	84
6.2.2	Calibration of Cobb–Douglas Production Functions	85
6.2.3	Calibration of CES Production Functions	86
6.2.4	Calibration in the Presence of Taxes	88
6.2.5	Calibration of the Fixed Coefficients Technology	90
6.2.6	Calibration of Tax Rates	91
6.3	Summary	94
	Appendix	97
7	Real-World Examples of Applied General Equilibrium Analysis	99
7.1	Theoretical Origins	100
7.2	From Theory to Applications	101
7.3	Computational Issues	102
7.4	Representative Uses of AGE Analysis and Models	104
7.4.1	Fiscal Policies	104
7.4.2	Trade Policies	105
7.4.3	Stabilization Policies	106
7.4.4	Environmental Analysis	107
7.5	Summary	108
	Appendix	109
	Bibliography	111
	Index	117

Applied General Equilibrium

An Introduction

Cardenete, M.A.; Guerra, A.-I.; Sancho, F.

2012, X, 118 p., Hardcover

ISBN: 978-3-642-24745-3
