

# Contents

---

<b>Part I Circuit and Electromagnetic Device Simulation</b>	
<b>Wavelet Algorithm for Circuit Simulation</b> .....	5
Kai Bittner and Emira Dautbegovic	
<b>Structural Characterization of Circuit Configurations with Undamped Oscillations</b> .....	13
Ricardo Riaza and Caren Tischendorf	
<b>Entrainment Phenomena in Nonlinear Oscillations</b> .....	21
Hans Georg Brachtendorf and Rainer Laur	
<b>Initial Conditions and Robust Newton-Raphson for Harmonic Balance Analysis of Free-Running Oscillators</b> .....	29
Jarmo Virtanen, E. Jan W. ter Maten, Theo G.J. Beelen, Mikko Honkala, and Mikko Hulkkonen	
<b>Rational Modeling Algorithm for Passive Microwave Structures and Systems</b> .....	37
Dirk Deschrijver, Tom Dhaene, Oliver Salazar Celis, and Annie Cuyt	
<b>An Existence Result for Index-2 PDAE System Arising in Semiconductor Modeling</b> .....	45
Giuseppe Ali, Andreas Bartel, and Nella Rotundo	
<b>Deterministic Numerical Solution of the Boltzmann Transport Equation</b> ..	53
Karl Rupp, Tibor Grasser, and Ansgar Jüngel	
<b>Analysis of Self-Heating Effects in Sub-Micron Silicon Devices with Electrothermal Monte Carlo Simulations</b> .....	61
Orazio Muscato and Vincenza Di Stefano	

<b>Diffusive Limit of a MEP Hydrodynamical Model Obtained from the Bloch-Boltzmann-Peierls Equations for Semiconductors</b> .....	69
Giuseppe Ali, Vittorio Romano, and Nella Rotundo	
<b>Automatic Layout Optimization of Power Discrete Devices Using Innovative Distributed Model Techniques</b> .....	77
Giuseppe Greco and Salvatore Rinaudo	
<b>3D Stress Simulations of Nano Transistors</b> .....	85
Abderrazzak El Boukili	
<b>Hybrid Formulations and Discretisations for Magnetoquasistatic Models</b> .....	93
Herbert De Gersem, Stephan Koch, and Thomas Weiland	
<b>A 3D Meshless Approach for Transient Electromagnetic PDEs</b> .....	107
Guido Ala, Elisa Francomano, and Antonino Spagnuolo	
<b>Modelling and Analysis of the Nonlinear Dynamics of the Transrapid and Its Guideway</b> .....	113
Michael Dellnitz, Florian Dignath, Kathrin Flaßkamp, Mirko Hessel-von Molo, Martin Krüger, Robert Timmermann, and Qinghua Zheng	
<hr/>	
<b>Part II Model Order Reduction for Chip Design</b>	
<hr/>	
<b>A Structure Preserving FGMRES Method for Solving Large Lyapunov Equations</b> .....	131
Matthias Bollhöfer and André K. Eppler	
<b>Model Reduction for Linear Descriptor Systems with Many Ports</b> .....	137
Peter Benner and André Schneider	
<b>Model Order Reduction of Nonlinear Systems By Interpolating Input-Output Behavior</b> .....	145
Michael Striebel and Joost Rommes	
<b>Krylov-Subspace Based Model Reduction of Nonlinear Circuit Models Using Bilinear and Quadratic-Linear Approximations</b> .....	153
Peter Benner and Tobias Breiten	
<b>POD Model Order Reduction of Electrical Networks with Semiconductors Modeled by the Transient Drift-Diffusion Equations</b> ....	161
Michael Hinze, Martin Kunkel, and Ulrich Matthes	
<b>Model Order Reduction of Electrical Circuits with Nonlinear Elements</b> .....	169
Andreas Steinbrecher and Tatjana Stykel	

**Structure-Exploiting Symbolic-Numerical Model Reduction of Nonlinear Electrical Circuits** ..... 179  
 Oliver Schmidt

**Using Sensitivities for Symbolic Analysis and Model Order Reduction of Systems with Parameter Variation** ..... 187  
 Christian Salzig, Matthias Hauser, and Alberto Venturi

**Multi-Objective Optimization of RF Circuit Blocks via Surrogate Models and NBI and SPEA2 Methods** ..... 195  
 Luciano De Tommasi, Theo G.J. Beelen, Marcel F. Sevat, Joost Rommes, and E. Jan W. ter Maten

---

**Part III Uncertainties and Stochastics**

---

**On a Numerical Approximation Scheme for Construction of the Early Exercise Boundary for a Class of Nonlinear Black–Scholes Equations** ..... 207  
 Daniel Ševčovič

**On the Stability of a Compact Finite Difference Scheme for Option Pricing** ..... 215  
 Bertram Düring and Michel Fournié

**Stationary Solutions of Some Nonlinear Black–Scholes Type Equations Arising in Option Pricing** ..... 223  
 Maria de Fátima Fabião, Maria do Rosário Grossinho, Eva Morais, and Onofre Alves Simões

**Variants of the Combination Technique for Multi-Dimensional Option Pricing** ..... 231  
 Janos Benk, Hans-Joachim Bungartz, Aliz-Eva Nagy, and Stefanie Schraufstetter

**Stochastic PDAE-Model and Associated Monte-Carlo Simulations for Elastic Threads in Turbulent Flows** ..... 239  
 Nicole Marheineke and Raimund Wegener

**Production Networks with Stochastic Machinery Default** ..... 247  
 Simone Göttlich, Stephan Martin, and Thorsten Sickenberger

**Verified Simulation for Robustness Evaluation of Tracking Controllers** ..... 255  
 Marco Kletting and Felix Antritter

**Structural Analysis for the Design of Reliable Controllers and State Estimators for Uncertain Dynamical Systems** ..... 263  
 Andreas Rauh and Harald Aschemann

<b>Wiener Calculus for Differential Equations with Uncertainties</b> .....	271
Florian Augustin, Peter Rentrop, and Utz Wever	
<b>Polynomial Chaos and Its Application to Delay Differential Equations with Uncertainties</b> .....	283
Manuel Villegas Caballero	
<hr/>	
<b>Part IV Production</b>	
<hr/>	
<b>Nonlinear Metamodeling of Bulky Data and Applications in Automotive Design</b> .....	295
Igor Nikitin, Lialia Nikitina, and Tanja Clees	
<b>Heat Transfer During Annealing of Steel Coils</b> .....	303
Winston L. Sweatman, Steven I. Barry, and Mark McGuinness	
<b>Deformations Arising During Air-Knife Stripping in the Galvanisation of Steel</b> .....	311
Graeme C. Hocking, Winston L. Sweatman, Alistair D. Fitt, and Chris Breward	
<b>Modelling Preform and Mould Shapes in Blow Moulding</b> .....	319
J.A.W.M. Groot, R.M.M. Mattheij, and C.G. Giannopapa	
<b>Asymptotic Analysis of a Multi-Component Wet Chemical Etching Model</b> .....	327
Jonathan Ward	
<b>Numerical Treatment of Fiber–Fiber and Fiber-Obstacle Contacts in Technical Textile Manufacturing</b> .....	335
Ferdinand Olawsky, Martin Hering-Bertram, Andre Schmeißer, and Nicole Marheineke	
<b>A Model of Rotary Spinning Process</b> .....	341
Andriy Hlod, Alphons A.F. van de Ven, and Mark A. Peletier	
<b>Asymptotic Models of Different Complexity for Viscous Jets and Their Applicability Regimes</b> .....	349
Walter Arne, Nicole Marheineke, and Raimund Wegener	
<b>Wavelet Methods for the Representation, Analysis and Simulation of Optical Surfaces</b> .....	357
Philipp Jester, Christoph Menke, and Karsten Urban	
<b>Modelling Two-Dimensional Photopolymer Patterns Produced with Multiple-Beam Holography</b> .....	365
Dana Mackey, Tsvetanka Babeva, Izabela Naydenova, and Vincent Toal	

**Modeling Berry’s Phase in Graphene by Using a Quantum Kinetic Approach** ..... 373  
 Omar Morandi and Ferdinand Schürer

**Multi Scale Random Sets: From Morphology to Effective Behaviour** ..... 381  
 Dominique Jeulin

---

**Part V Modeling, Analysis and Computation of Fluid Dynamics Problems**

---

**Mathematical Modelling of Phase Change with a Flowing Thin Film** ..... 399  
 Tim G. Myers and Sarah L. Mitchell

**On Modeling of Curved Jets of Viscous Fluid Hitting a Moving Surface** ..... 407  
 Andriy Hlod

**Air Elimination in Milk** ..... 421  
 Michael Devereux and William Lee

**Quantum Navier–Stokes Equations** ..... 427  
 Ansgar Jüngel and Josipa-Pina Milišić

**Travelling-Wave Similarity Solutions for an Unsteady Gravity-Driven Dry Patch** ..... 441  
 Y. Mohd Yatim, Brian R. Duffy, and Stephen K. Wilson

**Asymptotics of a Small Liquid Drop on a Cone and Plate Rheometer** ..... 449  
 Vincent Cregan, Stephen B.G. O’Brien, and Sean McKee

**Finger Formation and Non-newtonian Fluids** ..... 457  
 Jean P.F. Charpin

**Numerical Modelling and Simulation of Ship Hull Geometries** ..... 465  
 Michael Hopfensitz, Juan C. Matutut, and Karsten Urban

**Analysis of Combustion and Turbulence Models in a Cylindrical Combustion Chamber** ..... 473  
 Alexandru Dumitrache, Florin Frunzulica, and Horia Dumitrescu

**Numerical Method for a Stefan-Type Problem with Interior Layers** ..... 479  
 Martin Viscor and Martin Stynes

---

**Part VI Life and Environmental Sciences**

---

**The Post-Newtonian Geolocation Problem by TDOA** ..... 489  
 J.M. Gambi, M.C. Rodriguez-Teijeiro, and M.L. Garcia del Pino

<b>Analytical Method for Inverse Problems of Deep Magneto Telluric Sounding</b> .....	497
Sharif E. Guseynov	
<b>Modelling the Mechanical Behaviour of a Pharmaceutical Tablet Using PDEs</b> .....	505
Norhayati Ahmat, Hassan Ugail, and Gabriela González Castro	
<b>On Causality of Thermoacoustic Tomography of Dissipative Tissue</b> .....	513
Richard Kowar	
<b>A Mathematical Model for Drug Delivery</b> .....	521
Vo Thi Ngoc Tuoi, Rongbing Yang, Yury Rochev, and Martin Meere	
<b>Estimators of the Intensity of Fibre Processes and Applications</b> .....	529
Paola M.V. Rancoita and Alessandra Micheletti	
<b>Optimal Control Strategies for Stochastic/Deterministic Bioeconomic Models</b> .....	537
Darya Filatova	
<b>Fishway Optimization Revisited</b> .....	545
Lino J. Alvarez-Vázquez, Aurea Martínez, Joaquim J. Júdice, Carmen Rodríguez, Miguel E. Vázquez-Méndez, and Miguel A. Vilar	
<b>On a Wind Farm Aggregate Model Based on the Output Rescaling of a Single Turbine Model</b> .....	553
Luciano De Tommasi and Madeleine Gibescu	
<b>Adaptive Modelling of Coupled Hydrological Processes with Application in Water Management</b> .....	561
Peter Bastian, Heiko Berninger, Andreas Dedner, Christian Engwer, Patrick Henning, Ralf Kornhuber, Dietmar Kröner, Mario Ohlberger, Oliver Sander, Gerd Schiffler, Nina Shokina, and Kathrin Smetana	
<hr/>	
<b>Part VII Dedicated and Versatile Methods</b>	
<b>FEINS: Finite Element Solver for Shape Optimization with Adjoint Equations</b> .....	573
René Schneider	
<b>Invariant Loading for Full Vehicle Simulation</b> .....	581
Michael Burger, Klaus Dreßler, Albert Marquardt, Michael Morr, and Lothar Witte	
<b>Structure Preserving Spatial Discretization of a Piezoelectric Beam</b> .....	587
Thomas Voß	

**Error Estimates for Finite-Dimensional Approximations  
in Control of Distributed Parameter Systems** ..... 595  
 Andreas Rauh, Jöran Ritzke, and Harald Aschemann

**Solving Non-smooth Delay Differential Equations with Multiquadrics** .... 603  
 Francisco Bernal

**Higher-Order Matrix Splines for Systems of Second-Order  
Differential Equations** ..... 611  
 Emilio Defez, Michael M. Tung, Jacinto Javier Ibáñez,  
 and Luna Soler

**Multiscale Methods in Time and Space** ..... 619  
 Konstantin Fackeldey

**A Cache-Oblivious Sparse Matrix–Vector Multiplication  
Scheme Based on the Hilbert Curve** ..... 627  
 Albert-Jan N. Yzelman and Rob H. Bisseling

**Absorbing Boundary Conditions for Solving Stationary  
Schrödinger Equations** ..... 635  
 Pauline Klein, Xavier Antoine, Christophe Besse, and Matthias  
 Ehrhardt

**Diffusion on Surfaces of Revolution** ..... 643  
 Michael M. Tung

**Verified Analysis of a Biomechanics-Related System** ..... 651  
 Ekaterina Auer

**Subject Index** ..... 659

**Authors Index** ..... 665
